SATURDAY, JUNE 7, 1851. Democratic Whig County Meeting. ty, and all those favorable to protection to

American Industry and Internal Improvement, are requested to assemble in a General County Meeting, at the Court House at Or-County Meeting, at the court trouse at Of-wigsburg, on TUESDAY, June 10th, 1851, at 1½ o'clock, P. M., for the purpose of apat 14 o'clock, P. M., for the purpose of appointing Delegates to represent Schuylkill ets \$3, \$2 and \$1 each. See Advertisement. for the purpose of placing in nomination Candidates for Governor, Judges of the Suprement Shaft, and Canal Commissioner, and to make the necessary arrangements for the formation of a Ticket; to be supported in the for the last few weeks through the suprement of the suprement of the last few weeks through the suprement of the suprement formation of a Ticket, to be supported in the County at the ensuing election.

Fellow citizens, at no period in the history of the country have the Democratic Whigs been so successful throughout every section, as they have been in the recent elections, where the confest was not mixed up with local questions—and it is to be hoped that the Whigs of Schuylkill will not permit any connected with politics, to influence their actions in the great political struggle. Principles are everything men are the mere in-B. BANNAN. WM. A. HAMMER,

THE DOLLAR JOURNAL. - We are making preparations for the issue of the specimen number of this new paper-it will appear as early as possible. Advertisements

bly commence setting up the type. by the middle of next week. TURKISH STYLE OF DRESS. As our lady readers are doubtless anxious

to have a correct idea of the new style of dress, we copy the following description: "The skirt comes a little below the knee, and buttons in front. The border extends

border form the letter V. The trowsers are made loose, gathered into a band at the ankle." it, rather pithy extracts from this to be accurately quote our authorities, but no mat-

ter, our word for it, thus much has been said. Every editor is naturally ambitious to have and unreservedly avow that we are perfectly always felt inclined to quarrel with the caprice of fashion for keeping behind the scenes. It is more graceful(our taste) -more conveni- broad headed rails, conforming to the tire of ent to the wearer, infinitely less annoying the wheels, and thus increase at once the adto the beaux, in the promenade or when trip- | sion. ping on the "light fantastic" toe," and altogether more safe from the wear and tear of young men, we are sure, will greet the change to, arrive at the foot of a steep grade with with acclamation, and perhaps a goodly num. full head of steam; then the sand box freely appreciation of the beauties of nature. And if it be once understood that the opposition formidable than they are now. springs only from those upon whom nature teet and thick ankles, then depend upon it. sipate the charge by a simple display of their

## POPULAR MOVEMENT.

The age is too far advanced to admit the honesty or disinterestedness of any body, drinking of spirituous liquors. Public opiuion is gradually, but surely, changing on this subject. Men begin to take a practical comof American democracy. I have been inthe Men begin to take a practical comof American democracy. I have been inmon-sense view of the matter. They now spired with the most profound respect for begin to look upon it in the light of utility. Its constitution—a work, not of metaphysical Beaver Meadow.

We the better off by encouraging others to sought in the most protound respect for Room Run Mines, Beaver Meadow.

Spring Mountain Coal, of virtuous men, of devoted citizens, who sought in the traditions of their country, and Coanter Coal Company. we the better off by encouraging others to sought in the traditions of their country, and use it" is the practical question every one in the realities of the situation in which they tion, he finds the taxes of a community in citizens asked from their knowledge and excreased in proportion to the consumption of perience. The truth is coming home, and the people by Charles the First to the State of Rhode by Charles the First to the State of Rhode Island and its colonists, continued up till From Port Carbon. comprehend it—hence the general stir over the whole country, and we pray God it may these last few years. The edifice of the American republic is the work of several the traffic is wholly stopped, or restricted by its duration. There is also a new evidence moderate and safe legal regulations.

with a friend occasionally, or to decapitate order to be strong, independent, and respecta few bottles of champagne at an evening's ed, must have their roots in the past. The American people, (let those who admire party once in a while-it greatly enlivens the spirits—the songs are better sung and ed,) are traditional people—that is to say, the stories better told-friends have longer they recognise their ancestors, and religiously remembrances of one another for having been on a "spree" together, but when the publican institutions; but I have, in the headaches are considered and perhaps the same time, remarked that what rendered heart-aches and the thousand little annoy- them so fit for the practice of these instituances that always follow such occasions, the truth must be admitted, they "do not pay." The young men are beginning to reason after this fashion. Disease insensibly fasiens

Probable means of augumenting it

The tollowing communication, from the intended for this number, should be sent Franklin Journal, is by our former townstreated of in a manner worthy: the acknowledged abilities of the author:

It is well known that numerous accurate experiments on friction have established the aw, that within the limits of abrasion, the friction is as the insistent weight, and not as the surface of contact. These experiments, though they have formed the basis of many calculations of the various frictions of railways, and nave been valuable in this departround the skirt, and in front to the bottom of ment of mechanical science, in establishing the waist-the latter being cut to have the minimum results, do not meet the practical acquirements of railway motions, because in hose motions invariably when maximum effeets are produced, the limit of abrasion is The truth is the question "breeches or always reached and passed. Of the friction no breeches? is making quite a "muss" of moving metals in contact, when abrading over the whole country. Almost every each other, we have no experiments whatnewspaper has something to say about it, ever. Hence we have no means of calculat-

advises a fair exchange of garments, nether When engines slip their wheels on railways, machinery to do a business, such as it never has both wheels and rails abrade, the law of frichad the means to do before. delphia Herdid, a paper all blushing with new field, in which we have no exact results —in two years the Company with pay 6 per cent on modesty and chock full of literary taste, says recorded, and of which we only know that \$6,500,000, and in 3 or 4; years 8 or 10 on that what we, in our unsophisticatedness, would the co-efficient of friction is greatly increased. feel ashamed to copy - another, and we think ! It is upon this outline of facts, (which ! he is the best philosopher of the lot, says, the women are bound to wear the breeches any how, so we had better let them have the Triebish pattern as the least chieffinal and the lot. The latter them have the least chieffinal and the lot. The latter them have the least chieffinal and the least chieffinal and the latter let them have the least chieffinal and least Turkish pattern as the least objectionable the limits of abrasion, the law of friction, as another calls the new style "the height of applicable to break blocks and the slip of tashion" but for his part, he don't care a fig how high the ladies carry it, &c., &c., to the how high the ladies carry it, &c., &c., to the how high the ladies carry it, &c., &c., to the how high the ladies carry it, &c., &c., to the house of contact as well as present, we have another which we will present end of the chapter. These are short, but to the weight imposed. The writer believes sion of heavy gradients by locomotives, where sion of heavy gradients by locomotives, where the sand box is always used. In such cases with a job, and personally we have no fault to find above Establishment, solicits the sand box is always used. In such cases breadth of the rail, or surface gained, will opposed their high rates of toll, because they were a say in a matter so delicately interesting, of the driving wheels, though the weight rewe therefore, for once, conquer our modesty

a say in a matter so delicately interesting, of the driving wheels, though the weight remains the same. The usual surface of conreduced, we oppose their reduction being kept

a say in a matter so delicately interesting, of the driving wheels, though the weight remains the same. The usual surface of conreduced, we oppose their reduction being kept

a say in a matter so delicately interesting, of the driving wheels, though the weight remains the same. The usual surface of conreduced, we oppose their reduction being kept

a say in a matter so delicately interesting. tact of wheel and rail has a breadth of only cret, and until that course is abandoned, we shall two inches, while the wheels themselves charmed with thes new style." It discloses have a breadth of nearly four inches. If The present mode of doing business on the Road. to our eye a world of beauty, that we have then, beyond the limit of abrasion, the friction increase in the same ratio to the sur-

This, of course, supposes engineers to have surplus steam power: and such is usually the case with modern locomotives, which, in a not o'er-careful stepping public. All the fact, as now in practice always do, or ought ber of the older ones, who still retain their used upon a four inch rail, it seems highly probable, will augment so much of the bite of the wheels, as to render high gradients less

face, (as the writer believes,) then upon high

gradients, all we have to do is to fay down

To the above considerations, the writer rehas bes'owed substantial proportions—big specifully invites the attention of his professional brethren, in the hope that some of the companies they serve may at once put this based upon this footing, the Turkish trowsers important matter to the test, and lay a few will soon become not only popular but fash- hundred yards of rails, four inches broad, ionable—the ladies will never rest under false upon the high gradients of some railway doimputations, when so many can readily dis- ing heavy freight business. A few months' use, and a few correct experiments would soon settle the question definitely, and the writer knows scarcely any other, of more moment to some railways.

Promiscuous Extracts - About seven miles from Benicia, the principal station of the United States Mai teamers, extensive and valuable beds of bituminous coal have been discovered in the course of a scientific exploration for that mineral. The lands containing the coal formerly belonged to General Vallejo, but have been purchased from him by parties who are preparing to mine the coal, with a view t supplying the steamers which ply in the waters of California and on the Pacific. The beds are situated in a range of hills parallel to Luison bay, separated from the Bay of San Francisco by the Straits of Carquinez, into which the Sacramento and San Joaquin ri vers empty their waters, and are within half water carriage. Supposing all to be as stated, the discovery is, obviously, of

immense importance.

PHILADELPHIA, FRIDAY 4 O'CLOCK. Wheat Flour, \$4.50-Rve, do. \$3 50 per hbl.—Corn Meal. \$3,00 do.—Wheat, Red 98 cts. White, \$1 03 .- Rye, 70 cents -Corn 621-Oats, 46 cents per bushel. Whiskey 234 cents per gallon.

THE New Constitution of Maryland was adopted by the people on Wednesday last, by a large majority.

TAN ORDER, similar to our own has been issued by the Judges of the Courts of Union county, closing the bars of Hotels on Sunday. There is no mistake about it-we are on the eve of a general reform on this

IT is supposan that the following gentlemen will compose the Locofoco Judicial Ticket to be nominated at Harrisburg on the 24th inst., -- Judges Gibson, Kidder, Campbell, Lewis and Lowery. We presume the matter was all settled at Reading on Vednesday.

DAUPHIN COUNTY .- The Whig coun-Convention has nominated the following icket:-

President Judge - John J. Pearson, Harisburg. Associate Judges-A. O. Heister, Susque nanna : Wm. F. Murray, Portsmouth. Senate-John C. Kunkel, Harrisburg. Assembly-Jacob Landis, Derry; James Freeland, Upper Paxton.

LOCOFOCO CONVENTION.

The Locofoco State Convention, met at Reading, on Wednesday last. The afternoon delegates-several of the members relieved their excitement, by wrathy speeches, among which Col. Frazer's was conspicuous, he was down on the "favorite son" like a thousand ncendiary. It first maddens the tiger and of brick." No business boyond this, was transacted that day. Caucusses were busy in the mean time, and on Thursday, contraty to the general anticipation of a nice little squabble, Col. W. Bigler, or Clearfield, was declared the candidate for Governor, by acthe nomination for Canal Commissioner, on the 9th ballot, the vote standing 95 for Clover, and 38 for Searight. Eight candidates were in the field: Clover, Searight, Camphell and Bratton, being the most prominent. After his nomination, Bigler was sent for o Philadelphia, and introduced to the Convention, while in session, during the afternoon. The Convention adjourned Thursday afternoon -
