FARES.

NEW ARRANGEMENT.

Orwigeburg Landing Hamburg Mohraville

PortUnior

March 22, 1851

April 5, 1851.

The Locomotive's coming. With a clatter and a roar; We all shall see it presently Or possibly before.
It skims along the valleys,
Like a pigeon in the sky.
Or rather like a rocket— Only not so high: Dashing o'er the fountains

Bless me! how we sail! How the cars are crowded With people bound for York!
The country dealer for his good
The farmer with his pork!

What a lot of gentlemen, What a throng of ladies,
With their knitting and their flowers' Dashing o'er the fountains, Bless me! how we sail! Ripping through the mountains. Riding on a rail!

Now we're at the fastest; Most a mile a minute : Most a mile a minute;

The very devil's in it!

Now the smoke is in my eyes;

Now it makes me cough; Mow it makes the cough;
Can't I hire a boy, to keep
My hair from blowing off?
Dashing o'er the fountains,
Bless me! how we sail!

he promenades the streets, was on a foraging expedition a few days since in the centre Market. Seeing a buxom Sucker girl in the Directors: distance, he approached her, seized her hand, and exclaimed with much warmth:

"How do you do, my dear young friend? how is your father and mother? when did you leave home? Ah! excuse me, I have forgotten your name, but I stayed all night at your father's home a year ago. (Her father had been dead for ten years.) Perhaps don't recollect me. My name's ---: my store is on Broadway: call on me-I shall be happy to sell you some bargains"and leaving his card in her hand, our man] of tape departed.

Not long afterwards appeared the not very green young lady, who selected goods to the amount of about twenty dollars, and picking them up, was about leaving, when the polite shopkeeper and friends of the family, "Excuse me, Miss, you have forgotten

the bill." "Oh no," replied Miss Sucker, " please charge it to father:" =

Utterly confounded, our long friend suffered verdancy in muslin to leave with the bili unpaid.—Si. Louis Reville.

BIG GUN. Joe Billings, a romancing Yankee, was one evening seated in a har-room of a country tavern in Canada, where were assembled several old countrymen, discussing various Richard S. Newbold, Secretary.

The subscriber having been appointed agent for the above Company is now prepared to make insurance cumstances of war." In the course of his terms. Apply at G. H. Polis' office, Morris' Addition remarks, one of them stated that the British or at my house in Market Street, Pottsville, Government possessed the largest cannon in the world-and gave the dimensions of one he had seen.

to let such a base assertion pass uncontra-

"Poh, gentlemen;" said he, "I won't deny that it it is a fair sized cannon-but you are a leetle mistaken in supposing it to be named the same minute with one of our Yankee guns which I saw in Charlestown last year. Jupiter! that was a cannon. Why, sir, it was so infernally large, that the follows, viz oxen to draw in the ball !"

" The deuce they were," exclaimed one of his hearers, with a smile of triumph, "pray, can you tell me how they got the oxen out

o'clock on a December night, when the thermometer stood in the neighborhood of zero, party of wags hailed a farm-house in a very boisterous manner. The farmer sprang out of his warm bed, drew on a few articles of clothing, and ran out to see what was wanted, when the following dialogue occur-

"Have you any hay, M-?" "Plenty of it, sir.'

" Have you plenty of corn ?"

"Plenty of meat and breadstuffs?" " Yes. ?

"Well, we are glad to hear it; for they are very useful articles in a family." The party then drove off, leaving the farmer to his reflection.

TA CLERGYMAN in Scotland desired his hearers never to call one another liars, but when any one said a thing that was not true

they ought to whistle. On Sunday he preached a sermon on the "Loaves and fishes:" and being at a loss how to explain it, he said the loaves were not like those now-a-days, they were as big as the hills in Scotland. He had scarcely pronounced the words, when he heard a

loud whistle "What's that?" said he, "who calls me "It's me, sir, Willy McDonald, the baker."

" Weel, Willy, what objections hae ye to what I told ye?"

TRY YOUR HAND.—An Irish clergyman's servant, having a strong desire to try
his hand at pulpit oratory, managed during
the indisposition of his master, to get possession of the pulpit. The congregation was
very large; so large, indeed, that Pat, who
was "unaccustomed to public speaking,"
stood in the pulpit, with his head hung
down, and looking as sheepish as possible.
Desperation at last inspired him with coursege, and he bawled out—" If any of ye has
got any consale; about praiching ye had better come up here."

PHE SUBSCRIBER HAVING ERECTED AND
put into operation an extensive Sicam Saw Midiat the head of Silver Creek, on a large tract of the
fest timber land in Schuylkill County—he is prepared to furnish sawed timber of all sizes, to-tudinPropa for Mines, &c., at the shortest notice. Confisell his Lumber at lower rates, than those of any other assured that a trial only is necessary to secure their patronage. Persons desiring Lumber, will apply to the subscriber in Pottsville, or to his Agent at the Mill e subscriper in Foundation, John TEMPLE.

JOHN TEMPLE. ONLY \$25 FOR A HOMESTEAD! 22 Farms, worth over \$8,500, and 6,400 Lots, to

be distributed among 800 Subscribers. To supply the de mand for the Lots and Farms at Hermannville. I have baid out another tract, adjoining the Loug leland Railroad and the land already sold at Hermannville, to be of the vame size, and disposed of and divided among the purchasers in the same mature as those recently sold there: hose recently sold there:

I have been induced to do this from the great number of persons wishing to purchase these Lots and Farms, as the improvements in that part of the Island are constantly increasing, and large numbers of persona have now become interested in those; tands

others and at the rate they are now being taken the will all be sold in a short time. About 750 shares are ow subscribed. Each subscriber is entitled to 8 hots, 25 by 100 feet ng together, or a Farm of from 4 to 20 agres. The aregare limited at \$25 - payable; \$5 when subscribed The Lots are situated in the Village of HERMANN-VILLE; on the Eoing Island Railroad, County of Sulfolk, and 50 miles from the City of New York; and adjoins Lakeland, also a new village, recently taid ou

folk and 50 miles from the City of New York, and anjoins Lakeland, also a new village, recently fail out, where handsome buildings are erected.

It is one of the healthiest plares in the U States, and within one mile of Ronkonkoma Lake, a beautiful sheet of water, about three miles in circumference, of singular transparency, and of great, depth, with an abundance of fish. The village is but 4 miles distant from the great-South Bay, which is 5 miles wide, and 4 milles long abundantify-uppined withoysters, clams and fish of various kinds.

There lands will produce as much per acre, with the same cultivation, as any land within fully miles of the city of New York.

"Look Jatanb Wheat.—At the annual meeting of the New York Agricultural Society, held at Albany on the 20th inet, for awarding perminms on Field Crops, we find Suffolk County stands second hest—no slight honor—in raising wheat. Mr. Samuel L. Thompson of Setauket, received the second premium of \$15, for Winter Wheat, 12 bushels I peck to the face of the city of New York and Suffolk County stands second hest—no slight honor—in raising wheat. Mr. Samuel L. Thompson of Setauket, received the second premium of \$15, for Winter Wheat, 12 bushels I peck to the face of the city of the certification of \$15, for Winter Wheat, 12 bushels I peck to the face of the city of the certification of \$15, for Winter Wheat, 12 bushels I peck to the face of the city of the certification of \$15, for Winter Wheat, 12 bushels I peck to the face of the city of the certification of \$15, for Winter Wheat, 12 bushels I peck to the control of the certification of the certi

as also the winter crops, which appeared unusually promising. Wheat, which had been sown but two or three weeks, presented a beautifulthrifty appearance; while turnips, beets, and other vegetables not yet gathered for winter me, would compare advantigeous-ity with the best in the New York market. Pototoes, gathered for winter use, would compare advant (geously with the best in the New York market. Potatoes, already in the cellar, were very fine, without a vestige of disease, and corn standing in the field was not surpassed by much that we saw on lands valued a decident than one hundred dollars per acre. Indeed, the vegetables which received the premium at the Suffort Co., Fair, were raised from a portion of this ground which had not been under cultivation it months. Allogether we were very favorably impressed without visit of these lands, now so favorably offered to the public, at prices which cannot fail to double in a few years and we would invite the attention of those who desire a cheap and clightle farm, to this location. Hermanyille Station is located on the bonders of the Long Island Ruiroud, whence cars fun several times a day to Brooklyn and New York. The surface of the land is smooth and level, and the surrounding country is perfectly leadily, and within a few miles of this place, tightly cultivated and valuable, having here sentied for more than a hundred and fifty vears, and where similar lands sell at from \$50 to \$200 per acre. rre The lands are as good as represented, and as good as noduce in the highest degree.

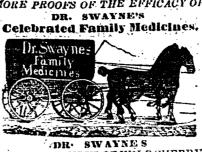

The land was once heavily tunbered; some portions

e Island There is material on the land for common fencing good che nut rails can be had within a few mile of these lands in abundance. All building material can be had at the depots of Brooklyn and Greenport, and at many intermediate, places, at the usual market hay, whith are remarkance for their party, and never fail—indeed, dry weather makes very little change in them, they are unfailing; and wells are of various depths—probably, over these new lands, by the moddle region of the Island, the average depth will be about 25 feet; at Hermannville, as the ground is higher, they are deeper. Subscribers are not compelled to build.

There are now churches and schools within two of

COMPOUND SYRUP OF WILD CHERRY THE ORIGINAL AND GENUINE PREPARATION.

THE ORIGINAL AND GENUINE PREPADATION.
It may be truly said, that
no one has ever been so successful in compounding a Medicine which
has done so much to relieve the human
family, to robdisease of listerrors, and restore
the Invalid to Health and Comforf, as the Inventor
and Proprieter of that most deservedly popular Family
Medicine, Dr. Swayne's Compound Syrop of Wild
Cherry, and none has been so general patronised by the
Profession and others, both in this country and Europe,
nor has there ever been so great an effort in the short
ispaced only six of seven years, to decrive the credilines and untilinking, by putting up Nostruma of various
sinds, by various individuals, affixing the name, of
Wild Cherry, and as much of the name of the original preparation, as will screen from the lash of the
law.

Wild Cherry, and as much of the name of the original preparation, as will screen from the lash of the law.

Beware of such Imposters, and purchase none but the original and only gennine article, as prepared by Dr. Swayne, which arose from many years' close attention to the practice of the Profession, and which led to this great discovery.

Beware of Mistakes! Remember, the gennine is put up in square bottles, covered with a beautiful wrapper, (steff engraving.) with the portrait of Dr. Swaine thereon, also his signature; all others are positively. If fectious and counterfest.

A FOICE PROM SCHEVIKH, COUNTY PLEASE READ THIS ENTRAORDINARY (13ff. Dr. Swainé:—Dear Sur-About six years ago, it discovered that mylungs were affected, of which the came more convinced from time to line, although tried many remedies, yet without any apparent benefit, and my disease increased until I was compelled to keep my room, and at last mybed. I had great print my left side, upon which? could not lay in bed, and in the morning my cough was so syvere that I found it very parintials throw up the philom which cather a in great quantities on my bings, when fortunately I hought of your agent, of this place, one bottle of your assent, or this place, one bottle of your assent, or the place, one bottle of your assent sets hottles, and am happy to tell you that my pains are removed, my strength returned, my sleep is undisturbed and were happy to subscribe myself and I firstly believe that to your medicine under the blessings of Providence, I am indebted for this great change, and an very happy to subscribe myself.

And crimes below a crown;
As good hearts beat 'heath a fustian vest,
As under a silken gown.
Shall tales be told of the chiefs who sold
Their snews to crush and kill,
And never a word be sung or heard Of the men who reap and till? Of the men who reap and till?
Thow in thanks to the sturdy throng
Who greet the young morn with toil;
And the burden I give my earnest song.
Shalt be this—The Kings of the Soil!
Then sing for the Kings who have no crown
But the blue sky o'er their head—
Never Sultan or Dey had such powers as they
To withhold or offer bread. Proud ships may hold both silver and gold, The wealth of a distant strand;

THE KINGS OF THE SOIL.

Black sin may nestle below a crest,

But ships would rot, and be valued not,
Were there none to till the land.
The wildest heath, and the wildest brake, Are rich as the richest fleef;
For they gladden the wild birds when they wake
And give them food to eat.
And with willing hand, and spade, and plough,
The gladdening hour shall come.
When that which is called the 'waste land' now
Shall ring with the 'Harvest Home!' Then sing for the Kings who have no crown Bull range with the 'Harvest Home ''
Then sing for the Kings who have no crown But the blue-sky o'er their head—
Never Sultan nor Dey had such power as they
To withhold or offer bread.

The Farmer,

GERMAN HOT BEDS.

Take white cotton cloth of a close texture, stretch and nail it on frames of any size you wish :-- take two oz. of lime water, four or linseed oil, one oz. white of eggs; mix the lime and oil with very gentle heat, beat the eggs well separately and mix with the former:-spread this mixture with a paint brush over the cotton, allowing each coat to dry before applying another, until they become water proof. The following are the advantages this shade posesses over glass ones:

1. The cost being hardly one-fourth. 2. Repairs are easily and cheeply made. 3. The light. They do not require watering : no matter how intense the heat of the sun, the plants are never struck down or burnt, faced or checked in growth, neither FOR SALE SEVERAL SUPERIOR NEW they do under glass, and still there is abundance of fight.

do they grow up long, sick and weakly as they do under glass, and still there is abundance of fight. do they grow up long, sick and weakly as

s more equable and temperate, which is a great object. The vapor rising from the manure and each is condensed by the cool air passing over the surface of the shade. and stands in drops upon the inside, and therefore the plants do not require, as frequent watering. If the frames or stretchers we made large, they should be intersected by ross-bars about a foot square, to support the cloth. These articles are just the thing for m. Wrapping Paper, different qualities and transplanting .- Plow, Loom and Anvil.

GALLS ON HORSES.

More than twenty years ago, when our large terry boats were propelled by horse power, and the horses, by moving round in a circle, were exceedingly liable to be galled by the collar, I learned from the ferrymen the use of alum and whiskey. They bathed with despatch at the shortest notice, and on the most the neck and back, wherever the harness reasonable terms. All the work warranted. Apply to W. J. ROBERTS, Traichletsville P. O., Leligh Co., rubbed, with whiskey into which pounded Par Azent, or to B. BANNAN at this office will be punt thally attended to

Whom a call had control or dissolved. When a gall had occurred, con-NRAFTS AND BILLS OF EXCHANGE IN stant bathing would secure the continued remedy, carrying it with me when I journeved, and have continued its use with undiminished approval, for more than twenty years. I apply no other remedy. When a horse has been put out for the winter, and L Building and offer the winter, and has not been put out for the winter, and Planeing Mill, who re they can be suited in all kinds of Florette. Turning and Lumier, from lanch Buards to Panget Plank

MENRY MERAUCH

LENGTH OF THE WINTER STATES OF A larger has been put out for the winter, and has not been used, his breast and back will be tender. A single hour's use of saddle or collar, in a hot day, will then scald the breast collar, in a hot day, will then scald the breast so as to produce serious injury. My uniform practice, therefore, has been, for a week before beginning to use the harness, to harden the breast and back by bathing them regularly two or three times a day. No mjury has then resulted from the application of the collar. And when a bad gall has actually occurred, a frequent and pensevering use of this remedy has secured the constant use of the animal, and healed the wound while in continued service .- Rural

New Yorker. EARLY CUTTING OF GRAIN. In advance of the time of harvesting the wheat crop, we desire to impress these truths upon all wheat growers. By cutting your wheat from seven to ten days before it is ripe, the following beneficial results will flow : your straw will be heavier, brighter, more nutritive, and make food for your stock : while, to a certainty. your crop will e-cape injury from that tatal disease—the

We take time by the forelock to give this short notice; but shall in our next month's conversation, treat the subject more at large. Wheat intended for seed, should, we think not be cut before it may have ripened. This.

however, is an unsettled point. Had our advice been followed last year. we are confident that wheat growers would have been spared the loss of thousand of bushels of wheat, which they sustained through the rust, owing to their delaying cutting until the grain was ripe.

We will here add, that it would be consistent with enlightened economy, to barvest all descriptions of small grain, before they are fully tipe.

SOWED CORN. I wish to tell you, thousands of farmer readers, of one year's experience in growing corn for fodder. I sowed three bushels about the fifteenth of May last, on one acre of land, and notwithstanding the bad season with us last year, the produce was sufficient to keep three cows through the winter. Cattle prefer it, and there is far more nutument in it than in the best of hay. We cut it with a common corn cutter, bound it in small bundles, set it up in the field and let it remain about three weeks, it was perfectly cured, before we housed it. Care should be taken not to put too much of it in a body together, as it would heat and mould. - Farmers may make their own calculations about the extra labor in raising this crop, and after making deductions for it they will find the net profit to be nearly double what they can realize from the best acre of timothy or clover.

GOOD ADVICE. Look over the corn-field, and if there are many "hills" missing, -re-plant, If the DOCTOR YOURSELF
