MORE NEWS FOR THE SICK! CURE FOLLOWS CURE!! MORE PROOFS OF THE EFFICACY OF Celebrated Family Medicines.

COMPOUND SYRUP OF WILD CHERRY.

THE ORIGINAL AND ORNEINE PREPARATION.

It may be truly and that
no onehas ever been so successful in compounding a Medicine which
has done so much to releve the human
amily, to rob disease of its seriors, and restore

Wild Cherry, and as much of the name of the origi-nal preparation, as will screen from the lash of the

Bewars of suck Imposters, and putchase none but the original and only genutine article, as prepared by Dr. Swayne, which arosa from many years' close attention to the practice of the Profession, and which led to this great discovery.

Beware of Mistakes! Remember, the genutine is put up in square bottles, covered with a beautiful wrapper, (attellengraving.) with the portrait of Dr. Swaine thereon, also his signature; all others are positively "actitions and counterfeit,".

A FOICE PROM SCHUKYLILL COUNTY, PLEASE READ THIS INTRAORDINARY CUBE.
Dr. Swaine:—Dear Sir—About six years ago, 1

Dr. Swaine: Dear Sir-About six years ago. Hacovered that mylungs were affected, of which t be

change, and am very happy to albacribe mysen
[William Braumort.]

St. Clair, Schujkill county, Pa., Jan. 29,1949.

A PHYSICIAN'S TESTIMO MY—TESTIMONY IS
Now Reserved from all Quarters of the Gibbs.

Dr. J. H. Ellison, Frankfor. Xy, says.—I was induced, from a failure of the most potent expectorants resommended in our Materia Medica, in kome cases of Diseased Lungs, to try your preparation of Wild Cherry. It is sufficient to say that I was so much pleased with the result of that and subsequent trials, that I now prescribe it in preference to all other remedies. I have been engaged in active practice of twelve years, and this is the first Patent Medicine I we'r thought enough of to spress an opinion in writing.

HWAYNE'S CELEBRATED VERMITUGE,

Adults, and the most useful hamily Medicine ever offered to the public."

MORE GOOD NEWS FOR THE SICK.

Andersontown, indiana.

Dr. Swayne—Dear Sir;—A ann purchased a bottle of your Vermifage, the other day, for his-child; and by its use, discharged sixty-three of the largest worms he had ever seen. It is some what difficult to get the people to try it, as they have an often been guilfed by museous and worthless worm medicines. Yours being so pleasant to the taste at the same, time effectual, I shall be able to dispose of a large quantity.

Respectfulty yours,

Towayne's Vermifuge is now pur up in square bottles:

Swayne's Sugar Coated Sarseparilla and Extract.

EWAYNE.

Dr Swayne's Sugar Coated darasparilla and Extract
of Tar Pills.
We have tried the variou. Pills, which have been
so highly lauded through the public press, but there
are none which give such general satisfaction as Dr
Bwsyne's Sugar Coated Sarsasarilla and Tar Pills.—

the Alimentary Canal, acting as a gratic cathertic and alterative medicine, and are very valuable in complaints incident to females.

Attention is particularly called to his Coal Shovels. Orders for Shovels of any size or pattern promptly attended to S. SILLYMAN Port Carbon, July 27, 1849. Port Carbon, July 27, 1849.

BEAVER MEADOW IRON WORKS.
HUDSON & ALLEN IRON AND
Briase Founders, respectfully inform
their patrons, and the public generally,
that they are now prepared, at the above
establishment, to manufacture Steam Engines of every
size; Pumps, Railford and Drift Cars, and every other
description of Iron and Birase Castings suitable for the
Coal mining or other business, on the most reasonable
terms. Also, Blowing Cylinders for Blast Farnaces
and Machine work in general.

Repairing of all kinds done with neatness and despatch, at the lowest prices. All work furnished by
them will be warranted to perform well. They would
soliest the custom of those who may want articles in
their line in this vicinity. All orders will meet with
immediate and prompt attention

VOL. XXVII.

arre. Mr. Thompson's Wheat is of a variety which has been raised but a few years on the Island, and the yield proves it well adapted to the soil, &c. The agricultural capacities of Long Island are beginning to be developed "—Long Islands".

Setauket is about 8 miles from this land (Hermann-ville,) and isno better by nature than those lands now offered for sate. This wheat is a new variety, of a apperior kind, and was soid for seed wheat as \$5 per hushel, and Mr. Thompson received for the product of a little more than two acres, over \$400.

There have heen raised during the past season, the very heat of Corn, and Potatoes 130 byshels per acre, Egg Plants and a variety of garden vegetables, on land near the Long Island Railroad, at Lake Road, or Lakeland, where a Post Office has been established, for which premiums at the Suffolk County Agricultural Fair, held September \$24th, 1850, were given. Also pass, beans, onlong, squashes, pumpkins, beets and

tail Fair, held September 2th, 1850, were given. Also peas, beans, onlong, squashes, pumpkins, beets and tomatoes.

The following is from the New York Farmer and Meckawic of November 7th, 1850, and was written by Mr. Starr, the editor, who visited the lands. The wheat, pointnes, and crops, referred to in the article, were raised at Lakeand, near Hermanuville Station: "Having a few hours' leisure during the past weeg, we were conveyed over the long Island Raifroad, to a lurga tract of the country, about fifty miles from New York, which we find to be capable of very successful and profitable cultivation. Although late in the season, and viewed under some disadvantage, we were surprised at the quality and abundance of the crops which had been gathered from a pertion of the land, as also the wister crops, which appeared unusually promising. Wheat, which had been sown but two or three weeks, presented a beautifulthrifty appearance; while turnips, beets, and other vegetables not yet gathered for winter use, would compare advantageously with the best in the New York market. Potatoes, already in the cellar, were very fine, without a vestige of disense, and core standing in the field was not surpassed by much that we saw on lands valued at more han one hundred dollars per acre. Indeed, the vegetables which received the premium at the Suffolk Co. Fair, were raised from a portion of this ground, which had not been under cultivation six months. Altogether we were very fands from a portion of this ground, which had not heen under cultivation six months. Altogether we were very fands, now so favorably impressed with our visit to these lands, now so favorably offered to the public, at prices which cannot fail to double in a few years, and we would invite the attention of those who desire a cheap and eligible farm, to this location."

Hermannville Station is located on the borders of the Long Island Railroad, whence cars run severai ilmes a day to Brooklyn and New York. The surface of the land is smooth and level, and the surr

many years, been always considered a cash article on the Island.

There is material on the land for common fending—good cheanut rails can be had within a few miles of these lands to abundance. All building material can be had at the depote of Brooklyn and Greenport, and at many intermediate places, at the usual market prices. There are numerous atreams of water rising in these new lands, and running into the great South Eay, which are remarkable for their purity, and never fall—indeed, dry weather makes very little change in them, they are unfailing; and wells are of various depths—probably, over these new lands, in the middle region of the Island, the average depth will be about 25 feet; at Hermannville, as the ground is higher, they are deeper. Subscribers are not compelled to build.

about 25 feet; at Hermannville, as the ground is bigher, they are deeper. Bubscribers are not compelled to build.

There are now churches and schools within two or three miles of the village; and within four miles, miles, factories, atorsa, and villages. All the privileges of an old settled country are to be had here; and the people of Suffolk County pride themselves on being a highly moral, orderly, and religious people.—All of my subscribers are persons of respectability.

The land can be very easily cleared, and the cost of settlement will depend almost entirely upon the settler; he can lay out as much or little as he chooses. I do not know of any objections to the place or to the land for a settlement; and the same labor and industry which make successful and prosperous settlements in other parts of the country, bestowed upon these lands, cannot fail to produce favorable results.

The climate is in every particular healthy and pleasant—the roads are good, and always passeble-ast will seasons of the year—the winters are short and mild, compared to the winters on the main to the north of the highlands—there is a leidom sieighing more than wo or three weeks on the Island.

What is remarkable, a crop is seldom injured by drought—there is no part of the country where there is so little injury from when—there is no wet or cold and on the Island. All the land along the margin of the streams can be made highly valuable at a small cost, for there is no such thing as a flood or freshet as in the interior part of the country, by which often very great damage is done: such an event as the carrying of a bridge, or the breaking of a mill-dam, with great damage, is almost unheard of on Long Island. The streams and bays abound in the and wild-fowls of every variety.

The land is now being surveyed, and the lots and farms taked out, on at other every streams and have abound in the and wild fowls of every variety.

The land is now being surveyed, and the lots and farms staked out, so as to designate each lot and farm as isid down on the Naps, thereby saving subscribers from any expense for surveying. Persons wishing to avail themselves of the spiendid chance for a Homestead or Farm offered above, must apply soon. In consequence of the great number of letters from all parts of the country desiring information of these lands, it has been found necessary to answer them in this form.

this form.
S- Apply to CHARLES WOOD, Stationer, 117 John Exapply to CHARLES WOOD, Stationer, 187 John street, near Pearl, N. Y. who will receive remittances and forward receipts therefor by return of mail. He will also gratuitously furnish maps and pamphlets of the property, and cheerfully give such other information as may be desired.

CHARLES WOOD, 187 John street, N. Y.

I also desire to say that! have good Parming Lands of west of my village innot, which it well sell in 5 acre lots or upwards, at from \$20 to \$50 per acre. These lands are well situated for farming and gardening purposes, it yerly respect; and having the advantage and privilege-of a Railroad, when cleared and cultiwated, they will be equal to any land on the stand, and equal to that which, in the vicinity of all the old villages and settlements of Long laind, sells for \$50 to \$200 per acre. and settlements of Long Island, sells for \$50 to \$200 per acre,
in References as to the quality of the lands can be made to Hon. Henry Meigr and Gen. Chandler. of the Americah Institute. Rooms 351 Broadway, N. Y.; D. J. Brown, Esq. office of the American Agriculturist, 167 Water street, N. Y.; D. E. P. Peck, 266 State-si. Brooklyn; Alden J. Spooner, 3 Front-street, Brook. the Borough of Pottsville, hereby gives notice, that he intends carrying on the business himself at Mr. Lecke's old stand, where he is prepared to furnish all the articles in his line of business, at the very lowest rates, and respectfully solicits the patronage of the public, feeling confident that they will find it to their interest to drai with him

B

action will be found to be immediate and effectual; whilst in everycase it will bring almost instantaneous relief, and if persevered in, will affect a certain cure. Children from their birth, and adults of any age, can rely upon these results. Colds long neglected, or becoming violent through constant exposure, threatening injury to the lungs, and consequently consumption, will be arrested before such a fatal crists will have been reached. Indeed cases have been known, and are certified to, where it has been ascertained that a pulmonary affection existed which this medicine relieved with all the decided evidences of a radical, entire cure. cal, entire cure.

This preparation is equally efficacious for Asthma, hourseness, and bronchitis. Aged persons, particularly, are much subject to the first of those diseases; whilst public speakers, when afflicted with the latter, will be sure to be relieved from these two painful annovances.

will be sure to be relieved from these two painful annoyances.

The above statements are made in full view of their importance and weight; their faithfulness will be proven on a fair trial of the specific; and relief to the sufferer be the certain consequence. For further proof of the effacty of this remedy, the proprietor respectfully refers to the following certificates of some of the first Physicians in Pottsville:

CERTIFICATES.—I deem it a duly I owe to the community, to strongly recommend "Hugines" Expectorant." assan effectual remedy in colds, incipient broughts, inflamation of the lange, and all analogous diseases. Having prescribed this remedy, and traced its effects upon the patient, I can safely recommend it assuperior to any distinct combination now before the its effects upon the patient, I can safely recommend it assuperior to any distinct combination new before the public.

P. GOULD, M. D.
Pottaville, 1848.

J. C. C. Hughes having made known to me the component materials of a preparations made by him, called "Hughes" Expectorant," I am induced to recommend it as a medicine that would prove beneficial in the various diseases for which he directs it to be given.

J. SINNICKSON, M. D.

Having examined the components forming "Hughes' Expectorant," I have no hesitation in recommending t as, I believe it to be, an excellent remedy in certain conditions of pulmonary diseases. as, i believe in the particular diseases.

Poetrn. "MARY."

BY CHARLES SWAIN The graceful and the beautiful,
The gentle, kind, and airy,
Together met to mould the form
And gift the mind of Mary. There's nature in each careloss curt.
In every grace a morat;
Her mouth—'tis Cupid's mouth—sweet girl.
And full of pearls and coral. She's like the key-stone to an arch Which sheds a joy on duty! All happy thoughts and feelings rife Seem evermore to guide her; The very ills and cares of tife Each sweet expressive glance appears
Of. Nature's best selection;
It took the world six thousand years To perfect such perfection!
All gitts divine that could combine. gitts giving that could comment.
All charms of nymph or fairy,

and to grace one bounteous face, Agreed to grace one bounteous fac And witch the world with Mary She speeds as if with wings so fleet. No bird's could e'er surpass them, Yet none can ever spy her feet,
Though 'tis believed she has them.'
She lends a spell to every scene,
Her step makes winter vernal;
A something half divine, between
The earthly and eternal!

Family Reading.

THE LAW OF PROGRESS. "The earth moves," said Galileo. And he was imprisoned for saying it. Yet the earth swept around the sun for ages before his birth, as it has for ages since. his death. only the earth moves, but also its inhabitants are moving ever onward. It was in 1710 that Galileo first—taught the Copernican system, but it was not until 1721, that John also to attend. Zachary had succeeded to It children system, but it was not until 1721, that John Vito, of Naples, announced the law of hu-man progress. But it was not then received-nor was it in the ages that had gone before, Mohegan and Hartford, and the old chief was nor is it scarcely now, though centuries have since passed. Men have so long looked back-ward for a golden age, have so long been ac-Address.

OUR COMMON JOYS. BY C. D. STUART.

Our common joys, O, what are they?
The brightest and the best,
They glad us in our busy walks,
Are with us when we rest,
An angel band, they hover 'round
In waking and in dream,
And o'er our hearts, in saddest hours,
They shed a golden beam.

Our common joys, O, what are they.
But blessings felt within,
For smallest deeds of goodness done.

The mite we give the child of want,
The slightest word of cheer
That lifts a heart with sorrow bowed,

Our common joys, O, what are they?
The priceless pearls and gold,
Which memory sifts upon the heart
When life is growing old;
The thought that we have treasured up

Amid a world of sin

Or dries a falling tear.

BY JOSIAH HOLBROOK A square is the "measuring unit." The early became friends of the English. Their amount of all surface is determined by square favorite ground was on the banks of the river, (now the Thames,) between New Lonnings, furlongs, rods, yards, feet, inches, or don and Norwigh. A small resource of the same of the s don and Norwich. A small remnant of the Mohegans still exist, and they are scarcely what the shape of a quantity of land, boards, protected in the possession and enjoyment of their favorue domain on the banks of the amount of surface is always ascertained and Thames. The government of this tribe had expressed by the number of squares and parts become hereditary in the family of the cele-brated chief Uncas. During the time of my father's mercantile prosperity he had em-ployed several Indians of this tribe in hunting animals, whose skins were valuable for be understood most familiarly by every pertheir fur. Among these hunters was one son. No one thing, probably, is at once so named Zachary, of the royal race, an excelumportant and so little understood as the lent hunter, but as drunken and worthless figure with four equal sides and angles.— an Indian as ever lived. When he had some Very many of the most intelligent members what passed the age of fifty, several mem- of society have no clear apprehension of the bers of the royal family who stood between difference between six miles square and six Zachary and the throne of his tribe, died, and square miles. A person of much intelligence he found himself with only one life between contended a few days ago that in the District him and the empire. In this moment his of Columbia, in its original dimensions, there better genius resumed its sway, and he re- were only ten square miles, and could not be flected seriously. "How can such a drunken | convinced of his error until shown it by a checker-board. Not long since a painter of honorable race? What will my people say? some twenty years' experience named a price —and how will the shades of my noble an-cestors look down indignant upon such a base what would be the price for sheets of double successor? Can I succeed to the great I'n- the length and breadth, replied double the cas? I will drink no more! He solemnly price; offering, of course, to do four times resolved never again to taste any drink but water, and kept his resolution. I had heard this story, and did not entirely without number, of intelligent, experienced believe it; for young as I was, I already business men making blunders, attended with far greater inconvenience and less than worktruth of the great mathematician's assertion, and it has taken it longer to learn that not only the earth moves, but also its inhabitants are moving ever onward. It was in 1710 that Galileo first—taught the Copernican If children should occupy the first hour the rule of his tribe. My father's house was ever spent in a school-room by drawing upon their slates a square with its different divi-

Mohegan and Hartford, and the old chief was sions, they might have proof positive that in in the habit of coming a few days before the an inch square are four half-inch squares; election, and dining with his brother Gover-nor. One day the mischievous thought dred square miles. They would also come

Nothing degrades man to a brute more than a mean, avaricious and arrogant dispofected; they looked at each other, at me, and fected; they looked at each other, at me, and at the venerable Indian, with deep feelings of awe and respect. They afterwards trequently reminded me of the scene, and charged me never to forget it. Zachary lived to me never to forget it. Zachary lived to me never to forget it. Sacradly bent his pass the age of 80, and sacredly kept his resolution. He lies buried in the royal burial place of his tribe, near the beautiful falls boy about six years of age, will serve to ex-plain most forcibly what we mean, and show also that even a child is capable of noble actions. In a country school, while the boys were attending to their lessons, one mischievous chap, who was proverbial for his restlessness, among his other capers, upset a heavy pine board seat, falling on the large toe of one of his youngest companions, crushing it very badly. The teacher, after examining the injury, said to the wounded boy, "George, shall I whip him?"
"No sir," responded the truly noble, yet

NAPOLEAN'S COAT OF MAIL. Just before Napolean set out for Belgium he sent for the eleverest artisan of his class by a breeze, with scarce enough of sub- foot with mud, he was asked where he had in Persia; and demanded of him whether he stance to catch the hues of a sunbeam; and been that he got so thoroughly bedaubed.— would engage to make a coat of mail to be worn under the ordinary dress, which should boring swamp after elm bark, of which he be absolutely bullet-proof: and that, if so, he might name his own price for such a work. The man engaged to make the desired object, if allowed proper time, and he named eighteen thousand france as the price of it. The bargain was concluded, and in due time the work was produced, and the artisan on the tops of trees.

"No, but sometimes you may find it at the bottom, though. I'll tell you how I found it. I cut the bark near the root of the tree, and "put it on." The man did so. "As I am. then stripped it upwards, expecting it would to stake my life on its efficacy, you will, I come to an end and break off, and run itself suppose, have no objection to do the same." A circumstance soon occurred which bro't us nearer to each other, and cemented our attachment. Just at dusk, and before the candles were brought in, the servant ushered two of Alice's female friends into the room, and it was soon resolved that we should have a game at forfeits, whilst my sister was appointed dispenser of the penalties. At the penalties. At the cand of the game, therefore, she was blinded at least to save ever the property of the game, therefore, she was blinded at least to save ever the penalties. At the lad done—that was the point to be decided. pointed dispenser of the penalties. At the end of the game, therefore, she was blinder folded, and began to name the punishment which each one was to receive before the forfeits could be reclaimed. Now, I had made several blunders in the game, and had made several blunders in the game, and had thought I there's more wave than one to be the price of it?" Eighteen thousand several forfeits to pay; and it so happened thought I, there's more ways than one to to be the price of it?" Eighteen thousand that most of my penalties were connected in skin a cat, as the butcher would say. If I frames were named as the agreed sum. to be the price of it?" Eighteen thousand that most of my penalties were connected in some way with Alice. Once I had to take her hand, and dance with her three times it. I seized hold the strip, and placing my sum, for the fright I have given you."

An eminent chemist of Munich has recently discovered a method of obtaining gas from the fibres of plants; especially of wood, which may be made use of for practical purposes with, great economy and advantage. The Railroad Depot at Munich has been for some time successfully lighted with this gas. So much confidence was felt by the discoverer in its practicability, that in connection with four other scientific men, he undertook to prepare the apparatus at the depot at his wn expense. The first attempt met with many obstacles, but the final result confirmed the hopes of the projectors. It is stated by competent judges, who have inspected the operation, that no doubt remains in their ninds of its speedy introduction to general
