New York Democratic Whig Platform. The committees of the different wings of the Whig Party of New York have united upon the following platform of Principles, with regard to the leading questions of the day. They will meet the approbation of nine-tenths of the people of the U. States. It is the broad doctrine of the Constitution, which, while it proclaims it to be the duty of every citizen to adhere to and support the laws of the land, it does not gag the people, but preserves to their the inestimable right of speech, a right guaranteed to them right of speech, a right guaranteed to them

"Believing that an expression of the views and principles of the Whigs of this State, as they are understood by us, in relation particularly to ques-tions which now agitate the country, should be made in order to induce an intelligent, honest, and made in order to induce an intelligent, honest, and cordial co-operation among ourselves and with the Whigs of the other States of the Union, the State committees appointed at the respective conventions held in 1850 at Syracuse and at Utica, and the committee appointed by the Whigs of the Legislature at its recent session, have agreed upon the following as presenting what they believe to be the sentiments of the great body of the Whigs of the State of New York:

An economical administration of the Governmen The strict accountability of public officers, and their rigid adherence to the limitations of power prescribed by the Constitution and the laws; an honrigid adherence to the aliminations of power prescribed by the Constitution and the laws; an horiest and faithful performance of all obligations made with foreign nations, with a crupulous regard for their rights, and a firm and steady defence of our own. The improvement of the apportant rivers and harbors of the country, so as to render them navigable and accessible, by prudient and systematic appropriations, founded upon examinations made by competent and disinterested public officers. Such a discrimination in the duties necessarily laid upon imports for the support of Government as shall secure to the industry of our countrymen a just remuneration, and shall symulate the chanical and manufacturing enterprise, and thus provide a home consumption for the products of agriculture which may control and counterfact the unsteady demands of foreign markets, and as shall promote that
