A. L. RUSSEL

Sec'y or the Commonwealth.

BY THE GOVERNOR.

The Pennsulvanian, some days ago, de nouncing those of the party who were in-, strumental in Judge Campbell's defeat, concludes us article with this significant extract in this county:

"I fear much we have lost Indge Campbell If so, I am ready to be averaged upon those who did this deed. Campbell was worth more to us politically in the last campaign, than we can ever repay." In the Pennsylvanian's desire to compliment Campbell, it fairly "lets the cat out' as to the cause of the party's success in this County. Why was Campbell such an important man on their ticket here? It was certainly not for any pre-eminent abilities he possessed—nor for any special claims he had upon the suffrages of the people of Schuylkill. So far as competency was concerned, viz: Pennsylvania, New Jersey, New York, he was obviously the weakest man on the Massachusetts, Rhode Island, New Hampticket -that was charged against him from shire and Connecticut, leaving Six others all quarters, and his personal popularity could not have effected much for him here. could not have effected much for him here, well adapted to that species of labor as those since he was almost entirely unknown in the

nizant of the manœuvers of our opponents, and their unscrappulous hesitation in the use off these influences, we charged them with it, without tear of contradiction. The admission of the Pennsylvanian's Democratic correspondent above confirms this view and amply explains the cause of our unexpected defeat in this County. The existence of such powerful causes in our midst should open the eyes of every citizen to the necessity of guarding against their ascendant tendencies. They are dangerous in the extreme, and in the hands of designing and unprincipled to the mangerous in the extreme, and in the hands of designing and unprincipled. the hands of designing and unprincipled to make the butter come." men, may be made the bitterest curse of our

Cards are played and dealt circularly from left to right, according to the apparent course of the sun, and when arranged into tricks they amount to thirteen, consisting of four suits each; and if each card be considered as representing a week, then these tricks may be considered as symbolical of the thirteen lunar months of which the year consists.
