MINERS' JOURNAL.

SATURDAY JANUARY 10, 1852. ANTHRACITE COAL TRADE FOR 1851. We present our readers this morning with the statistics of the Anthracite Coal Trade of Pennsylvania, for the year 1851, which have been collected and arranged from official sources. The whole supply sent to market during the year, was 4,383,730 tons, being an increase of 1,026,831 tons over the supply of the year 1850. Of the quantity mined, Schuylkill furnished 2,184,240 tons, being nearly one-half, and exhibits an increase of 472,233 tons over the supply of last year. It is true that a portion of this increase properly belongs to the previous year, when the supply was cut short by the great freshets; but even after deducting that portion, the increased demand far exceeds the expectations of the most sanguine, engaged in the trade. In 1847, an increase of 638,000 tons completely over-stocked and glutted the market, paralizing the whole Coal trade of the country-now, we learn that the supply in all the markets abroad is light, and in New York, the Delaware and

price of their Coal 50 cents per ton. are not in a flourishing condition—many of supply of last year: the factories have been standing idle a portion of the time, and others have been kept Canal in motion at a loss, merely to keep their forces together, awaiting better times. This Lghigh, is evident from the state of the Coal trade, Lackawana, D.& H.C. C. which, if the following statement, which we take from the Philadelphia Commercial List, Wilkesbarre, 13 correct, exhibits a decline in the impor-tation of both the domestic and foreign article for the last year, at that port : Table of the importations of Coal at Boston, for

the last seven years : Anthracite. Eng. & Scot. Provin's. Virginia.
Tons. Chald's. Chald's. Chald's.
354,306 5,002 30,422 2,174 30,422 41,409 32,500 42,290 1850 1849 1848 1847 1846 396,169 263,860 269,143 11.331 22,218

No other cause but the depression of the manufacture of Iron in the East, can this decrease in the aupply be attributed to, because the low prices of last year, and the increased population would naturally increase the con-

amption. The great increase, however, is to be atway again last year, at low wages; and to to market in this cause may be attributed an increased 1821 was only consumption of at least 250,000 tons. The 1831 increase, principally from this cause, on the 1841 line between this region and Philadelphia is over one hundred thousand tons. To Ocean TEN MILLION TONS PER ANNUM. Steam Navigation and the Coasting trade; may be attributed an increase of 250,000 ions. To low prices of Coal, 150,000-and the balance to the great increase of machinery, the extension of Railroads, on which it can be transported to the interior; the rapid increase of population, and the high price the trade for 1850 for comparison: and growing scarcity of wood, all combined, have produced the extraordinary demand for Beaver Meadow Co., Coal last year. Mr. Haswell, U. S. Engi- Spring Mountain,

neer, gives a list of 78 Ocean Steamers, 46 | Coalrain Coal, of which commenced using Coal in 1851. There is another source of rapid increase Sugar Loaf Coal, the consumption of Coal, which must soon Buck Mountain Co., take place. We allude to its use in Loco- Wilkesbarre Coal, motives. So far, but few use it as a fuel. The growing scarcity of wood has, however, forced the subject on the attention of Railroad Companies, and ingenuity and science. have already removed many of the obstacles quired for their use will almost, if not quite, quantity named. equal that consumed by the Ocean Steamers. When we glance back to the commencesent time, it exhibits a very rapid increase: 1,073,tons. 176,820 " 958,899 " a 1821 we sent to market

4,383,730 And in 1861 it will increase to TEN MIL-LION TONS! And even then, the trade will be in its infancy compared to that of England and Wales, where the consumption in a single year, is equal to the whole aggregate quantity mined and sent to market in Mine Hill & Schuyl-Pennsylvania from the commencement of the Schuylkill Valley do Mill Creek do Mount Carbon do The great advantages of the Coal Trade to Mr. & Pt. Carbon do Mr. & Pt. & Carbon do Mr. &

the Country and its future importance, are Little Schuylkill do 310,307
so ablyset forth in the Collegia and the Country and its future importance, are Swatara Road (not of.) 32,735 so ably set forth in the following article, from the Commercial List, that we append it: if Pennsylvania, with her inexhaustable Coal fields of as good and pure Coal as exists on the of the Atlantic states for fuel? And from whence would they derive their supply? It is from her manes that the whole of our extended Atlantic seasons with the reserve their supply? It is from her Mills (Teek and Schuvlkill Valley Mills (Teek and Schuvlkill Valley) maes that the whole of our extended Atlantic sea-board, and the great lakes must soon derive their supplies of Anthracite. It is this Coal which will soon supercede all other descriptions of fuel for tenerating STEAM, for propelling the machinery used in various kinds of manufactures, for manu-lecturing Pig Iron, navigating our rivers, lakes and be ocean, for propelling locomotives on our various tocean, for propelling locomotives on our various drapidly increasing railroads, and for other uses

Pennylvania contains an area of 46,000 square Pennylvania contains an area of 46,000 square miles, or also non-third part of the state, is Coallands, principally lying above or near the water tevel. Engand, Scotland, Wales and Ireland combined, actuding to the best authorities, contain only 11,000 square miles of Coal, in an area of 120,000 square mass of territory. This Coal in many cases her firm 900 to 1800 feet below the surface of the ground that is raised by machinery. In relation to the with 1900 for the before the stringer of the ground the is raised by machinery. In relation to the sainty of Iron ore, nearly the same relative promisions exist between Great Britain and Pennsyllar. It will thus be seen that in these articles the first necessity, and indispensible to a state of filization, our state possesses three times as much all Great Britain. Without Iron we should soon we into a state of barbarism, and withou

wily increased prices.

If our government had afforded adequate protects to the manufacturers of Iron, at least vix hundlihousand tons, of Coal would have been reand, to have kept the Authracite Furnaces and faing Mills in operation. It is well known and treeded, that the reason why GREAT BRITAIN a spin, weave and manufacture all the staple arswid commerce cheaper than any other country,
samily owing to the abundant supply of Coat,
which comprise at which, with its, and, they can
lidace Pig. Iron; the basis from which every
an in mechanics is converted, from a fish-hook,
which is to the compression of the country of the coun riage; from a sword, to a cannon; and from a

of heaven. "It rows, it pumps, it excavates, it lifts, it carries, it draies, it hatemers, it spins, it weaves, it prints." In the machine shiop and the factory, on the river, the ocean and the railroad, it is steam that now performs the labor, that overcomes resistance and vanquishes space. The asgacious president of the British Statistical society says: "But for our command of Fuel the invention of Watts and Arkwright would have been of small account; our Iron mines must have long since ceased to be worked, and nearly every important branch of manufactures must have been rendered impracticable."

Now let us take a retrospective view of our own Now let us take a retrospective view of our own country, only forly iyears ago, and we should in vain discover the spiendid steamboats which now give life to the Delaware, the Hudson and other rivers and the takes; not any of the twelve hundred steamers navigating the mighty Mississippi and its tributaries. And those floating palaces which walk the trackless ocean like a thing of life, were not even thought of, or considered within the bounds of probability. Yet all conquering strand has brought us within tendays of Europe, although separated from it by an ocean 3000 miles in width. Every new steamboat that is butt requires from for its engines and machinery, and sometimes for its hull, as well as Coal to propel it. It is computed that the consumption of Coal in steamers navigating the ocean alone, in 1851 was at least 120,000 tons.

ting the organ arous, at time.

If we have made such progress on the water, by the nid of steam, what have we accomplished on the land? Within the last 22 years there has been constructed in the United States, 12,000 miles of Raitroads, on all of which steam is the moving power, the labulous "seven league boots," to over-

Recent developements have fully established the fact that the main body of Anthracite Coal in the State, lies in Schuylkill county. If, therefore, our transporting companies will only continue to maintain low rates of tolls and transportation, the spirit of 00 enterprise abroad will develope our resources to such an extent, and will build up a trade here of such magnitude, that it will tax all o the energies of the manuser panies to provide facilities to transport it is panies to provide facilities to transport it is market, while at the same time it will render market, while at the same time it will render to be a same time time it will render to be a same time it will render to be a same time it will render to be a same time it will render to be a sa on whom they rely for their trade.

ANTHRACITE COAL TRADE OF THE

UNITED STATES FOR 1851. The following are the official returns of Hudson Company have already advanced the the Anthracite Coal Trade of the United States, received from the different regions, In the East, the manufacturing interests which we publish in comparison with the

of so much importance to the taxpayers of the County in having a proper and uniform Tri-annual Assessment, it is hoped that good and efficient men wil ed.
By Order of the Commissioners,
D. KREB3, Clerk.

ADJOURNED COURT. tinue two weeks.

Therefore, all persons having suits pending, and all persons whose duty it shall be to appear at said Court, will take notice and govern themselves accordingly.

CHRISTIAN M. STRAUB, Sheriff. Sheriff's Office, Polisville, }

THE WORLD'S FAIR.

COLD MEDAL awarded to ELI TRAPP, for his Circ Essence of Coffee." It is now satisfactorily decided that Trapp's Essence of Coffee is the best and most wholesome preparation for Coffee in the world. We therefore, recommend it to all lovers of good Coffee. We therefore, recommend it to all lovers of good Cof-fee, as an article of great value.

The price is only 12; cents per package, which, with one pound of Coffee will go as far as five pounds of ordinary Coffee alone. Storekeepers and all others that may purchase it are assured that if it does not give entire satisfaction it may be returned. Manufac-tured by

ELI TRAPP.
