news from the Pacific continue cheering, it may even exceed that number.

We believe in California, and always did. Our judgment was early made up, and 'proclaimed that its product of gold would exceed that of any other country known in history. We believe it has, in the main, a good climate, and an abundance of fruitful soil, though it has probably more that is rugged and impracticable. And we do not doubt that, for those who go well prepared, and provided, there are as good chances now as there ever were. Yet the rage of the fever, at more than a speedily as possible, in order to secure supplies.

Many will do well , but washing must naturally grow less fruitful and less precarious. Quartz mining, or rock-crushing, seems to be generally doing very well: but there will hardly be one set of adequate machinery in the gold region this summer to every thousand gold-seekers .-How are all the rest to be employed?

We do not doubt the luck of a strong, wil-ling, two-handed man, who knows how to chop, team, plow, dig, blast, &c., and can do three or four of them well. A first-rate blacksmith, sawyer, carpenter or builder, who can turn his hand readily to something else where his own trade happens to be glutted, will be apt to get along.
