ture of the Governor to become a law. The only provisions from the original Supplement. we learn, are, that the capital shall be three instead of five hundred thousand, and no divilend can be declared until the Road is com-

pleted. On Wednesday, in the House, on motion to discharge the Committee on Vice and Immorality from further consideration of the Liquor Bill, and refer it to a special Committee of five, an amendment was offered, instructing the Committee to report the Bill on Monday next; when a violent discussion ensued. It was afterward moved to postpone the whole matter for the present, and carried by a vote of 45 to 38.

On Thursday, in the Senate, the bill to incorporate the village of Port Carbon, Schuylkill county, was taken up and passed Committee of the Whole. A bill is now before the Legislature, which

s intended to punish trespasses upon property, having particular reference to fruit-stealng, &c. We hope it may become a law. The bill repealing the sixth section of the act of 1847, forbidding the use of the jails of the Commonwealth for the detention of fugitive slaves, was passed in the Senate on Thursday. It is the same as that passed last session, and which was such a bone of contention in the Gubernatorial campaign. Judging from the symptoms manifested within a few days in the Senate, the Maine

Law will have a hearing before that body,

tal at Portland, Maine, was ordered to be en- or grossed. The Railroad and other bills, engrossed on Wednesday, were passed on Thursday. The Non-intervention question was then taken" up and, after several speeches, was postponed till next Monday. We should not be surprised if these scores of Buncombe speeches,

on this subject, were followed by some mountain-like travail. The House was principally occupied on Thursday, in discussing the comparative merits of the several Democratic leaders, for

the Presidency.

FROM EUROPE. The Niagara arrived at Halifax on Wednesday morning last-she brings Livernool and London dates to the 6th. - The re-election of the new Ministers, whose seats had become vacant in the House of Commons, was going forward. The speeches of the gentlemen returned were very cautious as to free trade, throwing the consideration of the question overboard for the present, and looking to the results of the next general election as a justification for interfering, with the com-

mercial policy of the late Sir Robert Peel. A serious riot had taken place at Bristol, in consequence of the factory hands of the Great Western Cotton Works refusing to go through a contracted doorway which had been erected by one of the managers, in order to prevent the girls, who numbered some hundreds, from carrying off cotton waste for the purpose of destroying it. Five engines were sent for, and they poured an immense stream upon the mob, who, becoming exasperated, returned the attack with ed all the windows of the factory. Several parties were seriously injured. The magistrates subsequently investigated the case, and fined the manager five pounds for his illegal conduct on the occasion.

Cotton was in active demand, but bread-

stuffs, generally, had declined. Messrs. Carmichael & Brett have contracted with the Belgian Government for the formation of a submarine telegraph between Belgium and England. They are to have a nonopoly of ten years, and the governments are to have priority of all messages.

THE HISTORY OF COTTON.

An interesting paper has been read by W. Dudley, before the Historical Society of New York, upon Cotton and Cotton Manufactures, by which it appears that \$1,500,000,000 is invested in the culture of cotton at the present time. The official declared value of raw cotton exported from the United States, from 1790 to 1851, inclusive, amounted to \$711,691,676. The amount of money invested in the cotton manufacture, in the United States, in 1850, was \$74,501,031.

The total declared value of the exports of of manufactures of cotton, from 1826 to 1851, inclusive, amounts to \$77,887,553.

To Slator and Whitney we are much indebted-to the former for the introduction of Arkwright's machinery with improvements, and to the latter for the saw-gip. Mr. John Colt, of Patterson, was the first to apply cotton to the manufacture of sail-cloth. With regard to the trade in New York State, the first factory was built by Dr. Capron in Onedia county, about the year 1809, and shortly af-

terwards others, sprung up in Hudson, Co- |c lumbia and other counties.

Mr. Dudley spoke of the establishment of mills immediately after the close of the last war with Great Britain, in Massachusetts, by Lowell & Jackson. These were the first mills of any consequence, and they were established at a time when the commerce and trade of the United States were arrivable. Believed the time of the Linited States were arrivabled and trade of the United States were arrivabled and trade of the United States were arrivabled and tetail. lumbia and other counties. and trade of the United States were crippled and irtail. by her contest with England. BREWSTER'S CHOLERA MIXTURE.

For the care of Chalera Morbus, Diarrhoa, Bowel Complaints, Cholic, Griging Pains, or Sick Stomach, and Asiatic Cholera.

THIS Mixture has been used and recommended by physicians and others as a standard oredicine, and has been successfully leated in numerous violent cases of Cholera Morbus, Diarrhoa, Cholic, &c., and will not fail'to care in one case in ten, if administered according to directions, on the first attack. It is just what every family, vessel, steamboat harge, and traveller should always keep on hand to guard against sudden attack, as the Cholera Morbus is most likely to attack its subject in the night, and the sooner the remedy is applied the better. Asialic (tholera is, in most cases, preceded by Diarrhoa, and Griping Pains in the bowels; and, doubtless, one great reason why so many persons die of Cholera is, the want of proper remedies administered in the first stage of the disease, or the delay in procuring a physician before the patient is past cure.

Reference can be given to hundreds of the most respectable persons, as well as to physicians who have used it, and witnessed its effects in coring the

ry own family and recommended it to others, in al uses with the same results. Proma knowledge of a contents, I should not hesitate to recommend it as safe and efficient medicine in all cases of a lik lature. LEONARD LAWRENCE, M. D. Cedarville, N. J., July, 1848.
