long, cherished hopes of established managers who conceived their only province to be that of command and conquest. The secret murmurings and misgivings which are now glossed over by hypocritical exteriors, will find vent in the Baltimore Convention, and exhibit the fullness of that personal rancor, which discretion has hitherto partially concealed."

THE TARIFF ... MORE RASCALITY. The Locotoco press of the County is trying to prejudice the people against the Whigs for the position they have assumed in relation to a most netarious Tariff Bill, now concocting before Congress. The Emporium, of Thursday, harped in the party strain. For the benefit of our readers, and the public generally, we present an analysis object of the proposed expedition to Japan, un- not make any engagements for Coal until after they of this Bill, and we are sure every honest, der command of Commodore Perry, now fit have had time to close up their year's business, true-heatted Pennsylvanian, will, at once, ting out-some supposing that it is to be an which ends on the first of April. At present they Fine Hand-saws, cry out against it :- In brief, it argoposes to invasion of the government, for the purpose of ply immediate wants, even if the coal were offerreduce the duty on the coarser articles of forcibly opening its ports to a commercial in- ed at half prices; and it is worse than folly for Cotton manufacture, but adds 10 per cent. to tercourse with this and other countries.--- the trade to endeavor to force rales, particularly the finer qualities of Cotton and Wool. Then, The object, however, is a hydrographical when such a policy has a tendency to reduce prices in order to secure the votes of the South and survey, of the coast of Japan and the East below a fair rate. Four weeks hence the market West, where the predominant interest is the building of Railroads, it is proposed to increase before attempted by this government. For therefore, had better remain comparatively idle to the daty 10 per cent., on all imported Iron, this purpose three vessels are only to be add-the trade and reduce the rates, which, if forced mitted free, for 5 years.

Every one sees that this is a death-blow to Pennsylvania and other Iron-producing to open at least one of its ports for the pure business States. The bulk of the Iron-business is now, pose of friendly commercial relations. directly or indirectly, for Railroad purposes ; and if that be destroyed by the admission of a foreign article, duty free, the increased tariff on other Iron manufactures will be of little consequence, when hardly a Rollingmill will be left in the country. The injustice of such a measure is grossly obvious--its introduction before Congress was, purposely, to place the Whigs in a false position, before the people. The Whigs are for a Protective Tariff-this is not Protection -the present Free Trade Law is far preferable. This insult to Pennsylvania's interests comes of the truckling, despicable course of our Locofoco politicians. We will resume this subject next week.

WHAT AN ENGINE WILL CARRY In an ably written article, in the American Railroad Journal, on the comparative merits of Railways and Canals, the cost of transporting a ton of treight, on a railroad, says the writer, depends upon a variety of circumstances. It will be at a minimum when the engines are working with a maximum load, when the load consists of goods packed in bales or boxes of a convenient size and weight to be moved and packed with the least labor, when fuel is cheap and water good, ings. and numerous other and smaller circumstances favorà ble. This condition of things existing, it is manifest the cost of transporting that Free-Trade principles are below par The freight which a 20 ton engine will carry on different grades will be as follows: On a level, 359 tops. Ascent 20 feet per mile, 185.4 " · 30 144.7 " 45 107.16 \*\* 48 101-64 ... 98.22 \*\* 60 83.7 " very slowly. -65 77.7 .. 74.42 \*\* 68.55 ....
