The New York Correspondent of the Philadelphia Ledger, under date of April 7th, 1852, writes as follows:

"The Ship building is not very brisk, a present, nor so active indeed, as it was last December, which is ordinarily the dullest season of the year. The several yards on the East River have about the average amount of business on hand, but those on the North River, at Williamsburg and at Hoboken, have but little to do."

This is nothing singular-it is the natural effect of our governmental policy. The Commerce of a country is just in proportion to its productions. If we diminish our manufactures and domestic productions, and depend on foreign countries for a supply. just in the same proportion will Commerce be diminished. Trade must be reciprocal, and a Nation must be a producing Nation to keep up Commerce. No nation can increase its Commerce abroad, while it diminishes its productions at home. THE wonder of the age, nature's own productions.

These Paints differ from all others in the market; they are not clays; they require little Oil, flow easily, and cover with a heavier body than white lead. They neither crack nor peel, and dry readily, making an Enamel of Stone.

COLORS.—We have seven different colors, viz:—three Browns, two Chocolates, Black and Yellow, and by combination make every variety and shade of color. BODY.—These Paints are superior in body (or covering property) to any yet discovered, and pound for pound will cover double the surface of white lead, zinc, or other metallic Paints.

IRON.—To Iron they furnish a perfect protection against rust, for they contain no metal, which like white lead acts destructively on the iron; in fact this Paint makes iron doubly valuable for building purposes.
