NORMAL SCHOOLS. Mr. Jewell writes us another excellent ar-

ticle in to-day's Journal, on this subject .-The more we see of this discussion, the To Richmond, 1,50 ToPhiladelphia, 1,50 more firmly are we persuaded of the correctness of the original plan we suggested some weeks since, that of establishing institutions for Normal instruction in the several Congressional Districts, in opposition to the plan of endowing one or even two central State institutions.

Let it be an optional matter with each District, whether or no it will have a Normal School. If the inhabitants make themselves responsible for a certain amount of money, say \$1500, for the support of such an institution, then let it be obligatory on the MILLION TO RUMINATE UPON State to appropriate an equal sum for its im-MILLION TO RUMINATE UPON.

This is the title of a new semi-monthly Paper we propose to start shortly. Its object will be the advocacy of the Maine Liquor Law and other Reforms of the day—to discuss them in a plain, popular way—to bring them home to the mass of the people, and render them as "familiar as household words."

Reforct is but the normal name for Progress. The universal spread of knowledge and the march of mind, all-powerful and comprehensive, daily develope new sources of thought and fresh subjects for investigation, and he who would keep pake with the progress of the age, must study the philosophy of its daily changes.

The new power the leavest and works and the start of the second of the secon mediate establishment. Many of the Districts would hold off for a time, and, perhaps, comparatively very few would accept the proposition at once, so that the system would go into effect gradually-an important item in the economy of the State finanthe age, must study the philosophy of its daily changes.

The new paper, the better to accomplish the higher mission to which it adecorated, will be neutratin politics and except to record the current news of the people on the various abbjects it professes to discuss.

We believe that this plan would give much more general satisfaction—those who wanted Normal Schools could have them, and those who did not, would likewise be and those who did not, would likewise be and those who did not, would he far more eco.

The new paper, the better to accomplish the higher mission to which it adecorated, will be neutratin politics and except to record the current news of the people on the various abbjects it professes to discuss. It will not claim to be a news-paper. The cause of dams John Adams Miss M Brathrick John nomical, and, in the end, we have no shadow of a doubt, from all the information we can
