kept you?"

"come you and hold it and I'll kill the critter in a siffy." Jonathan seized the bear's paws and held the animal while the other could kill it.

## THE LEARNED ELEPHANT.

The Learned Elephant.

"That's a werry knowin' hannimal of yours," said a cockney gentleman to the keeper of an elephant. "Very," was the cool rejoinder. "He performs strange tricks and hantics, does he?" inquired the cockney eyeing the animal through his glass. "Surprising," retorted the keeper, "we've learned him to put money in that boxyou see up there. Try him with a crown." The cockney handed him a crown piece, and sure enough he took it in his trunk, and placed it in a box, high out of reach. "Well, that is werry hextraordinary—hastonishing, truly," said the green une. "Now let's see him take it took are the correct of the said and the correct of the force is only applied during a small part of the revolution, or in the form of interrupted pushes, yet the motion goes on steadily, because the turning grindstone, or wheel, or lathe, merely becomes and hantics, does he?" inquired the cockney eyeing the animal through his glass. "Surprising," retorted the keeper, "we've learned him toput money in that boxyou see up there. Try him with a crown." The cockney handed him a crown piece, and sure enough he took it in his trunk, and placed it in a box, high out of reach. "Well, that is werry hextraordinary—hastonishing, truly," said the green une. "Now let's see him take it hextraordinary—hastonishing, truly," said solidity than a heap of empty boxes, of which the hextraordinary—hastonishing, truly, said apparently solid parts may still be as porous in a sparently solid parts may still be as porous in a second degree, and so on; and from the great readiness with which light passes in all directions him that trick," retorted the keeper, with a through dense bodies, like glass, rock crystal, dia roguish leer; and he turned away to stir up mond, &c. We have as yet no means of ascerthe monkeys and punch the hyenas.

MAN.-No; just sold it. Boy.-Well I know'd you could'nt have a heart, and ax seven cents for beel. A moment after the WHY WERE SWIFT running-horses bept by boy was seen running out of the market house with a shin bone after him.

### Scientiste and Practical.

WASHINGTON CARE. This cake derives its name from the fact that it was a great favorite at the table of Genera Washington; the last two years of his life, it al-Twitchell, a Methodist clergyman, in full ways formed one of the delicacies of his breakfast table, and is considered one of a Virginian dejune. Take two pounds of flour, one quart of milk, with an ounce of butter, heated together; put the milk and butter into the flour when it is about lukewarm, add a penny's worth of yeast, three eggs, a teaspoonful of salt, place it in pans over night, and bake it in the morning in a quick oven for three quarters of an hour.

We earnestly invite all persons who are suffering with any of "the lifs that fiesh is heir to," to call on Dr. John Bull's agent, and get a copy of Bull's Family Journal, onaris; and for the sake of humanity, we hope that a wingle individual will not be found, unwilling to give Bull's Sarsaparilla a ranal, after reading, and recollecting, at the same time, that it is impossible for the Doctor to publish the tenth part of the number of certificates of astounding cures performed by his Sarsaparilla. The amount of testimony voluntarily showered on Dr. Bull's Sarsaparilla, from well-known and distinguished individuats, both in public and private life, has been perfectly overwhelming.

REMOVAL.

There is not a soul, especially one sweetened by refinement, but is raddened by the departure of the glories of Stugmer, and ever have the fragrant spirits of the fields yielded to the demands of inflexible Autumn, or fled from its witherine approach.

At a recent experiment, conducted by the usual methods of chemical process, extracts were obtained from New-mown Hay, Flowers of Ashland, and other delightfully odorous material which, in their 100th distillation, exert a disinfecting inflesence, and so singular and complete is the enchantment produced by their free use, that health is preserved—blooms from the fields are transferred to the checks—the atmosphere made radolent with the delicate perfumes of Summer, and that joyous season essentially perpetused.

These newly discovered and wonderful extracts Feb. 28, 1852.

March 6, 1852. NATURE'S OWN REMEDY. THE INVALID'S BEST FRIEND!

IMPORTANT CORRESPONDENCE: TRIUMPH OP WRIGHT'S INDIAN VEGETABLE PILLS IN SOUTH AMERICA: - VELLOW FEVER CURED: TRUTII STRANGER THAN FICTION:

SALEM, Mass., April 26, 1851.

William Wright, Esq.—Dear Sir—For many years we have been the Salemagents, and also at one time the county agents, for the kale of your valuable medicine, and during the whole of this time we are not aware that, in any one instance, have the nills which the county agents, for the sale of your valuable medicine, and during the whole of this time we are not aware that, in any one instance, have the pills which we have sold been complained of as causing injury, or not accomplishing their proper mission. It is doubly gratifying when we receive voluntary testimony from a source where the medicine which is sold has been the means of doing great good and of saving many lives.

Last year we sold three dozen bexes to go to a foreign port, and this day have received a letter from the merchant who ordered them, giving an account of the wooderful effects, which they did in curing a large number of persons who were attacked with a prevailing epidemic similar to the yellow fever; while those under the regular physicians' treatment, who were in the Hospital, some three hundred, including the Goyeroor, Magistrates, &c., fell victims to the disease.

If you would like a copy of our better, we don't know of any impropriety in giving it you, and perhaps it would be of service to have it published, together with our names, as it is addressed to us. We will consult the parties increased, and if you wish it, you will please write us. Respectfully, yours.

MULES VS. HORSES. writer in the Albany Cultivator. seems to understands perfectly what he he about, gives the following information rela tive to the advantages of the mule over the "Having of late received several inquires

respecting the advantage of mule labor over

that of the horse, and thinking some con. munication on this subject might be interesting to your readers, I take the liberty of addressing to you my own experience, For nearly three years, I have made use two pairs of mules, and, most of the tim, of one span of horses. The present season I have two heavy spans of horses, the one weighing about 2200 lbs., the other 2350\_ while the pairs of mules weigh only 170 and 1900 lbs., respectively. The horses and mules have both been used in hauling wood Sundays excepted, octavely and Pottsville.

MORNING LINE.

Both Trains stop at all the Stations along the line.
FARES.

1st class cars 2d class cars.

1st class the mules are fed with twelve quarts of on to go unshed without injury. They suffe less than horses from the heat; are not s easily teased by the flies, and are equals hardy to the cold. They are far less subjeto disease, and will endure constant labor fo a much longer time. As they walk so as bring their feet almost in an exact line, the are superior for ploughing and working be tween the rows of growing crops, being le liable to tread them down. When hitcheil to a load, their walk is more rapid than the horse, and I consider them preferable in a most every particular, except for quick of pleasure driving. The mule is not a gol nandizer, and if fed sufficiently at night, a: it is not convenient to feed again till a next, he experiences no inconvenience, The first cost of a good pair of mules,

more than a span of working horses; k the mule capital will last for thirty ven while the entire horse capital must be newed of least every ten years. My estime for the relative expense of keeping a hore and mule team, in working order, is as is lows: SPAN OF HORSES, ONE YEAR.

SPAN OF HORSES, ONE YEAR.

20 qts. of oats each per day—451 bushels, at 372 cts.,
5 tons of hay, at \$8 per ton, Shoeing once a month, half new, 153 Farrier's bill, on an average, Depreciation each year 10 per cent on \$200, 55

A mule is no more likely than the horse. Their vision and hears seem to be better, and they never take free

cure with the horse.

-a danger from which you are never

VALUE OF BONES. S. D." endeavors to impress upon farmers the importance of bone manure-The fact that old bones are hauled forty fifty miles by wagons, and hundreds of misby canals to Philadelphia, and then expond to England for manure, is one too significant to be disregarded. Bones may be first ground and then dissolved in sulphuric acid. And periment in its use upon poor land, resulte in the product of 29 bushels of wheat to !! acre. The writer applied the following pr paration, viz:-13 bushels bones dissolut by 300 lbs., sulphuric acid. The bones we coarsely ground, and required more times Mi acid to dissolve them than if they had be po them mixed with a cart load of saw du blad and after leaving it in a pile for a few do ball to heat, mixed with it 500 lbs. guano, son Fe

LIME IN THE SOIL.

very heavy.

it broadcast on the field at the rate of the bushels of bones and 100 lbs. of guano the acre. The succeeding crops of grass we

Many/farms which once produced go crops of wheat, because there was his enough in the soil to supply the requis us quantity to the grain, have ceased to be p ductive. They still produce a large grow of straw, but not a remunerating crop grain. In some instances, such lands by been restored to their former fertility was the out applying a bushel of lime. Do you a Th out applying a bushel of lime. Do your head head head with a sale hard, untouched and unexhausted substantial there was plenty of lime lying hid, which construction of the atmosphere, and bringing with the reach of the roots of the plants to plant in the reach of the roots of the plants to plant duce the same effect originally derived for the top soil before it was exhausted. the top soil before it was exhausted. Co constant advice will be to use lime, pl deep, subsoil and drain stiff lands, incres your crops and grow rich .- The Plot

MULCHING POTATOES. For the purpose of directing attention A. the subject in season, and inducing the in of experiment, we give the substance di mode of raising potatoes described in # Plough, Loom and Anvil, as performed three different farmers, by mulching copie ly with straw. The land prepared as usul was laid off in rows two feet apart, manuf in the furrows; the potatoes dropped and vered as usual, leaving a level surface, straw then applied six inches deep. I straw kept the surface moist and melit throughout a prolonged drought, and then? was 300 bushels per acre, the tubers beat. the finest quality, although potatoes generally destroyed by rot. What sire us as a peculiarity," says the editor, "f their singular smoothness, being quite much so as apples. Mr. Somers laid hish tato cuttings upon unplowed, unprapar ground, merely covering them with surf and his crop, we are informed, was equal to Mr. Skinner's !"

orchard of dwarf standard pears, that is pe on quince, with short bare trunks about foot and a half high, which is better tall clothed with limbs to the ground on accord of the weight of snow upon them in F ter. A tree of the Winkfield, four pears out and nine feet high, bore a bushel, w at least five dollars.
