GOOD ANECDOTE. - We should be unwilling to particularize how long since, but at a time when we were considerably more verdant than at present, we happened to be travelling in Ireland, that land from which so many travellers come, but to which so few go. Having one day an invitation to dine with a gentleman who lived a few miles from one of the secondrate towns, we engaged a nondescript vehicle, and an equally nondescript driver, to take us to the residence of our friends .-Paddy, with an independence as decided as if it had been nurtured under the stars and journey, smoking villainous tobacco through a blackended pipestump, occasionally relieving his feelings by howling out some catch,

Jehu, turning towards us, rather startled us by the statement that only the blind were buried in that spot. Noticing a fine man sion a short distance beyond, on the same side of the road, we modestly suggested that probadly the imposing building before us was an institution for the blind.

DIRECTION FOR BOILING MEAT. Meat should be boiled in a vessel large enough to contain it easily, so that it may have perfect freedom and sufficient water, otherwise it will be hard and discolored; at the same time too large a pot will leave unnecessary space, which ought to be avoided; for, at the meat requires to be covered with water full two inches, the liquor will then be too weak to be of any service afterward. Before putting your joint into the pot, put in a plate turned upside down, so that the water may get to every part, and that the ment may not stick to the bottom. All kinds meat should be put into soft water; and with fresh meat throw in a little salt to raise the scum. SALEM, Mass., April 20, 1851.

William Wright, Esq.—Dear Sir.—For many years we have been the Salem agents, and also at one time the county agents, for the sale of your valuable medicine, and during the whole of this time we are not aware that, in any one instance, have the pills which we have sold been complained of as causing leightly, or not accomplishing their proper mission. It is doubly gratifying when we receive voluntary testimony from a source where the medicine which is sold has been the means ofdoing great good and of saving many lives. Last year we sold three dozon baces to go to a foreign port, and this day have received a letter from the metchant who ordered them, giving an account of the wooderful effects which they did in curing a large number of persons who were attacked with a prevailing epidemic similar to the yellow feee; while those under the regular physicians' treatment, who were in the Hospital, some three hundred, including the Governor, Dalgistrates, &c., fell victims to the disease. If you would like a copy of our letter, we don't know of any impropriety in giving it you, and perhaps it our mamns, as it is addressed to us. We will consult the parties interacted, and if you wish it, you will pleuse write us. Respectfully, yours.

Excuse me, gentlemen, in the liberty have taken to address you this letter, which, for the sake of humanny, I have been compelled to do, as I do not mean to speculate on an article which proved usultary to a comber of poor people, and in fact most of the population is reduced to a stake of indigence, and it would be sinful for any one to seek jurge in such a way.

Yours with respect,
&MDROSE PANCOAST. BREWSTER'S CHOLERA MIXTURE. For the cure of Cholera Morbus, Diarrhaa, Bowel Complaints, Cholic, Griping Pains, or Sick Stomach, and Asiatic Cholera. Complaints, Cholic, Griping Pains, or Sick
Stomach, and Asiatic Cholera.

This Mixture has been used and recommended by
I physicians and others as a standard medicine, and
has been successfully tested in numerous violent cases of Cholera Morbus, Diarrhora, Cholic, &c., and
will not fail to cure in one case in ten, if administered according to directions, on the first attack.

It is just what every family, vessel, steamboat,
barge, and traveller should always keep on hand to
squard against sudden attack, as the Cholera Morbus
is most likely to attack its subject in the night, and
the sconer the remedy is applied the better. Asiatic
Cholera is, in most cases, preceded by Diarrhora,
and Griping Pains in the howels; and, doubtless,
one great reason why so many persons die of Cholera is, the want of proper temedies administered in
the first stage of the disease, or the delay in procering a physician before the patient is past cure.

Reference can be given to hundreds of the most
respectable persons, as well as to physicians who
have used it, and witnessed its effects in curing the
most violent cases of Cholera Morbus, and Diarrhora'.

Price 25 cents per bottle.

CENTIFICATE from Dr. Leonard Lawrence:—During the Summer of 1846, while on a visit at Mr
Rrewster's, in Bridgeton, I had a severe attack of
Cholera Morbus, attended with extreme prostration
of the system, and a profuse perspiration and voiniting. I was induced to use a Cholera Mixture, purpaired by Mr. Brewster, which instantity gave relief,
and a few doses effected a permanent cure. I used
no other medicine whatever. I have since used it in
my own family and recommended it to others, in all
cases with the same results. From a knowledge of
its contents, I should not hesitate to recommend it as
a safe and efficient medicine in all cases of a like
nature.
