- - -	the top," was the reply. MISS NANCY says, that while folks are "inventing this and inventing that, she wishes to gracious somebody would invent something for bringing up children and then she would get married." D JUST SoWealth and widowhood, when united, are dangerous to encounter Money may be called the "widow's might," when in large quantities ; as in poverty her "mite." D A woman abandons her opinion the moment her husband •adopts it : even in church the women sing an octave higher than the men, in order not to agree with them in anything. D THE MAN that was injured by a burst of applause, is recovering ; but we are sorry to say that the individual who was injured by the accidental discharge of his duty, is still very low. D THE N.Y. Dutchman says the first swallow-tailed coat that old Sourby got, so dis pleased him, that he starched the skirts an used it for a boot-jack D A YANKEF, down East, has made the grand discovery, that a window glazed wite old hats, is a sure indication that the occu- pants have seen a rum bottle. D Mis CAREFUL having been told by he physician that he must take gentle exercises replied that he had for some time past pro- ticed cutting his toe nails twice a week.	thest on horseback. At length, an innkeepe and mayor of Chester first cansed horses to be entered for the race, in 1624, the horse to run five times round the roody, and "h who won the last course or trayne, feceive the bell, of a good value. of eight or te pounds or thereabout: which moneys wer collected of the citizens, to a sum for the purpose." WHY no mathematical instrument makers mark divisions on their work with the screw? Because it can easily be man with a hundred turns of its thread in it space of an inch, and at perfectly equal di- tances from each other. If we suppose suc a screw to be pulling forward a plate of m tal, or the edge of a circle, over which sharp-pointed steel marker is placed, whi moves up and down perpendicularly, t marker, if let down once for every turn the screw, will make just as many lines the plate > but if made to work at every hu dredth or thousandth turn of the scree which it will with equal accuracy, it m draw a hundred thousand distinct lines one inch. The WHY is the explosive engine so calle Because it is set in motion by the explosi of oil gas and atmospheric air, the mecha cal force of the explosion being employed h drive the machinery. Percussion power and other substances that explode by const may eventually be employed for the sa purpose. WHY is tron the most useful of r als ? Because it becomes softer by heat, has the capability of being welded to ano neee of iron, so as to form one entire marker on enteres in the form one entire marker is purpose.	<ul> <li>Tellines, and the second second</li></ul>	MAN WANHING POWDERS.
