In pro- portion to the inclemency of the season and position of the animal will be the quantity of fuel or tood consumed. FLOORS FOR PIG-STY.—The following good hint is furnished by the Massachustiff Ploteman: "Styes ought to have floors last on the naked loam, in order to be easily cleaned out. Iuch boards of oak or chear- ingt, well fastened down, and kept covered with earth, will last 20 years." This earth when well mixed with manure, is easily thrown off the floor by the shovel. CUTTING UF vs. TOPPING CORM. The editor of the Rural New Yorker, says: image farmers have came to the conclusion, fas- both grain and fodder are better when the stalks are cut up at the roots, after the cor- is sufficiently ripe, than when the practiced topping is adopted.
you see this is a double egg !" A HAPPY RETORT. An-instance of Irish readiness at repar ocourred the other day at the capitol, wh is too good to be lost. Certain members of Congress, finding debates rather dry in the House, stepped to refresh their thirsty spirits at Casparis refectory, which is conveniently contigio As they passed out, they saw eight or n laborers harnessed to a sled, hauling a st about heavy enough for one horse, wh one, acting as driver, leisurely walked allow side. (All the laborers are on a per diem lowance, as well as the members.) Pausing to witness this operation—wh seemed to preseut a parallel to their own duous labors in the public service—one the members addressing the driver, said "Well, friends, you are making yoursel horses, I see ?" "Yes," was the prompt rejoinder, " by the powers, it's a mighty sight better to making asses of ourselves, as some of are doing up there." The prevailing report is, that the con sation abruptly closed, and every man of party patronized Casparish to the fullest ent of two julips instead of one.—South Press.	The base of all artificial stones is a past composed of silex, potash, borax, oxide of lead, and sometimes argenic. The best sile is obtained from rock crystal, and the nex- best from white sand, or flint. WHY is a long-backed horse easy i his paces? Because the increased distance between the fore and hind legs, which ar the supports of the spine, will afford great er room for the play of the joints of the back. A long spring has much more pla than a short one, and will better obviat concussion. WHY ARE carbonates so called ? But cause they are combinations of carbonic acid with the alkalies, metalic oxides, in earth- and in conces: particularly in chalk, limit stone and marble. Thus, a cubic inch of marble contains as much carbonic acid ic combination, as would fill a four-gallon ve- sel when in the state of gas.—Parkes. Certain members of Congress, finding debates rather dry in the House, stepped to refresh their thirsty spirits at Casparis refectory, which is conveniently contigio As they passed out, they saw eight or m laborers harnessed to a sled, hauling a st about heavy enough for one horse, wh one, acting as driver, letsurely walked allow side. (All the laborers are on a per diem lowance, as well as the members.) Pausing to witness this operation—wh seemed to preseut a parallel to their own duous labors in the public service—one the members addressing the driver, said "Well, friends, you are making yoursel horses, I see ?" "Yes," was the prompt rejoinder, " by the powers, it's a mighty sight bettert making asses of ourselves, as some of are doing up there." The prevailing report is, that the con- sation abruptly closed, and every man of party patronized Casparish to the fullest eut of two julips instead of one.—South Press. ID SOMETHING FOR PILL-TAKERS.— Western papers frequently tell hard sto but here's one from the Western Ledger takes the rag off the bush a little of the cl- est. Some one has told us of a man i linois, who had an attack of the ague.	The base of all artificial stones is a past composed of silex, potash, borax, oxide of lead, and sometimes argenic. The best sile is obtained from rock crystal, and the nex- best from white sand, or flint. WHY is a long-backed horse easy i his paces? Because the increased distance between the fore and hind legs, which ar- the supports of the spine, will afford great er room for the play of the joints of the back. A long spring has much more pla than a short one, and will better obviat concussion. WHY ARE carbonates so called ? Be cause they are combinations of carbonic aci- with the alkalies, metalic oxides, in earth- and in ctones; particularly in chalk, lime- stone and marble. Thus, a cubic inch of marble contains as much carbonic acid combination, as would fill a four-gallon ve- sel when in the state of gas.—Parkes. WWY WILL the recoil of a fowling piece hurt the shoulder, if the piece be no held close to it ? Because the piece recoil with as much motion or momentum in it it the ball has; but the momentum in the gu- being diffused through a greater mass, if velocity is small, and easily checked. The WHY DES adrop of water roll about a red-hot iron without evaporation? Becaus its surface becomes so highly polished as reflect all the heat. If the heat be tess, the water penetrates the pores of the oxidat iron, and losing its polish is evaporated. WAY ARE the polished metals pecu ary fit for burning mirrors ? Because the lie water penetrates the polished metals pecu ary in perfect radiators and receivers	 a others of New York city. By AWM. YOUNG, M. D., Graduate of the University of Pennsylvania, Member of the Roy- College of Surgeons, London; and Honorary Meth bern fibe Philadelphila Medical Society. The variou forms of Secret Diseases, Besninal Weakness, Disea- ses of the Prostate Gland, Impolency, solitary balk of youth are faithfully described, and all the recip- given in plain language. The chapter on self-abor- and Beminal Weakness is worthy of particular al tention, and should he read by every one. Youn Men, who, have been unfortunate in contracting di- ense, previous to placing yourselves under the car of any doctor, no matter what his pretensions ma be, get acopy of this 'truly useful work. Bes Captains and persons going to Sea, should pos- sess OL. Young's Treatise on Marriage, the Pocke Asculaphus, or Every One His Own Physician. Of the Asculaphus to his child 'It may save him from into the secret obligations of married life, withbu- into the secret obligations of married life, withbu- metarly grave. Lot no young man or woman enter- into the secret obligations of married life, withbu- ter moment without consulting the Asculaphus. Let no one soff- room to telings, and the whole train of Dyspetil sensations, and given up by, their physician, be an other moment without consulting the Asculaphus- treatures from the very jaws of death. Unward of a MiLLION copies of this celebrated work has been and in the rounty and Europe since 1838, whe the first edition was issued. To Any person sending TWENTY-FIVE cents et closed in a fetter, will receive one copy of this how by mail; or five copies will be sent for one dullar. Address 'Dr. WM. YOUNG, No. 132 Sprince Size, Philadelphia,'' Post paid. Twenty years practice in the city of Philadelphi and Single Acting Fumps in ther for one solf to a saasse dacaribed in his different publications, at any di tance can consult Dr. Young to the confidence of the and single Acting Pumps and Water Closets; also, kinds of Hrass Cocks for water and steam, Braks Cups, and	CLOSE BARNS. Barns, and other buildings in which animals are kept during winter, cannot be made too comfortable. An animal exposed to cold draughts of air will eat vastly more that one of the same kind, age and size, comfor- tably lodged. The stomach is the heating furnace of the animal system, and the food is the fuel which supplies the heat. In pro- portion to the inclemency of the season and position of the animal will be the quantity of fuel or food consumed. FLOORS FOR PIG-STY.—The following good hint is furnished by the Massachuseth Plotoman : "Styes ought to have floors is on the naked loam, in order to be easily cleaned out. Inch boards of oak or cheft ant. well fastened down, and kept covered with earth, will last 20 years." This earth, when well mixed with manure, is easily thrown off the floor by the shovel. CUTTING UF vs. TOPPING CORN. The editor of the Rurel New Yorker, says : most farmers have came to the conclusion, dur- both grain and fodder are better when the stalks are cut up at the roots, after the cor- is sufficiently ripe, than when the practiced topping is adopted. The Hocs.—The American Farmer says- " When your hogs get sick, you know us what, give them ears of corn first dipped in tar and then rolled in sulphur. It is the stores the pig to perfect health."

and he only saved himself by shaking off the logs as fast as they fell. By taking off the logs as fast as they fell. By taking one the logs as fast as they fell. By taking one in greater quantities, a box of "The Extract Pill," a preparation lit-
