## Wit and Kumor.

A MATTER-OF-PACT MAN. Here is a very amusing picture of that spethere is a probability of my succeding. I ask no favours when I think they won't be granted.

I grant no favours when I think they are with alkalies and other oxides forming some of the well as by public bondres, as the report below will ask well as by public bondres, as the report below will be the conditional as well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres, as the report below will be the conditional ask well as by public bondres. the girls when I think my attention would be disagreeable. I am a matter-of-fact man-I acid gas. am. I do things seriously. I once offered to In chemical union, bodies combine only in ceror not. She took my arm and said not a mited are termed their combining numbers or equiword. I bade her good night, and she said raients. not a word. I met her the next day, and I Now in the formation of carbonic acid, we find said not a word. I met her again, and she one equivalent of carbon united with two of oxygave me a two hour's talk. It struck me as | gen. This is the gas which is emitted by the recurious. She feared I was offended, she spiration of animals, volcanization, and it exists said, and couldn't for the life of her conceive solid in many of the metal ores. - Scientific Assewhy. She begged of me to explain, but

so. She said she hoped I would not be ofsince been a mystery to me whether she wanted me to call; and it has ever since been a mystery to me whether she wanted me to call or not.

I once saw a lady at her window. I tho't grain were black in appearance from the same cause, and the hedges were in the like condition—and was told that she was not at home. I expect she was. I went accept thinking she was. I rather think so still. I met her again. She was offended—said I had not been very neighborly. She reproached me for my negtended; asked me to call; and it has ever neighborly. She reproached me for my neg- been accomplished by an Act of Parliament making hgence; said she thought I had been unkind. It penal for factories to let their smoke escape. The And I have ever since wondered whether she

did not give me the ghost of a chance to do

was sorry or not, A lady once said to me that she should like to be married, if she could get a good congenial husband, who would make her happy, or at least try to. She was not difficult to please, she said. I said I should like to get married too, if I could get a wife that it, and add a little sait. Just before the meat is boil would try to make me happy.' She said, ed enough to take up, fry three or four slices o Umph! and looked as if she meant what she pork till brown-take them up, and put it in the said. She did. For when I asked her if she thought she could be persuaded to marry me, she said she'd rather be excused. I excused her. I've often wondered why I excu- boiled rice, or a little flour and water mixed-turn

A good many things of this kind have happened to me that are doubtful, wonderful, mysterious. What, then, is it that causes doubt and mystery in the ways of men? It is the want of fact. This is a matter-of-fact world, and in order to act well in it, we must deal in matter-of-fact."

A STRUGGLE FOR A KISS. "Ah, Sally, give me a kiss and be done

with it, do? "I won't, so there now."

"I'll take it, whether or no." "Do, if you dare."

So at it we went, rough and tumble. An The bow of my cravat squat up in a half a shirt collar, and at the same time some of the head fastening gave way, and down came days' It decomposes water, acts powerfully on Sally's hair like a flood in a mill-dam broke the magnetic needle, and is capable of transmitting loose, carrying away half-a-dozen combs .-One dig of Sally's elbows, and my blooming ruffles wilted down like a dish cloth. But she had no time to boast. Soon her neck tackling began to shiver, parted at the throat, and whorsh came a string of white beads scampering and running races every way

you could think of over the floor. By hokey, if Sally Jones ain't the grit, there is no makes. She fought fair, however, I must admit, and neither tried to bite or scratch; and when she could fight no longer for want of breath, she yielded handsomely. Her arms fell down by her side-her hair back over her chair-her eyes closedand there lay a little, rosy mouth all in the air. Lord! did you ever see a hawk pounce upon a robin, or a humblebee on a tater blos som? I say nothing.

"BLIND TO HIS OWN INTERESTS." A rather amusing incident came under our observation a couple of days since, which we volunteer to give our readers:

One of Heath's sprinkling wagous, used to dampen the streets of the city by water from a large reservoir containing several hogshead, was proceeding slowly down

lar looking vehicle. "Hallo, stranger," said he, addressing formerly of various colours. himselt quite audibly to the driver, "you're

won't be dry, next you know." The driver was silent. The stranger again addressed John: "Look here, you fool, don't you see that

somethin's broke loose with your old cistern on wheels, and that all of your water is leakin'out ?" Still the driver was silent, and the Hoosier

turned away in disgust, saying: "I allow that fellow is a little the biggest fool I ever did see, but if he is so blind to his own interest as to throw away his labor in that way let him do it and be---."

"The voice of woman, gentlemen," said a romantic individual, in a late argument at the club rooms, "the voice of woman, no matter how much you may be inclined to sneer at the sentiment, exercises a soothing,

banishes from his mind all those troubles him to the depths of despondency." home you loitering scamp, and leave these another substance. worthless fellows to themselves. O! when

THE MAN that" cusses" the State be-

nus noneymoon trip, after having seated his bride in the cars, goes forward and accosts the fireman as follows:—"Naow, Mr. Ingineer, I want you to be very keerful, and go alow, extuse you see I've jest been married, and my wife and me are goin' in thus 'ere and my wife and me are goin' in thus 'ere train.\*

Why po small needles, float on water?

Because the particles of water cohere among the meedles is not sufficient to overcome that cohesion.

Why po small needles, float on water?

MANUPACTURERS of PAPER HANGINGS, No. 142 Currency Breet, Philadelphia, ask the attention of consumers and the Trade to their extensive size and the very seriety of proposition, embracing every registry of goods in their line, which they will sell at low rates Their manufactory being the most extensive in the coentry, they are enabled to offer unequalted induce-ments.

## Scientiffe and Practical.

WHEN COAL, WOOD, or other substance co cies of odd fish known as a matter-of-fact man: taining carbon, is brought to a very high heat in the cies of odd tish known as a matter-of-jact man: | presence of oxygen, combustion, that is chemical is not mere assertion, they hold more materials combine; heat the melves in readiness at any more ensues. The two materials combine; heat I do nothing under the heavens without a mo- light, motion and electricity are evolved during the I do nothing under the heavens without a mo-fight, motion and electricity are evolved during the lother ander that are a tive-never. Lattempt nothing unless I think process; said the product is another colorless gas, merchants and others. there is a probabity of my succeding. I ask no which is carbonic acid. This gas is proved to be not deserved; and finally, I don't wait upon class of compounds called salts. The diamond being nearly pure carbon, burns up, producing this

attend a young lady home—I did, seriously: tain fixed proportions, or given weights. Thus, 1 that is, I meant to wait on her home if she that is, I meant to wait on her home if she oxygen, or with twice that weight. So, too, with wanted me. She accepted my offer. I went 14 ibs. of nitrogen, 8, or 16, or 24, or 32, or 40 home with her; and it has ever since been lbs. of oxygen combine, but no qualities between an enigma to me whether she wanted me these. The lowest weights in which these bodies

The equivalent of oxygen is 8, that of carbon 6.

BURNING SHOKE.

Two YEARS ago the cities in England and Scotland were like smoked hams owing to the smoke is all burned by simple contrivances, and at a great saving of fuel. What cannot science ac-

CURRIES. CHICKERS, PIGEOUS, mutton chops, lobsters

and veal, all make good curries. It the curry dish is to be made of fowls, they should be joined. Boil the meat till tender, in just sufficient water to cover chickens. Let them brown, then add part of the liquor in which they were boiled, one or two ten-spoonsful of curry powder, and the fried pork. Mix a teaspoonful of curry powder with a tea-cup of on to the curry, and let it stew a few minutes.

INDIAN LOAF CAKE.

ONE POUND OF Indian meal, a quarter of a pound of butter, two eggs, half pound of sugar, a parter of a pound of raisins, a quarter of a pound currents. Cut up the butter in the Indian meal, one over it as much boiling milk as will make a thick batter. Beat the eggs very light; when the atter is cool, pour them into it.—Seed the raisins, wash, pick and dry the currents, mix them with the raisins, and dredge as much wheat-flour on them as will adhere to them. Stir the fruit into the batter and add the sugar. Bake it in a moderate oven two hours.

BATTERY IN A LEMON.

PROFESSOR BAKOFFRER is experimenting just now in London on a new vegetable battery distery consists of a simple lemon, which contain last till the acid is exhausted—say eight or ten Channel—an uninterrupted distance of thirty miles. A combined battery of four lemons is said to have

TO KEEP UTERSILS SWEET. TAKE HALP A gallon of fresh lime, and pu t in a vessel containing ten gallons of water." Stir I trequently for one day, and dip your pans, pails trainers, &c., into it. It will effectually remove il acidity or bad odor, and promote cleanliness. The vessel can be filled as often as circumstant

Information for the People

OR THE PLAIN "WHY" AND "BECAUSE." WHY IS THE true-love knot so called? trulofa fidem do, (Lat.) I plight my troth or faith; a knot among the northern nations being the symbol of love, faith, and friendship, pointing out the indissoluble tie of affection and duty. Sir Thomas Browne, with his usual eruditions, says, "the true lovers' knot usual eruditions, says, "the true lovers' knot knives, Dirks, Bowie Knives, Revolving and plain knives, Dirks, Bowie Knives, Dirks, Dirks, Dirks, Dirks, Dirks, Dirks, Dirks, Dirks, Dirks, Dirk had, perhaps, its origin from Nodus Herculanus, or that which was called Hercules; his knot resembling the snaky complication in the Caduceus, or rod of Hermes, and in Fourth street, engaged in the laudable task which form the zone or woolen girdle of the of flooring the dust, when the attention of a bride, was fastened, as Turnebus observes in raw Hoosier was attracted towards the singu- his Adversaria." Hence, evidently, the bridefavors of top-knots at marriages, which were

Way should not flowers in water No answer was made by the person addressed.

"I say, old hoss," said the hoosier, "you're losing your water right smart thar, I tell wou, and I'll be dog-on'd if your old the carbonic acid, similar to that which is separwou, and I'll be dog-on'd if your old the carbonic acid, similar to that which is separwou, and I'll be dog-on'd if your old the you, and I'll be dog-on'd if your old tub ated from the lungs by breathing, which is highly noxious. There are instances of persons who have incantiously gone to sleep in a close room in which there has been a large growing plant, having been found dead in the morning, as effectually suffocated as if

> there had been a charcoal stove in the room. WHY DO a popu of water, and a pound of salt when mixed, form two pounds of brine, but then occupy much less bulk than when separate? Because the atoms of the one are partially received into what were vacant spaces in the other. A similar concensation is observed in many other mixtures; as a pound of sugar in a pound of water. Tin and copper melted together to form bronze, occupy less space by one filteenth,

than teey do when separate,.-- Aanott. WHY WILL NOT oil and water mix in a vial upon being violently shaken? Because of shaon Lixio, the great Physiological Chembi, by J. B. Houarrow, M. D., Philadelphia, Pa.

"I Diugar." Such is the true meaning of the word place in the water and the oil have no affinity for each other; but I I some caustic ammonia be added, and the vial theu agitated, the whole will be mixed into an ammoniacal soap. This is what is called disposing affinity, or uniting bodies, which apparently have no tendency to unite of themselves, by the addition of another substance.

This is Nature's own Remedy for an unhealthy should be properly can be seen, and the terms of another substance.

Why do seeds grow in sand or on mostened finance!? Because of the air, or the fourted fine fine discovering properly in the stored finance of the finance of t an inspiring, a hallowing influence upon the the water and the oil have no officially for each ear of man; comforts him in dismay, and other; but Ilsome caustic ammonia be added, which, when she is absent, conspire to sink mixed into an ammoniacal soap. This is "Tom! you rascal," exclaimed his wife bodies, which apparently have no tendency at this instant, bursting into the room, "come to unite of themselves, by the addition of

I get you at home won't you catch it? Well; motstened flannel? Because of the air, moistened flannel? Because of the air, DRIIO.

Guess you will!"

Here Tom left the room abruptly, with his enraged spouse, evidently satisfied of the aspiring influence of the "voice of wo- aspiring influen his entaged spouse, evidently satisfied of the growth of seeds generally; although the inspiring influence of the "voice of wo- soil at length becomes the proper means, by which alone the plant can arrive at perfec-

April 22, 1848. HUMMEL'S ESSENCE OF COFFEE One package of this Essence will go as far as fest pounds of Coffee—and Coffee made of this Essence will preserve the taste of the real Coffee, with the ad cive to beaith than the finer Coffee, is eamore conducive to health than the finer Coffee, is es-sier made, does not require anything to clear it, and is free from actinent. This Essence is now extensively used in various sect one of the constry, a single agent having sold 16,000 cakes in a single county in this State. Price 12 cents per cake. For sale wholesale and retail by the subscriber, at his variety store. S. BANNAN, Agent for Schuylkill Co. C. Merchants and others supplied to sella gain at the Manufacturer's prices. Try it.

I have examined an article prepared by Measrs. Hummel; Sohler & Co., of Philadelphia, called "Easence of Coffee," which is intended to be used with Coffee for the purpose of improving it. I find it not only free from anything deliterious to health, but on the courtrary, the ingredients of which it is composed, are perfectly wholesome.

READ AND REFLECT.—The afflicted would dowell to reflect before tusting their health, happines, and in many cases their lives, in the hands of physicians ignorant of this class of maladies. It is certainly impossible for one man to understand all the life the human family are subject to. Every respectable physician has his peculiar branch, in which is more successful than his brother professors, and to that he devotes most of his time and sundy.

YEARS OF PRACTICE, exclusively devoted to the study and treatment of discusses of the sexual organs, together with ulcars upon the body, throat, now, or legs, pains in the head or bones, mercurial theumatism, existences, gravel, irregularities, discases arising from youthful excesses, or impurities of the blood, whereby the constitution has been enfeabled, enables the Doctor to offer speedy felief to all who

Che Farmer.

SAVE THE DEAD LEAVES. Very few gardeners would be guilty of so foolish a thing as to waste barn-yard man ure. But they are almost all guilty of waste waste of dead leaves that fall at this season of the year, from trees and shrubs of all kinds. If every horticulturist would refer TOHN BANNAN, ATTORNEY AT LAW has for a moment on the nature of these file leaves-which contain not only the vegen ble matter, but the earthy salts, lime, p. tash, &c., needed for the next season's growth and that too; exactly in the proper. the decomposition of these very falling leaves sible for such a reflecting horticulturies toat. low these leaves to be swept away by even

lect, from week to week, the leaves that fall under each free, and by digging them under the soil about the roots, where they will de cay and enrich that soil, provide in the ches. pest manner, the best possible food for the tree. In certain vineyards in France, the vines are kept in the highest condition b JUIN C. CONKAD, JUSTICE OF THE PEACE.

Justice attend to any business, entrusted to his care, ponetually. Bills and Notes collected, &c. Office in branch that is pruned off such vines, or he June 5, 1832. simply burying at their roots every leaf and young fruit trees should be carefully are and dug in beneath the surface of the m A single year's experience of its good reals will confirm our readers in this practice-Doucning's Horticulturist.

CHAPPED TEATS IN COWS. There are many recipes for curing chin and other sores on the tests of cows. In your May number of the Farmer, I learn the

to dip them in Goose Grease is a sure reme dy against chaps. This no doubt will de very well; but who will furnish the soop I lear that there nin't goose grease enough in all Illinois to dip half the cows teats ineither sore or well. If the Farmer Boy Parmington can supply us,-or his fried Cooper, in New York, that he speaks of,very well; we will try it, if we find nother I have used various liniments, and a many kinds of ointments as can be picked of

anywhere, but none in my experies comes up to the mark like clean, cold wal This matchless medicine is not resorted as it should be in the curing of many day are then soft—the cow stands quietly, and

dirt falls into your pail. If the teats are chapped or sore in way, as they often are in the spring of year, sop them in Soft Butter after milia Your milk is clean and your kicking covi become gentle, and your patience is not i led .- [ Prairie Farmer.

CURING CORNFODDER.

Our farmers cannot be too careful is a ring this valuable provender for stock Some pay but little attention to it, per ting it to remain in the field, exposed to bleeching and exhausting process by cold, wet weather and high winds, a very late in the fall, and until the life di todder is mainly lost. Corn should be dewn early-even while quite greenleft stand in the field no longer than it a be sufficiently—that is, until it is nearly when it should be husked, and the fell carefully stacked near the barn, each la after stacking, being sprinkled with fit four to eight quarts of salt. When in cattle, the stalks should be cut a few ind in length, by the stalk-cutter, and then, threshing machine is at hand, run the that, and before feeding, elightly wet " worm water, and mixed with a little bru with chopped roots. A more valuable can scarcely be provided for stock genen

-{Germantown Tslegraph.

These animals should be protected cold and wet, though they have accessed most efficient kind should be afforded i as no animal is more injured by the well erected in pastures, to which they can to whenever it is cold or stormy, and suff with troughs, containing salt and misone part of the former to three of the When not protected, sheep often take ! leern in summer, which produces of and other affections which too often his

PRUNING IN AUTUMN. commended autumnal pruning for fruits we cut a very large branch from and tree was old, and it has never healed? but it is now sound, and almost as he horn, fand the tree perfectly hard stom A few years before and after, large were cut from the same tree in 57 and where they were cut off the tree rotted, so that a quart measure may be in the cavity."-Albany Cultivator.

PRESERVING MEADOWS. Sub-sorted meadows, says the W Farmer, last many times as long (30 every other autumn, and subsequent would benefit them. Top-dressing early spring with such materials as atti ly soluble and not volatile, always part fit. Irrigation is a profitable mode of

ving meadows. TO PRESERVE GIRDLED TRED Take out a block of wood extending he bark above and below the girdle, 125
