How the Governor can reconcile his conscience, pretendedly auti-special legislation, to the signing of these bills, we cannot understand. It is rumored, however, that the tovernor has of late fallen—not exactly like the unfortunate was farer from Jerusalem to Jericho—into the hands of thieves, but of Speculators, which may, perhaps, account for the business of the Philadelphia and Reading Railroad this year, although the Coal tomage is Speculators, which may, perhaps, account for his singular change of sentiment, as expressed at the begining of the session.

COAL FOR THE WORLD'S FAIR. Mr. C. W. Peale is now engaged collect ing specimens of Coal from the Schuylkill Region, to be exhibited at the approaching World's Fair at New York. It is requested of the different Operators that they leave samples with Col. J. M. Wetherill, at his office in Pottsville, who has been properly commissioned for that purpose. The specimens should each be labelled as follows :-

Name of Colhery, On lands of, Name of Operator, Name of Vein, Dip of Vein. Thickness of Vein. Working above or below water level,

Dip of stope by shall, Length of Tunnels, Length of underground Radrond, Number and Power of Engines for Pumping, Hoisting, Breaking and other purposes, Number of Miners' houses on property, Number of men employed, horses and mules, Tonnage of 1852. Amount of capital invested, Color of Ash

If each contributor will so mark his samples, it will make a very desirable uniformity and correctness in the collection, besides saving Mr. Peale a deal of time and labor. otherwise necessary in visiting each Colliery and ascertaining the requisite information. It is proposed to arrange the collection in an appropriate case, with the peculiar labels of each attached. We hope the different-operators of the Region will give proper attention to this matter-it will be a comparatively easy task for each, while the aggregate for one individual to perform would be quite

a formidable undertaking. We are also requested to call the attention of the Operators to the subscription list, now opened at Col. Wetherill's office, to defray the necessary expenses of collecting and boxing the specimens for exhibition. A small sum, perhaps \$100-\$150, will cover the whole ainount.

BALTIHORE AND OHIO RAILROAD .-The business done on this road during the month of March has been unprecedentedly large. The official statement will be submited to the Board on Wednesday next, and we learn that it has already been shown to some of the Directors. It is as follows, in round

HAPPINESS AND COMPETENCE. That we behold so many females in the meridian of life broken in health and spirits with a complication of diseases and ailments, depriving them of the power for the enjoyment of life at an age when physical health, buoyaney of spirits, and happy screnity of mind, arising from a condition of health should be predominant. Many of the causes of her sufferings at first—perhaps verse before, perhaps during girthood, or the first years of marriage—were in their origin so light as to pass unnoticed, and of course neglected.

ANTHRACITE FOR STEAMERS. We clip from the European Times, published by Messrs. Wilmer & Smith, Liverpool, the following paragraph, reciting an instance in which Anthracite had been used with great advantage, in lieu of bituminous coal, in a late voyage in one of the English steamers. This testimony in favor of the substitution of Anthrateite for the coal now commonly employed for fuelsin the propulsion of Steam vessels has special interest for our

"At the banquet which followed the tria trip for testing the Boomerang propeller, on the tath by the city police, and large to the use of English Anthracite in lieu of stores of arms and ammunition found. The They had tried it with complete success on the last voyage of the Livorno, having found that it was more serviceable, and took up much less space. In her previous voyages the Livorno required 17 tons of coal, whereas she had only consumed 12 tons 5 civi. of Anthracite. He thought this would create as great a revolution as the Boomerang, because, if they could save a quarter of the consumption of fuel, much inconvenience and delay would be prevented. If the Great Britain, for instance, instead of consuming 1500 tons of coal on her passage to Australia, only require 1000 tons, she could accomplish the whole distance without outhing at St. Helena for coals. The gain y Anthracite instead of Bituminous, would, in his opinion, be about 35 per cent., besides having the gratitying fact that Anthracite was not liable to spontaneous combustion. Since the various and very satisfactory experiments in the use of the two kinds of Coal, for Ocean navigation, we are only surprised that Bituminous is used in any sea voyage the advantages of economical storage, cleanliness and safety all being on the side of Anthracite. Ignorance of the manper of using it, we are persuaded, is the principal, if not the only objection to the latter, and we have no doubt as soon as that is

A THRILLING INCIDENT. We daily come across some fact or incident to confirm our opinion of the populariy, of the Maine Law: and were it submitted to the people of Pennsylvania to-day, we believe it might be much more appropriateinquired, who wouldn't vote for it, rather han who would. Even many of the Rumsellers are in favor of it, and many a poor niscrable, loathsome sot-a slave to his appetite for drink and who cannot resist the emptation, when present before him-would gladly deposit his ballot to remove the evil

The North American of yesterday says :-" A Model for the Cast Iron Statue of HEN-RY CLAY is now in course of preparation at Wood's Iron Works, on the Ridge Road, Spring Garden. When completed, it will be fifteen feet in height, and consist of 138 separate pieces. It is fashioned after Neagle's well known portrait of the great statesman. When the model is completed, a mould will be taken of it, in which the iron statue will be cast. This work is intended to crown the Clay monument at Pottsville. The base or stone work of the monument is already pre-pared on an elevated plateau on the side of a lofty hill overlooking the town, and the iron fluted pillar which is to rest upon it and support the statue is in course of prepara-We hope the work may be hurried up, so
