New Castle, July 18, 1853. TRUTH AND JUSTICE III.

By the public papers, I see an effort made to injure the character of Dr. Robert Philips as regards the collection of the Road Tax for the present year, a word of explanation seems necessary.

In the Year 1852, a judgment was obtained against New Castle Township for, \$508, which was for a part of a larger sum for the building of a bridge in East Norwegian township, formerly New Castle, size there were compulsory means used in the Autumn of-said year, for the making of a new road on the South-side of Mine Hill Gap, in said township, costing upwards of \$250—thirdly, a similar process compelled the township to wisen the Gap Road in the gorge of the Mine Hill which contract amounted to \$250, said Philips & 850, also purchased and paid for Timber for the Bridges, it became necessary to raise these fixeds and a second Assessment was resorted in, a difficulty arose with some of the Tax Payers to meet the payment of the second tax, when Philips & 850, with their usual generosity, came forward and furnished the necessary means for the township, which has never been paid to them! I will only add that the list five Assessments of taxes have been made by the Auditors of New Castle Township.

This Paint differs from the so-called Mineral Paints of the day, which are principally Ochres and Clayer Colored, and are entirely wornhess.

Silver's Plastic Painte-are pipely Metallic, containing no Alumen or Clay.

They are levigated finely, mix readily with Linseed Oil, (without the tomble of grinding?) and flow under the brush as freely as the best White Lead.

These Painte extel all others in body or covering properties, bne pound of which will cover as much surface as two pounds of which will cover as much surface as two pounds of white Lead.

There are four natural colors, viz.: Black or Slate, Brown, Olive and Chocolste.

DIRECTIONS.—This Paint flows readily under the brush and its covering property is increased by using it mixed ashibicity as possible with ruage Linseed Oil, as the Paint is the tasting or protecting body and the Oil simply the medium or agen in spreading it.
