Robinson, the charge of tulpable behavior uas amply sustained, and Kramer was placed under arrest, for future trial. As to the manner in which the Recruiting Superintendent, at New York, became informed of the matter, we may as well state once for all, since certain insinuations thave been thrown out in the community, that beyoud the notice of the affair in the Journal, and our conditional suggestion for Kramer's removal, we know nothing. But that matters not, since we hold it was the duty of the Commanding Officer, here, to have instituted the investigation he was subsequently ordered to make, on his own responsibility. The affair was notorious-it occurred in one of our most public thoroughfares, and in the presence of a large crowd of people. The current report of such an outrage ough: to have been a sufficient warrant for at least the necessary inquiries after the truth, without waiting for authority from his superiors. If noon but the drinker had to tamber by the traffe, it would not be so insupportable; but every good citizes has to help to bear the burthen entailed on the county and pauper expenses, as well as the enormous loss incident to loss of time of workmen, whereby business incident to loss of time of workmen, whereby business is deranged and a multitude of a volume would not exhaust 11), showing why the people of Schuylkill County should enormous loss incident to tobs of time of workines, whereby business is deranged and a multitude of inconveniences suffered.

These are evils sufficient to arouse to action every good citizen; and yet, strange to say, men, who suffer and who feel a deep interest in the proper management of public matters, will tell us that it is too soon to make a political matter of the cause. If there is any evil that should be corrected, this is is too soon to make a political matter of the cause. If there is any eval that should be corrected, this is certainly one; and where there is such enormous piblic loss, inconvenience and expense, we are at allows to discover a reason why this public abuse should not be politically dealt with as fearfestly as ally other. The people of Manse did not fear to make it a political matter, and what has been the result? It is known to all! Is it too soon to stop the criminal expenditure of money for liquor, that should purchase food and clothing for destinate families? Is it too soon to bind up the broken hearts of hundred of devoted wives? Is it too do to restore the kind husband and father to his wretched family? No! No! The time has come to act and to act determined and father to his wretched family? No! No! The time has come to act and to act determined and perseveringly. Humanity calls on every inter to aid in putting cown a curse that may destroy his children.—Noos but political demagogues or office hinters, and liquor sellers will dare oppose us. This people are interested in this great work. They know no party wave that of a total pronibitory liquor law party. Yea! the poor insortates are pleading for a chance to vote tor it, and shall we be deal to petitions that should wake up the sympathics of every patriot, philanthropist and christians? Coursee, mora! coursee, is all that is requisite; we have the votes to elect men who will obey the wishes of their constituents. Then to the rescue! Now is the time to strike a death though to the worst of all evils extant. Jackson said, "truth is mighty and must prevoil,"—our can-e is bused on truth and we must triumph.

"1118 Paint will stand any climate, without crack or blister, and hardens by exposure, thus making in time an ename! of stone, protecting Wood from decay, and fron and other metals from sust and cordecay, and from and other metals from the factor ristion.

This Paint differs from the so-called Mineral Paints of the day, which are principally Ochres and Clays chlored, and are entirely worthless.

Silver's Phasic Paints are purely Metallic, containing no Alumen of Clay.

They are levigated finely, mix readily with Linxerd Oil, (without the Louble of grinding) and flow under the brush as freely as the best White Lead.

These Paints excel all others in body or covering properties, one pound of which will cover as much properties, one pound of which will cover as much

properties, one pound of which will cover as much surface as two pounds of white lead.

There are four natural colors, viz: Black or Slate, frown, Olive and Chocolate.

DIECTIONS.—This Paths flows readily under the brush and its covering property is increased by using it mixed as thickly as possible with reas Linseed Oil: as the Paint is the lasting or protecting hody and the Oil simply the medium or agent in spreading it.
