BISHOP DOANE'S TRIM.

The Court of Bishop Doane of New Jersey, on the presentment of the three Bistop of Maine, Ohio and Virginia, assembled in Camden, on Thursday of last week. The first three days were occupied principally in discussing the propriety of admitting the Committee from the Diocese of New Jersey, before which the charges against the Bishop had beap previously investigated, and his incocence deciared. They were refused, but the Court subsequently decided to hear, the respondent read any paper prepared by the Committee of the Convention, and to receive the testimony and acts of the said Convention. The Court sits with closed doors, the following is the list of charges prefered against the Bishop—their extravagant that the deficiency at Bristol is not much if any behind this quantity, making the aggregate deficiency in the two shipping points, about a quarter of a million of tons. TRAUD:

All who want Axes of the real Collins & Co. A make should be particular to notice the wamp. as there are various counterfeits and imitations stamped Collins and labelled much like ours, which are fraudulently sold in some parts of the United States as our manufacture. They are made in different parts of the country by various are makers, and are generally their poorest quality. The genuine Collins axes, which have acquired such an extensive reputation, are invariably stamped "COLLINS & CO. HARTFORD." and exch are has a printed label with pay signature. It is now more than Twarty-Pive Trans since we commenced the business with the stamp of "Collins & CO, Hartford," and I do not know of any other aze-maker by the name of Collins know of any other aze-maker by the name of Collins

TO THE FUBLIC.

I HAD not intended to go further into detail in reterence to the recent alleged frauds upon the Mine Hill Railroad, than contained in my late published card, but a recent, malicious sittack upon me, contained in a communication published in The Miners' Journal of Saturday last, leaves me no alternative but to refute the charge there made and, in doing so, "to place the charge there made and, in doing so, "to place the saddie on the right horse." I teel assured that this saddie on the right horse." I teel assured that this attack emanates from the same quarter that has led to the late proceedings against myself, viz: The Forest Improvement Company. That the public may know whether or not this Company is endeavoring to promote or to blind justice, let "facts be submitted to a candid world." OILS, PAINTS, &c. SILVER'S PLASTIC PAINTS. Cheap, Durable and Protective. This Paint differs from the so-called Mineral Paints colored, and are enthrely worthiess.

Iter's Plastic Paints are purely. Metallic, containing no Alumen or Clay.

They are levigated finely, mix residily with Lineed Oil, (without the Louble of grinding? and flow under the brush as freely as the best White Lead.

There Paints erel all others in body or covering properties, one pound of which will cover as much auriace as two pounds of which will cover as much auriace as two pounds of white Lead.

There are four natural colors, viz: Black or Slate, Brown, Olive and Chocolaic.

Directions of This Paint flows readily under the brush and its covering property is increased by using it mixed as thickly as possible with runk Inseed Oil; as the Paint is the lasting or protecting body and the Oils imply the medium or spent in signature flows.

Dear Sit:—You ask me for my opinion of "Silver" Mineral Taints," which you have put on my Machine Shop and Planing Mill. I give you, with pleasure, we will and hearity recommendation of it as a preventative of Fire communicating from Chimneys, or form adoluting whildness. Shop and Planing Mil. I give you, with pleasure, my full and hearty recommendation of it as a preventative of Fire communicating from Chimneys, or from adjoining buildings! The paint which you put on my roofs, has now become as hard as externs, and I feel as becure from Fire, in this direction, as is possible. A few weeks after the roofs had been painted, I made an experiment on two or three shingles by placing them in the furnace under the boilers, the result was, that the portion uncovered was entirely consumed, while the Painted part was apparently sound, though upon examination the wood was found to be charred; the Paint, however, was rian and but little blustered. I consider this as severic a 'test as your Paint can be put to, and under the circumstances i do not hesitate to commend it as an invaluable preventative against Fire. Respectfully, Ac.

"I must now communicate some other important matters. You will have heard through our brethren at Hong Kong an account of the difficulties which have unexpectedly arisen at Amoy, and which threw us into immediate danger here. This movement has come upon us all very suddenly and without any previous indications. "As yet the insurgents have no connection with the Northern revolutionary army; but doubtless the insurrection is only another expression of the rebellious feeling arising throughout the country.
... Bro. Doty, of Amoy, informs us that the rebels have addressed a communication to

the Army in the North proposing to join it, and that the immediate object of the movement is the capture of this province, which they design to present to the new Emperor. "On the 20th inst. a large part of their force left Amey en route for Fuh-Chau, which, they say, they will attack by sea and by land. We are now in daily expectation of their arrival here. /

"The people are considerably excited, but the authorities have succeeded in persuading them that there is no danger of an attack on this city, which does much to calm them, and which will probably have the good effect of keeping things quiet until the rebel forces are upon us, when we think we will be in

"It is scarcely to be expected that all things will pass off so smoothly at Fuh-Chan as they did at Amoy. This is the provin-cial city, and is defended by a Tartar garrison, which will, of course, present soms resistance to the rebel troops. "The people will offer no resistance. As far as we can learn they are in tavor of the asurrectionary movement and will be glad when they are placed under new masters hough they would like the transition to be made without a contest.

" We must have battle at Fuh-Chan.-The contest will probably be short, and principally confined to the city. All the missionry families have concentrated themselves on the island, and together we will await the "We have no indication that either party has any wish to interfere with us. On the contrary, from the rebels we have positive assurances of their protection after they have

reached the city, and our hope is that the present authorities will be able to keep down all riotous excitement until the forces of the rebels come upon the city.

'Yet we know not what awaits us. severe trial lies before us, and we must meet t. May God give us grace to meet it with Christian fortitude and resignation, and enable us to glorify him in the midst of these trying times! We do not yet know to what additional means of safety we shall be obliged to resort.

Perhaps we shall be compelled to resort to the river and leave our houses for a few days. God is with us and gives us his grace, and IA7 M. M. M'CLURE & BRO., No. 257 MARKET | enables us with confidence to rest all the connuences with him. "Yours, very affectionately,
