

The Aliners' Journal POTTSVILLE, PA.

Saturday Morning, Feb. 4

B. BANNAN, Editor and Proprietor:

C. LITTLE, Associate Edito HENRY R. STRONG ON COAL CORPORATIONS. House of Representatives, Harrisburg, Jan. 19, 1854.

B. BANNAN, Eag.—Dar Sir.—I am very much obliged to you for the number of the Mineral Journal of January 14th, which you were good enough to send me, containing the Annual Statistics of the Coal trade for 1833.

As you have entirely mistaken my present position in resultion to the General Mining Law, I hope that he was the form of the first this letter in the you will be kind enough to insert this letter in the

As long as I have the honor of having a sent on this floor, I will oppose the extension of the Mining Law to Schuy kill County, unless the people should with great unanimity declare in its favor.— I do not believe that any law should be forced upon any community against their wishes. Still I be-lieve that the time will come, when some law, allowing associated, capital to be employed in opening mines, sinking deep, shafts to the great Coal seams, in the centre of the basin, now beyond the seams, in the centre of the basin, now beyond the efforts of individual enterprise, and in erecting buildings and furnishing inachinery, will be asked for by the Operators themselves. Until that time comes let it rest.

Instead of a General Mining Law, such as was the article in their corporate capacities, or even purchase it of their tenants. Such a provision I should have introduced into the bill of last seasion, it I had not been over-ruled by others. I regret that I did not be

that I did not do it
You were right in quoting from a Report written by me, in 1861, advising the Dauphin and Susque-hanna Coal Company to rent their mines to indiion upon that subject. You might also, have copied the same solvice from my report on the Broad Top Coal-field, made last Summer, in which I resterated the same opinion to the Broad Top Railroad and Coal Company, actto mine Coal in their corporate capacity. I slways do this when I have an formly convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the first convinced that it is a first convinced to the firs opportunity, as I am firmly convinced that it is not the interest of the Companies themselves that their operations should be confined like those of the Little Schuyikiii, the Herieton, the Beaver Meadow, the Spring Mountain and the Sugar Loaf Companies of the Sugar Loaf Companies nies, to building Railroads, opening Mines, and erecting machinery, leaving to individuals the mi-ning and selling of Coal. The Delaware and North American Companies, in Schuylkill County, and the Beaver Meadow Company upon the Lehigh, present in their histories unanswerable arguments against corporate mining. The Daupain and Sacquenanna, the Lykens Valley, and the several Coul Companies, now just going mis operation upon the Mahanoy and the Shamokin, will all find in time, their tancied profits consumed in solu-ries, agencies, and corporate management, their Coal inned out, their Companies overwhelmed with debis and their credit exhausted. The Hezie ton Company, now one of the most prosperous up-on the Lehigh, was at one time so low, in consequence of mining in its corporate capacity, that its slock sold for tess than Two Dollars per share, turfifty paid. The company abandoned inming, ren-ted its mines to individuals, and now its stock can not be purchased at fifty per cent, above the par-value. I am therefore, with you opposed to cor-

porate mining.

But what I desire is, that Companies should be allowed to do what is out of the xeach of individual, enterprise. Individuals could never have built the Randing Railroad, or constructed the Schuylkill Navigation. Individuals will never sink those great perpendicular shults in, the centre of the Southern Coal-field to the great White Ash Coal southern Which underlie the whole hasin. This must done it Batternia to one if Polisville is to maintain her present pocontinue to be the great source of Anthracite and ought to be maintained; but it cannot be done by building associated capital from her borders.

ces, has been distanced for the first time, in the lit race of fair competition, for a quarter of a century. It now remains with her own people to say, when ther she is to remain in the rear forever.

Erom your invaluable paper of January 14, 1854, PENNSYLVANIA ANTHRACITE
Sent to Market from the cummencement of the Allother Reg'us.

32.047 154,566 154,567 462,045 540,152 446,875 493,247 476,151 603,195 573,271 700,250 674,850 379,283 356,70 535 1,295 (29 1,515,31 1,515,31 1.018.077 4,993,471 5,195 151

20,037,479 43,060,491 tons. Of this increase only 31,110 tons were mined in Schuyikel County. The west part of Schuyikel County which eart its Coal down the Union Canal from Pinegrove, and which is all mined above the Water evel, increased 14,117 tons—the east part of Schuylkii. Country where the Little Schuylkiii Co., open the mines, sink the slopes and individual encoprise has been obliged to hazard its all—where the monuments of bright expectations and runed hopes, are often seen in the intapidated fixtures, near the taulty or worked out innessence, around Pottsvite, and Minersville, and Liewslive, and Port Carbon, and other populous towns.

Coal article of January, 14th:
"Cycles cland Coal Trade - We find in the Combelland Mesters' Journal the following table of the Coal sent to market from that region, from 1842 to 1853 inclusive, which shows the annual

and leet deep, to the great seems which underlie the Coal field. Some of these great collecters will annually rend male a suffice of took of Coal in market, and before it can be done the consumption of Coal in this great country will demand it.

HENRY K. STRONG.

seen changed since his report on the Dauphin creased facilities, we can do better. & Susquehanna Company to 1851, recently quoted in the Journal, from his streamous ad. of Anthracite Coal lies in Schuylkill County, quoted in the Journal, from his strendous advocacy of the General Mining Law in the
and, as the depth of collieries inuer also
born-free acknowledge no superior on earlifeabove
our constitution and naw; and that when a man
born incorreging land becomes a citizen of "those
his explanation, he favored a saving clause"

Twenty years ago, when the exRegions the States," he does "absolutely his explanation, he favored a saving clause increase. Twenty years ago, when the exfor Schuylkill County, but was overruled by pense of opening collieries ranged from \$5001 others. So far, so good.

As to the necessity of Corporations for enerprises too extensive for individual means, no sane person will object to such proposition. Bu: to build a Railroad or dig a Canal is a very different thing from preparing a Colliery and mining Coal. The experience of this Region proves incontestibly that ndividuals are not only able to conduct the business; but that they actually do sink halts, erect the necessary improvements and mine Coal on a large scale, while neighborng Companies are lying idle or content themselves with some trifling work as a ruse o raise the price of their stock in the market. This is what has been done and a still doing, and we know no reason for anticipating any material change in the future.

Mr. S. thinks we must know that Schuyl kill County is fast losing fler pre-eminence in the Anthracite Coal trade. We can as sure him that we are not aware of anything of the kind. If he will throw off the semi-glituminous trade of Darphin County, he will throw off the semi-glituminous trade of Darphin County, he will throw off the semi-glituminous trade of Darphin County, he will throw off the semi-glituminous trade of Darphin County, he will throw off the semi-glituminous trade of Darphin County, he will the stock in the people the great advantages contained to the people the great advantages kil! County is tast losing her pre-eminence-

had a full demand and no stoppages in the trade in 1853. It is notorious that there was a considerable overstock of Schuvlkill Coal in the markets in the Spring of 1853. and that the demand for Coal was unusually slack during the Winter and following Spring up to about the 1st of June-and the trade fell behind the previous year from 60 o 70,000 tons; not from the want of ability supply the Coal, but solely from a want of demand. After that period, the discovery of certain frauds checked the operations of several large Collièries to the extent of at least 50,000 tons. There were an unusual number of turnouts throughout the year, many of the extensive Collieries standing idle for weeks at a time, which affected the Coal. The small operations which have hitherto been confined to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and added to the nerrow seams of Reil Ash in the centre of cities the demand compressed and the centre of cities the cen coal overlaying the white Ash in the centre of the basis, and to the edges upon its northern rim, are insignificant and triding, when compared with this the great increase of intemperance distributed are insignificant and triding, when compared with this the great increase of intemperance distributed are insignificant and triding, when compared with this the great increase of intemperance distributed and in the great increase of intemperance distributed and in this the great increase of intemperance distributed and in the great increase of intemperance distributed and in the great increase of intemperance distributed and in this ground that our industributed and in the great increase of intemperance distributed and increase of intemperance distributed and in the great increase of intemperance distributed and in the great increase of intemperance distributed and increase of intemperanc after the demand commenced; and added to general improvement law, if it were not the tons more. To these causes alone are to be Schuylkill. County, and not to the inability of the Colieries to furnish the Coal. All must admat,

that we have maintained our post tion so has so effectually discussed the whole matter fields opening all around us for reveral years bounds, stopping at no expense, and withdrawing a large number, of hands from the swell worthy of attenuon. The letter of the Pope of Rome to the President is well worthy of attenuon. The letter is carefully regular mining operations of this County.here, and Coal Companies elsewhere, that enabled us to do so—and we might here remark that more than the whole increase of
Anthracite thrown into the market in 1853,
was derived from the Wilkesbarre region,
and that increase the summed by individual and that increase was mined by individual operators, who have recently entered into |

the business in that greatter in opposition to the Companies. None of the Coal Compauies with their "associated capital," increa-48.017 | sed their bur siness in 1853, except the Penn Coal Cop pany, and if we are correctly informer, all their increase was purchased by Company from Operators who mined The increase in the Tamagua portion of the region was caused mainly by the advan- be granted, and the assertion that the writer will

the region was caused mainly by the advantage they possess in having a large and permanent resident population of Miners, who may shower upon jour every kind of the sing and unite us in the bonds of perfect charquently, belonging to the better class of Miners, work more regularly and were not attracted abroad by high wages offered by speculating Coal Companies in other regions, and who, finding many of their bubbles have burst," and their bright visions of fortunes made by "associated capital," vanuable, are now standing idle in an effort to power over some district of country, to induce him teduce the wages of their hands, so as a total content of the government. The blesses are invoked upon the President as an india to the burber of hope, not one property of the unition of which the President is the Chief Magistrate. The letter is much of the same character that the President of the United States might bend to dome barbarous chief, actually exercising sovereign power over some district of country, to induce him. reduce the wages of their hands, so as to to extend his protection to the "Americans" inhab enable them to compete with the individual with the power and authority.

The distinction between authority de facts and why the trade fell off in the middle portion of the region named, in 1853 was, that in this section the Coal mining corporations tended to invest M. Beding with a mission of a broken down in the mining business, and the other made no improvemens on their property the "monuments of bright expectations and idated fixtures"-so graphically described by Mr. S. These Companies are now begging individuals to take hold of their land, and several of these "dilapidated" Collieries

rom any other section of the Coal regions, either in or out of the County of Schuvlkill.

hanced 50 ets., whileour rates (if wise connhanced 50 cts., will cour rates (if wise coniof Pins V against Queen Elizabeth of England,
sel prevails,) will be considerably diminished they affirm that God has constituted the Roman
Pointif, a Prince over all philoss and kingdoms, We agree with Mr. S., that an increase of pant and build." In addition to this, there was considerable Bituminous Coal tent to market from Pennsylvania—and this trade is increasing. The Canal Companity of Coas but states that the tolls paid on Bituminous Coal terring east from Pattsburgh and Holiday burg amount to \$45,156 17. It is therefore probable that the increase of Bituminous Coal in 1853, cannot be less than 310,000 form making with the faceurs of Athlerwise \$515,080 norm, which is totally unacquainted with the capability of t 500,000 tons of Authracite will be required this year—but the secretion that "Schuylkill Regions, the United States." He cisims over them a jurisdiction will be compared the Catholics and the other inhabitants of those this year—but the secretion that "Schuylkill Regions, the United States." He cisims over them a jurisdiction which is this year but states that the toils paid on Bittorian Dittsburgh and Holican berg among to \$15,156 T. It is treated for the assertion that "Schuylkill 1853," among the less than \$10,000 for making with the brease of Anthracite \$15,050 tons, which is just about enough to suppy the dectand.

The Chiang of this require \$15,050 tons, which is just about enough to suppy the dectand.

The Chiang of this require \$15,050 tons, which is in 1854 than she did in 1853," shows that it is totally unacquainted with the capabilities of this Region, and has been misled by the Council of Trent, [page 170] declares authorities in its totally unacquainted with the capabilities of this Region and has been misled by a clerk in which is required in 1854 than she did in 1853," shows that it is totally unacquainted with the capabilities of this Region and has been misled by the few advocates of Coal corporations among this prediction. Several new colliseries it is it few advocates of Coal corporations among this will have levels worked out. One hundred thou and thus may positively be sent to market, but the everal will be everal about the everal will be everal about the everal will be everal to be a server worked out. One hundred thou and thus may positively be sent to market, but the everal will be everal to be a server will be required in 1854 than she did in 1853," shows that it is count to be obeyed; such a mandate is not the few advocates of Coal corporations among this, whom we have heard make use of simple that will be everal to be the exclusive judges of what is wicked and unjust, the "Lord's Flock" in the exclusive judges of what is wicked and unjust, the "Lord's Flock" in the exclusive judges of the continuation of the last fifteen years whead of the demand the supply come from, to supply them.

160,000 tons of Coal to supply them, 160,000 tons of Coal to supply the exclusive proposal and we can assert ton the last fifteen years and the other tond the count of this count. The Catechram of the Council of Trent, [page 170, decl of 699,099 t.n.s? Not from Schuythil, not from the Lechgh; the indicase there, cannot reach 17,000 half a million of tons, provided we had the logistic company, and Lebanon and Hodson Canal Company, and Lebanon and Hodson

quantity of Coal that will be sent to market erry, and submit in all matters clearly spiritual t market, and before it can be done the consumption of Coal in this great country will demand it.

But this cannot be done without capital—and associated capital—individual enterprise is not now were now formed it would take from five to team were now formed it would take from five to team years to put in operation such collieries. By that supply the previous year to the last of June.

I am therefore in favor of a General Law, which

I am therefore in theory of a General Law, which about 60,000 tons. This year the demand I am therefore in tayor of a General Law, which shall be equally open to all, allowing Improvement will be brisk in the early part of the season; and torce to ma decision and stands, the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the matter now stands, the "out-cast" versy, but as the "ou to extend it to Schwikill County without the gen-eral consent of the people. Last year under many disadvantageous cir-REMARKS, In the main we find Mr. Strong cumstances, some of which have already igrees with us on the subject of Corporation been removed, we increased over 100,000. Mining. We interred that his views had tons after June-and this year, with in-

We agree with Mr. S., that the great body to \$1000, we heard the same cry in favor of Sovereignty whatever —words broad enough to companies for opening coal mines. Then no person dreamed of a colliery costing over the law, to include the Temporal Power claimed by the Popes of Rome. 10 or \$20,000; which was considered far beyond the reach of individual enterprise. Now we have collieries erected on the land of other parties, by individual operators, that have cost upwards of \$100,000 -still the cry

have cost upwards of \$100,000—still the cry is the same on the part of the same elass of people, (speculators, not Coal operators,) that charters are absolutely necessary. Does not the history of all the Coal companies moorporated in this region brand the assertion as a falsehood? and what guarantee have we that other companies will be managed any better than those were, if you incorporate them? Cannot land owners associate to gether themselves where tracts are too small to make the necessary improvements, under existing laws, without acts of incorporation?

We snow the Coal operators, that the coal companies moorporated in this region brand the assertion as that what is perfectly plain to ourselves with the solution of the perfect of frequentics in the law and one can possibly understand as it is the solution of the same elass of his countrymen?—ne who beyond all other men by the time of his countrymen?—ne who beyond all other men the countrymen?—ne who beyond all other men the time of his countrymen?—ne who beyond all other men the countrymen?—ne who beyond all other men there in the countrymen?—ne who beyond all other men there in the hearts of his countrymen?—ne who beyond all other men the countrymen?—ne who beyond all other men there is of his countrymen?—ne who beyond all other men there is of his countrymen?—ne who beyond all other men there is of his countrymen?—ne who beyond all other men there is of his countrymen?—ne who beyond all other men there is of his countrymen?—ne who beyond all other men to the her counter who be the countrymen?—ne who beyond all other men there is of his countrymen?—ne who beyond all other men their time of his countrymen?—ne who beyond all other men their time the his countrymen?—ne who beyond all other men their time of his countrymen?—ne who beyond all other men the his collect them the custom of his countrymen?—ne who beyond all other men the his countrymen?—ne who beyond all other men the his countrymen?—ne who beyond all other men the his countrymen?—ne who beyond al existing laws, without acts of incorporation !

We would pursue the subject farther, but want of room compels us to conclude for the remark, that many of our operators are men nan's, also subscriptions received. of wealth, who can command means, and

sire to be let alone. When they are not. to aid them in their business. For ourselves, we frankly state that we

heavy fron rails; and other dreaded hobgoblas and they even say the freaven President Pierce don-interfere, is because Printsylvania is a Governmen Continued. Pet. Pity, New York can't come in for a share of this Petism, she has to build her, steam vessels; can them, carry the mid, go out in search of ship-wrecked Americans, and airthis without "notication". Last week your renders were introduced to the Patagonian Missionaries. Captain Gardiner in garded the South Americans with the eye of a Christian. Most of all therefore he desired, (like the Kev. Mr. Coopen lately starting thither from wrecking of the San Francisco.) to see the enlightened and saved by the holy Cospel. And in 1544 he succeeded in interesting some gentlemen in Brighton, England, who organized a committee to enable Capt. G. to carry out his plan for christian-izing decret Paiagonia. He was not to be dis-compact by apparent failure. Heady to devo-bines if and all he had, he was joined by Mr. Hunt as extensis or interrogatory leagher in a first effort at Caps Gregory. The cool efficatory of the na-tives, their imputent and incessant stealing, and in-creasing indications of violence and murder, made

emasting indications of violence and murder, made it prudent for the missionaries? to withdraw from the field, of which they were then first learning the true character, long enough to prepare themselves for successfully, meeting, the difficulties. Accordingly Capit, G. and Mr. H., taking refuge from the mithless natives, on the first accessible vessel, returned, "perplexed, but not in deepart," (2d Cor. G., S.) to a civilized land and to its enlightened christians who had aided them. Thoughtfully made christians who had aided them. Thoughtfully ma-turing a plan, which might be used of God to pro-tect his raithful servants, in following their Great Exempler in action or in suffering, whichever it might be; they made trial of a decked boat to be not only a conveyance, but a shelter and also a refuge from volence while they imparted with heroix elf-sacrifice the bread of life to the wild and reck-BOROUGH WATER.

As there is now a prospect that we may some cay get a better supply of water for our town than we have had lately it may be the witer to be obtained, and enquire in what suttained, and enquire in what suttained and come for my that could be need for that bleak, unprafitable and dreadingly wave-better Cupe Horn.

ily wave-benten Cape Horn. | lipwas not the refere without persevering effort ad ardient solicitations that Capt. Gardiner succeeand arrange representations of the following many decisions are the chosen purpose. But his representations of its importance to the many living and to the future inhabitant of our extreme South-land, and, above all, his own personal devotion at length prevailed. He initiated his Master, giving himself, others gave dioney, one lady several thousand dollars, boats were provided or little vessels, two in number, oxygen, seems as simple and inert a sub-stance as can well be imagined—having neither color, taste, or smell. To render this less than 30 test long, however, one for a wave vapid fluid palainble, it requires to be mixed to seed dwelling, the other for their various provi
