DUTY ON COAL -- We gave our views length last week, showing the effects of tariffs on the Foreign Coal, and the causes of the fluctuations in prices since 1840. Since then we have received a table of prices of Foreign Coal in the New York market since 1846, contrasted with the prices of Anthracite at the same periods. This table confirms all the

positions we assumed in our article last week, and shows the utter folly of Congress legislating to depress a home trade, amounting last year, (including Anthracite and Bituminous Coal) to upwards of Ten Millions of Tons. un der the expectation of receiving a supply at cheaper rates from abroad, or even reducing the prices of the domestic articles at home.-The true policy is to foster our home productions, and invite capital into the trade, and thus stim'late these productions, and also (which

is more needed at present than the opening of Mines) increase the transporting facilities to market, and the prices will be reduced to a healthy state much sooner than by taking off duties on the Foreign article. It is not so much the amount of duty, as it is the destruction of confidence, and the diversion of capital from the trade, that caused the great fluctuations in prices that have characterized the trade for several years past—the table speaks for itself, and we commend it to the attention of all those who are now seeking to remove the duty from Coal, in order to punish the Coal Operators, while in fact, if they are successful, the chances will be ten to one, that

WHY COMMON SENSE IS RARE.—It often said that no kind of sense is so rare a common sense; and this is true, simply be cause common sense is attainable by all far more, and is a natural gift far less, than most other traits of character. Common sense is the application of thought to common things; and it is rare, because most persons will not exercise thought about common things. If some important affair occurs, people try then to think, but to very little purpose; because, not having exercised their powers on small things, their powers lack the development ne cessary for great ones. Hence, thoughtless people, when forced to act in an affair of importance, blunder through it with no more chance of doing as they should, than one yould have of hitting a small or distant mark,

at a shooting match, if previous practice had not given the power of hitting objects that are large and near.—Elements of Character, REVISING THE TARIFF.—A despate from Washington city on Wednesday, says The Democratic members of Congress met a caucus in the Hall of the House of Rep resentatives, this evening, to consider the recommendation of the Secretary of the Treas ury to revise the present Tariff. Senator Toucey, of Connecticut, occupied the chair, and Mr. Barksdale, of Mass., was appointed Sceretary. The whole work, it may therefore be surmised, will prove a highly attractive and gratifying ornament to the brawing-Rooms or Counting-Rouses of those interested in the Trade, or the landed estates of the Coal Region, for whom, indeed, it has been almost wholly designed. It will serve, moreover, to set forth the form and features of the most prominent of those remarkable men, who, by their isgacity, energy, and enlarged, liberal, and comprehensive spirit have converted barren wastes into exhaustless treasures "richer than Plutus" mines"—who have originated a trade which, "subjecting all nature to our use and pleasure," in its recial and commercial aspect must, in a few years more, fill our "whole boundless continent" with its value and economic importance—it, indeed, it has not already done so. These magnificent Portraits will their attain a peculiar—a priceless value; and it therefore becomes the more desirable that the work should be proceeded with, ere they shall have been called from their earthly tenements, and faded from amongst us forever.

W. M. Hiester, Democrat, of Berks, is elected speaker by the vote of Darsie—Price not voting. This confirms the report of a caucus we had heard of, being held in Philadelphia some days ago, in Judge Black's office, at which were present Darsie, Price and Hiester; when t was fore-ordained that if neither Price nor Darsie could be made Speaker, Hiester should be the man. Well, Mr. Darsie can be handed over to his constituents, while Mr. Price has been politically dead for some time. There is some consolation in that, in the face of such bare-faced treachery.

CONGRESSIONAL. TUESDAY .- SENATE .- The bill of Mr. Brodhead, granting bounty land to the officers and soldiers of the War of 1812, came up. It originated much debate, and was vaiously amended. House.-Mr. Straub asked leave to intro-

duce a resolution, tendering the use of the Hall of the House of Representatives to the soldiers of the War of 1812, in which to hold their Convention on the 8th of January. Mr. Jones, of Tennessee objected, and the matter was laid over. A message was received from the President giving his reasons for vetoing the River and Harbor bill, at the last session. It was re-

ferred to the Committee of the Whole on the state of the Union. On a consideration of the relief of purchas-

ers and locators on swamp and overflowed ands,-Mr. Mayall spoke in opposition to the Reciprocity Treaty between the United States and British Provinces, esteeming it free trade entirely for the benefit of the latter, and explained a bill he intends to introduce, mutually to benefit both parties. He condemned MOROCCO FACTORY.

He condemned the repeal of the Missouri Compromise, as a breach of faith which will prevent the North from en-

tering hereafter into any compromise whatso-The Administration and the Democratic party have cast a firebrand, which has deflagrated the combustible mass, never to be extiuguished. The people of the North are now ready to abolish slavery in the District of Columbia and the Territories, to prevent the admission of any more Slave States into the Union. In Congress the question will have to be met and the battle fought, never to cease until either liberty or slavery shall triumph. Mr. Wentworth, of Massachusetts, reported a bill, preventing the introduction into the United States of foreign criminals, paupers, idiots, insane and blind persons. It was committed to the Committee on Commerce.

WEDNESDAY .- SENATE -The Bounty Land bill was then taken up. In its discus-Mr. Evans said,-There were 434,000 revolutionary soldiers, and 440,000 in the war of

1812; consequently, 140,000,000 acres of land would suffice, if every one gets a warrant for 160 acres. I consider the public lands the great corruption fund, and go for any fair way to get rid of them. House.—The session was occupied almost wholly with the bill amendatary of the act graduating and reducing the prices of public lands to actual settlers and cultivators, and another for the relief of certain awamp land settlers. This last gave a wide scope for

speechifying, on the Know Nothings, European pacific mediation &c. THURSDAY.—SENATE.—Mr. Sumper resented a memorial from citizens of Massachusetts, setting forth the evils arising from emigrants, and particularly from Roman Catholic emigrants; and asking Congress for a law establishing a head tax of \$250 on each foreigner arriving in the country. Referred to the Committee on the Judiciary.—The Bounty land bill was further discussed and variously amended.

THE House took up the swamp land bill again. Mr. Harris, of Mass., undertook to speak, but the Reporter remarks that he "was in no proper condition to speak, and, by the persuasion of a colleague, finally yielded the floor." What was the matter-hadn't got over New Year's yet, eh? A running fire was then started among the members, the burden of which was Know Nothingism, and some capital hits made.

THE POPE'S AIDS AT WORK .- In Albany, New York, on Christmas, the wife of the Mayor of the City distributed a number of books among the children in the Alms House. The Institute was visited by a couple of Catholic Priests, who ordered the Books to be destroyed. The Council of Albany has since passed a resolution forbidding the further visits of Teachers of that sect, until an ample apology is made.

SELF DENYING .- The Rev. Dr. Potter, he new Episcopal Bishop of New York, has oluntarily relinquished \$1000 of the \$6000 oted by the convention as his annual salary. He does this from a conviction of what is right, saying that he can get on very well with

\$5000 a year and rent free. DECISION UNDER THE LIEN LAW .- The ipreme Court, now in session in Philadeliia, have decided that no lien against a building is good unless the lien is filed within six months after the delivery of the material. A argor numbers at the latter rates.

builder may make a contract for lumber or doney on all solvent Banks, mailed in the presence of a brick, and obtain the articles as wanted, and a lien filed six months after the last delivery, is good for the whole bill; but in the absence of any such contract, each delivery becomes a new contract. It was the case of George Duncan es. Elias Philips, error to District Court in Allegheny, in which judgment was reversed, and judgment ordered to be entered for \$22 53, the only item in the account filed which had been furnished within six months of filing the lien. CAPITAL DESTROYED .- Were every ollar invested in the liquor-traffic, absolutely destroyed by a law of prohibition, still community would be the gainer by such a law; for it would be saving men at the expense of money. But the law destroys no values. It may modify them-it may change their relative position—but it destroys nothing intrinsically valuable. It may destroy interestsbut only such as are inconsistent with "the greatest good of the greatest number." It is the traffic, not prohibition, that destroys capital. Says an able writer on this subject: "The money spent for liquor is not only

wasted, but it wastes almost everything else. It is so much capital invested to destroy society. It sends thousands to the poor-house. It destroys the lives of thousands whose minds of the pocket of every taxpayer in the land. The money of the liquor seller is stained with blood, and polluted with crime of every grade. It wrings tears from the eyes of the wife, and groans from the hearts of the orphans. It murders our citizens, and sends their souls to the perdition of ungodly men. And yet we are told that we must not prohibit the traffic, because it destroys capital and injures trade! O, thou God of nations, has it come to this? Must a Christain people encourage the des-truction of mind and the damnation of souls
