ACC 2224 30 Total indebtedness of the County, 21,565 70
The taxes due the county on a large number of fracts of unsested lands purchased by the Commissioners at several Treasurers anisa, subject to redescribton, are not placed to the credit of the county, as it is difficult to estimate the amount which may be realized at a Commission-

mate the amount which may be remarked as also.

We the undersigned Commissioners of Schuylkill County, do hereby certify that the foregoing is a true and correct statement to the best of our knowledge and belief.

Witness our hands and the seal of said County, this sixth day of February, A. D. 1856.

Le. JACUB KLINE, Commissioners.

125 98

Of the sixty acres, about forty are annually in grass, and the remainder in vegetables and Daniel Heim, Abraham Bartolet, grain. This year he cut one hundred tons 32 30 of English hay, which is rather less than an Minersville. John Witzaman. average. Four acres of cabbages-1000 heads to the Daniel Eveland, Isaac Orwig, Jacob Lubold, Amos Hartranst, Daniel Hain. Thomas Weller, v, John S. Knorr, acre. They were of the large drum head Orwigsburg, Eldred, E Brunswig, 1854 in full 1854 in full 1854 in full 1854 in full kind, the heads weighing from 30 to 40 hs each. Wayne, N. Castle, U. Mahantongo Four acres of onions-all gathered-yield 2400 bushels. Emanuel Erdman

Four acres of purple top Swedish turnips average 900 bushels to the acre. Two acres of carrots, 20 tons, to the acre. or at 55 pounds to the husbel, the legal stand-

ard, 730 bushels to the acre. Five acres of winter squashes-four of the marrow variety, 61 tons to the acre-one of a cross variety between the marrow and India. 134 tons to the acre. These are not maximum yields. A half

Che Farmer.

GREAT CROPS .- In a late visit to the

farm of Ephraim Brown of Marblehead, we

were not a little surprised at the large vields

of various kinds of crops which he obtains.

from land which a few years since was rated

at a low price, and only used as a common

pasturage. The track is called Marblehead

creek. It is almost an island, forming the

eastern shore of the harbor, but joined on to

the main land by a low beach. It contains 240 acres. The soil is what he called hard

-the solid rock, which forms the basin, crops

out in many places, and the debris of this.

and granite boulders are scattered over the

surface. Naturally the aspect of the place

. Mr. Brown's first operations were of course

expensive. But the first crops showed that

closed and brought under the plow-exclu-

sive of forty acres at one end of the tract.

which forms a separate farm, and is leased.

was rough and forbidding.

acre of Mr. Brown's carrots has been ascertained to yield at the rate of over 1000 bushels to the acre.

Mr. Brown farms for profit. We shall reveal no business secrets, but are allowed to say that the entire sales for the past year from the ground we have described, will overrun \$7,000 .- Cultivator.

To PRONOTE THE HEALTH OF CATTLE. -Mix, occasionally, one part of salt with four, five or six parts of wood ashes, and give the mixture to different kinds of stock, summer and winter. It promotes their appetites and tends to keep them in a healthy condition. It is said to be good against bots in horses, murrain in cattle, and rot in sheep. Horse-radish-root is valuable for cattle. It creates an appetite, and is good for various diseases. Some give it to any animal that is unwell. It is good for oxen troubled with the heat. If animals will not eat it voluntarily, cut it up fine and mix it with potatoes or

Feed all animals regularly. They not only look for their food at the usual time, but the stomach indicates the want at the stated period. Therefore, feed morning, noon and evening, as near the same time as possible. Guard against the wide and injurious extremes of satiating with excess, and starving with want. Should be of suitable quality, and proportioned to the growth and fattening of animals, to their production in young, and milk, and to their labor or exercise. Animals that labor need far more food, and that which 20 00 is far more nutritious, than those that are idle. In a dry time see that the animals have a good supply of water. When the fountains are low, they drink the drainings of fountains, streams, and passages of water which are un-STATEMENT of outstanding Taxes due the County wholesome.

If barns and stables are very tight and warm, ventilate in mild weather, even in win-

VALUE OF SHELTER FOR SHEEP .-- A correspondent of the Ohio Farmer, Mr. E. Cattel, of Harrisville, Harrison county, Ohio, has tried keeping sheep both with and with-1849 205 35 354 61 1850 1258 45 965 61 46 08 1854 257 53 402 44 out shelter, and has come to the conclusion that it takes from half a bushel to a bushel 1850 598 96 137 01 245 00 more corn to winter a sheep without than with shelter, and asks; "would it not be well 1852 1854 491 54 754 64 57 10 for farmers generally, to make some temporary shelter for the winter and thus save their feed?" We are satisfied that it would. Eren temporary shelter is better than none at all, but permanent sheep sheds, in most places, can be erected so cheaply that few farmers 1850 351 51 573 05 142 00 have any excuse for being without them. Mr. C. cuts all his fodder by horse power in the fall, and stows it away in the barn. This enables him to feed it to much better advantage 1848 44 04 257 14 14 85 under shelter, but he does not find as much 34 93 24 00 advantage from the practice as from shelter-1854 367 41 265 16 20 50 ing stock. 1848 87 89 218 04 1850 37 47 27 66 1851 42 00 79 64 8 08 1853 533 16 340 35 45 50

To preserve meadows in their productiveness it is necessary to harrow them every second autumn-apply top-dressing, and roll them well. The trouble and expense will be richly repaid in increase of crop. STARVE your land, and it will starve
