SHAPING TREES AND SHRUBS .--- Who has not observed the great difference in beau ty between a handsomly dressed tree, and one of uncouth or distorted form of the same species? How often do purchasers of ornament al shrubs and trees anxiously search for sym metrical specimens-forgeting, or not know ing, that the most irregular may be easily 2.75 pruned into any desired shape. If the Dutch 5 00 gardeners display so much skill in training vegetable growth in peacocks and hedgehogs. American gardeners may find an appropriate exercise of their skill in imitating the grace ful and beautiful in nature.

At the present season, or during the commencement of vigorous growth, this desirable object may be most easily accomplished. By occasionally removing a needless shoot, but more frequently shortening-back such as ar over-grown, or pinching-in those that threater to become so, and by lopping certain portions, to induce dormant buds to push where branch es and foliage may be deficient, a degree d skill may be exercised, not unworthy of comparison with that of the artist who developes a beautiful statue from a shapeless block of
