THE LAW OF NEWSPAPERS.

If subscribers order the discontinuance of their newspapers, the publisher may continue to send them until arrearages are paid.

If subscribers neglect or refuse to take their newspapers from the office to which they are directed, they are held responsible until they have settled the bills and ordered them discontinued.

If subscribers remove to other places without informing the publisher, and the newspapers are sent to the former direction, they are held responsible.

The courts have decided that refusing to take newspapers from the office, or removing and leaving them uncalled for, is prima facie evidence of intentional fraud.

ROCK DRILLING MACHINES FOR MINING.
GARDNER'S PATENT,

FOR tunneling or shafting—operated by hand, horse, or steam power. Smallest form of the machine weighs but 80 pounds, can be operated by one man, and strikes 120 blows per minute. The blow is obtained by the compression of an India Rubber Spring; which, expanding, throws the Drill with great force. In conglomerate rock one man can drill a hole 1¼ inches in diameter, 6 inches in depth, per hour—in ordinary sandstone, 2 to 3 feet per hour. It drills equally well at any angle. In a drift-way, 6 feet by 6, two of these machines can be worked. The work of this machine can be seen at Eliel's Tunnel, on Port Carbon road, where it was exhibited. Machines can be furnished of increased power as wanted.

SLATE ROOFING.

THE undersigned, having been largely engaged in the above named business, in and around Tamaqua, for the last few years, is desirous of extending his work to Pottsville, and elsewhere in the county. He keeps always on hand a large assortment of Slates, and guarantees them to be of the best quality—such as will not fade or decay. His roofing is warranted to be tight and durable. The best workmen only are employed, and the cost is but a trifling advance on that of shingles.
