tinent. "The fly of the English," soon became peas so dearly that he will leave the fiver it-an abomination of the Indian, because their self and climb up steep banks to satisfy his appearance in the wood was to them a sure desire, and, alast to fall into snares of wicked men. Other fishes travel in large crowds all sign of the course of the white man.

At their well-known migrations, night long, and a perch in Tranquebar not and which is the intervent. The black ant of the East Indies, especially becomes also and of the second back ant of the back and of the second back and the second back and the back ant of the back and the East Indies, especially, becomes even use ful to man. They travel in countless hordes; hand by and with the sid of the finds to the folds problem as for so the next second s the fields are black as far as the eye can reach, hang by, and with the aid of side fins. and a

In remarkable contrast with this amazing mobility of tishes stands the comparative cockroach or insect can be found after their quiet of Amphibin, which, double dealing creatures as they are, now claim the dry land as their home and now the deep waters .--

The cunning lizard, the creeping snake, the Very different are the migrations of the venomous toad, or the voracious crocodile, in fearful locust, that ancient symbol of mighty fine, all the disgusting animals of this class, whom man looks upon with awe or horror, are fortunately bound to the globe on which nant with the wrath of heaven. Their home they are born, and of them, as of reptiles, few. is in the far East, in places near the desert.— There they deposit their eggs in the sand; when hatched by the heat of the sun, their it any, love to travel. The violent crab of the West Indies and South America is almost the only one among them all that undertakes long journeys. They live on firm land only, young emerge without wings from the ground; but when mature, they rise on the first faint for from the ocean, hid in dark caves or cavbreeze, that stirs, and fly, under the guidance erns of the mountains. Bet once in the year. of a leader, in masses so huge and so dense, that the air is darkened and the sound of their in April or May, the sun, the heat, and love, that the air is darkened and the sound of their wings heard like the murmur of the distant ocean. In immense flights they travel from the Bert to the Way protection for the form cleft and crevice and move in the East to the West, penetrating far into the forth from cleft and crevice, and move in crowds of thousands, so that the ground, the interior of Africa, crossing apparently without roads and woulds are covered with their undifficulty the wide waters between Africa and roads and woods are covered with their uncouth shapes. The vast army travels in Madagascar and from Barbary to Italy. They strict battle array ; first come strong men. have been seen in the heart of Germany, and then the females in closely-packed columns, a few have even been met with in Scotland. The land is as the garden of Eden before fifty to sixty yards wide, and often half an hour long. They prefer moving at night, and the lond rattling of their armor, which sounds them. and behind them a desolate wilderness, for they destroy all vegetable life with unfail like the falling of fierce hail, wakes old and whilst the myriads of corpses which they leave young. During the day they rest at least behind noises the sin and sat ing certainty, and thus often cause famine, behind paison the pir, and not unfrequently produce disease and pestilence. Well did the cool of the evening they set out once more.-Instinct shows them the shortest way to th Jews of old know this fierce plague; and well instinct shows them the shortest way to the ocean; nothing arrests their march, and they tomless pit could appear to the inspired seer in the form of a fearfully armed locuist. Instinct shows them the shortest way to the instinct shows them the shortest way to the ocean; nothing arrests their march, and they never break their ranks. If rocks or walls impede their way, they scale then with un-ting perseverance; if a heast block up tiring perseverance; if a house blocks up

On the easiest rontes and in the most favor their roads, they cooly enter at the open winable element tor locomotion, travel fishes, in dow, trighten for a moment the astonished inincessant movement; even swift birds, in their mates, but move peaceably out at the other rapid and unwearied flight, must vield the side, and pursue their march. If men try to paint to them, the eagle to the shark, the swal- arrest them, they rise with gr at indignation, low to the herring. Their form, also, is so stretch out their huge claw, and ppca and particularly well adapted to swift and easy ' shut it with a loud noise.
