

POTTSVILLE, PA. SATURDAY, AUGUST 16, 1856.

THE AUBURN AND ALLENTOWN RAILBOAD.—We stated last week that this road would be 40 miles in length. This is a mistake. It is only 381 miles in extent. To show that this route must become a great thoroughfare to the West and New York, and will be one of the best paying roads in Fremont's religion, appears in the Cincinnati Gathe United States, carrying Passengers, Merchan- zette, of this morning: dise and Coal to its full capacity, as fast as the rolling machinery is supplied—because the trade already exists—it is not be created, but only transferred to a shorter and cheaper route, we pledge as much Coal from Schuylkill county as they can carry—and furnish it as fast as they can pround the rolling stock to carry it. It will offer to the Tiade of New York city, the means of sending a locked car loaded with goods, direct from Jersey City, to any railroad point in the States of New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Wisconsin, Iowa, and Minnesota.

The advantage of sending goods at once from the city of New York city, to almost any point in the western country, needs only to be stated to be appreciated by all business men, and the initiation of this new system of goods traffic, requires only the construction of our unfinished link of 382 miles of railroad to bring it into action in two years' time:

It also runs tarough the richest portion of the celebrated Iron ore deposits of Lehigh, county, Pennsylvania, from which at the present moment, twelves unthractic furnaces of the largest class, are dise and Coal to its full capacity, as fast as the

It penetrates, almost centrally, the rich and populous counties of Lehigh and Berks, in the State of Pennsylvania, passes through, or near, five flourishing towns or villages, and connects at cince, the town of Pottsville, the center of the antigracite Coal trade, with the city of New York; by a line.

Coal trade, with the city of New York; by a line, only 140 miles long, and secares from that region, within a five hours' trip, a large and valuable trained by the existing route, requires elevant hours' time.

Hestands then as a noble example to the young men of the nation, and they glory in him. He is a fitting leader in the cause of the nobleness of free labor and under his administration we shall establish the principle of free labor in Kansas.

FREE LABOR-that is our motto. Its dignityits usefulness-its moral effect on the character and the destiny-these are our principles. How noble, how manlike, to rally for such an object!-How far beyond the mere party demands that have hitherto nominated our Presidents and animated their partizans!

On what principles and for what objects do the followers of Buchanan-the black Democracyenter this campaign? Ask them, and they will tell you, with parrot like-precision, for "Democ- inst., at 10 clock and 5 minutes. At 1 o'clock and 59 racy." What is Democracy? Democrats, should forsake this false, black Democracy, and select such a leader as John C. Fremont? He is the fittest representative in the worth, the dignity of free labor!

"The course of John Charles Fremont is a pattern, and his success an encouragement to every noble mind, which despising sloth and case; folly and pleasure uspires to an honorable usofulness, to be achieved by meritorious exertions. My Dran Sin:-Your favor of the 1st inst. ought to ave been answered long ago, but absence and business

wel, which by the existing route, requires eleven hours time.

In fact, the Allentown Railroad not only promises to aid greatly in the transmission of goods from and to New York, and to facilitate the wester travel of that city, but it also possesses, within itself, unexampled resources for a heavy local business.

It furnishes too, the only route by which the city of New York can be supplied at all seasons of the year, with the red ask anthracite coal, so highly approved for demestic use, and which is only to be found, in quantity, in the Pottsville Coal region.

Finally, it may be stated, that the combined line opened to the city of New York by sthe Allentown Railroad, will be shorter than the present traveled routes, as follows:

Hair Restorative.—In our columns to-day will be found Prof. Wood's advertisement of the above article, to which we call attention. What it has done we have witnessed upon several of our acquaintances in 2t. Louis. Hair once gray, mot our view, black or brown, as the case might be, being the color of early manhood; and as fine and glossy as silk, and that without any other application than the Restorative. If it has done this upon others, will it not do the vame for any of our readers whose "frosty prows" were once like the "rava nlocks" of Lochiel's warike chief, it they will try it? We think so.—Juct-someille Omstitutionst, Oct. 5, 1953.

The Greatest Discovery of the Age.—It seldom occurs that we notice, under any circumstances, pateut medicines, restoratives, or anything of the kind, for we have a prejudice against most of them. But candor compels us to invite attention to the advertisement of Professor Wood's Hair Restorative. We are too juvenile to require anything of the kind, but some instances of its use have come to our knowledge which almost assure us that it is a soverelgn remedy against the hair becoming prematurely gray. It is not a "Hair Dua," but upon his application, as directed, the effect is groduced upon the skin, which brings out the original colored hair, without stiffness, and gives it a glossy and natural appearance. We have seen persons who have used it, and they are much pleased with it. Examine the advertisement.—Missouri Republican.
