Democratic candidate for Congress two years ago in the Lebanon district, when his personal popularity was shown by carrying that county by a considerable majority, has declared his determination to support Fremont. His reasons are, that ie Buchanan men had departed from the ancient aith and policy of the Democratic party, leaving those who consistently adhere to the true sition he now occupies. If not already enrolled Democratic principles, no other resort than the fersonian principles.

THE LEBANON COURSER .- This staunch advocate of the ticket of Freedom, recently donned a new form-the quarto-which greatly-improves its typographical appearance. Editorially, its pen is wielded in a manner worthy of the great principles involved in the present contest. While congratulating our esteemed cotemporary on the prosperity evinced in the improved appearance of the Courier, we feel assured that the flag which floats at its mast-head, will only be furled when the voice of the nation rises jubilant over the sacess of the body of Preemen, whose motto is-Free Soil, Free Labor, Pree Speech and Fremont.

DANVILLE IN THE FIELD .-- A Premont Club was formed in Danville on Tuesday of last week .--Eighty persons, the majority of them old and prominent Democrats, enrolled their names as members on the first evening. This is among the most striking of the many signs of the times, and proves that the opposition to the present Administration and the truckling Cincinnati platform, have but to exert themselves manfully, to carry this State against Buchanan in November by a large majority. We urge upon the opposition Union, not only upon the State ticket, but Union to make certain the defeat of "Ten Cent Jimmy"-the aristocratic enemy of the working man.

APPROPRIATIONS BY CONGRESS .- The approprintions made by Congress at the session which closed on Monday last, amounted for the different departments, to \$63,604,223; but as the Army Bill, which appropriates about \$14,000,000, was defeated on the last day of the session, that must be deducted from the total amount. In consequence of the failure of the Army Bill; the President determined on an extra session, which met on Thursday. It is doubtful if the bill with its obnoxious Kansas features can be forced through the House. That body is right. The people of the Free States are not inclined to employ a military force to oppress the freemen of Kansas. To demand it, is adding insult to injury.

> EUROPEAN INTELLIGENCE .- Per steamship Afriat New York from Liverpool, we are in posses sion of European dates to the 9th inst. The only important item of news is the circumstance that difficulties have arrien between Russia and the Allies, respecting the adjustment of the boundaries assigned by the treaty of Paris. The occupation by the Russians, of the Isle of Serpenta, is the principal subject of dispute, although the noniclivery of Kars is also considered to demand explanation. In consequence of these misunder-standings the whole of the English fleet remaining in the East, have been ordered to concentrate in the Black Sea to "superintend" the execution o the 20th article of the treaty of Peace. A despatch via. Berlin states that the Russian Minister on his way to Constantinople, is charged to effect an adjustment of these matters. From Spain we are almost destitute of news. Saragossa submitted quietly, and O'Donnell does not seem to have ventured on severities. The whole of Spaln is (according to Government accounts) tranquil, but it is true that Carlist bands are up in the provinces. The total amount of subscriptions for the sufferers by the inundations now amounts to 8,693,251 francs. The accounts of the state of the crops in the interior of Russia are excellent. The Czar's Coronation is now fixed for the 1st of September. Breadstuffs have declined considerably in price in Great Britain.

We said that air was lastic and ponderable or possessed weight. Then the strong be condensed or compressed into less space by applying a compressing force, or it may be expanded and rarified by applying an exhausting force. Now as the expansion of sir takes place under reduced pressures, it follows that at various heights where the superior column is not so great as it is on the surface of the earth, the pressure must be reduced, and the air expanded accordingly. Then a cubic foot of air will weigh more where the pressure of the atmosphere is greatest, than it will in positions where the pressure is reduced. We see that air expands and occupies larger space under a reduction of pressure, and if this reduction of pressure takes place at any part of the earth's surface, and is continued any length of time, a current of air moves towards this part, to supply the partial vacuum, which will continue as long as the vacuum exists, or until the pressure is equalized. A reduction of pressure may be obtained by natural or artificial means: We may conceive this vacuum to be obtained by any blowing machine working in the open air, used to blow air through any pissage or through air brosees or pipes. When the action of the machine takes place, the air in contact with the moving parts of the machine, is slightly expanded on one side of the machine, or on the side from whence the motion recedes; on the other aids it is compressed which will be more or less according to the resistance it meets with, in its passage away from the machine. When a blowing machine is placed in such circumstances, its compressing or condensing force, and it would expand the air in the pass ge, to an equal degree as it was compressed which will be more or less according to the machine. The air put in, motion by machines; massisted by other means, must be governed by the moti

On fract No. 2 is a new engine and shift, already erecnesota, Wisconsin and Iowa, and furnish drafts of lands located by him, with accurate descriptions of the soil, timber, &c. Particular attention will be given to locating land warrants. Persons desiring blim to locate warwants should either leave blanks for the assignees' names, or attach to the warrants Powers of Attorney, authorizing him to locate them in their names. Certificates from the Land Office will be immediately forwarded to these for whom such locations are made. these for whom such locations are made.

June 28, '56 a survey made in 1854, by II. Colt, D.S., Luzerne County. On tract No. 2 is a new engine and shaft, already erected and driven through three veins of good coal. These improvements would enable a party purchasing, to commence operations immediately on a large scale. The opening being on the bank of the canal, the expense of loading boats will be consequently very small. With these facilities, at least 500 tons per day can be lifted from the mine and placed in boats ready for market. The northern extension of the North Brauch Canal is now nearly completed, which will open an entirely new market for the mineral wealth of the Wyoming Valley, and the extension of the situation of these lands will reader them among the first to enjoy its advantages. It should be mentioned also that the large Pittston vein is still to be reached, varying in thickness from 14 to 20 feet. OFFICIAL.

On the 16th, the town of Lecompton was attracted by 800 men under Col. Lanc. The U. S. troops having charge of Robinson, Brown, and the other prisoners, surrendered without firing a gun. Col. tion of the fiscal year, has already caused embar-rassments in the service, and that, if the requisite money be not appropriated, the contracts of enlist-ment would be broken, and the army, in effect, lishanded, as the men could not be paid, and no munitions, equipments or transportation provided. The construction and repair of arms at the public armories must stop, the fortifications and military posts be shandoned, and the army would have to be re-organized before operations could by re-sumed. The President calls attention to the un-protected state in which some of the frontier settiments would be left, as there would be no power to keep the Indians in check.

In the Senate, when the message had been read, a resolution was adopted suspending the operation of the twenty first rule, so far as concerns the Army bill. This rule prevents action on any hill for six days after the organization of

Another resolution was adopted, containing the standing committees of last sesbassed, providing for the signature of such bills as failed for want of time to receive the signa-ture of the presiding officer of each House, or of In the House, the Speaker was authorized to appoint Standing Committees. The President's message was referred to the Committee on Ways troduce an army appropriation bill without the Kansas proviso. Mr. Campbell, of Chio, also made an attempt to introduce the bill with the proviso as it failed on Monday, but without succers. The Committee on Ways and Means being then regularly called for reports, reported this bill. Mr. Orr raised a question that the proviso was not germain to the bill, and was, therefore, out of order. The Speaker overruled the point, and Mr. Orr appealing from the decision, the Speaker was sustained by year 95, nays 79. The House then, by a vote of 101 to 75, went into committee on the bill. Mr. Campbell valuely attempted to enly as it failed on Monday, was passed in commit-tee, and finally passed the House by year 93,

KANSAS. A despatch from St. Louis, save that a party of Free Soilers have attacked and bentana party of Pro-Slavery men, at a town called Franklin, in Kansas, where four men were killed on the side of the latter, and six on the side of the former. The cannon stolen from Lawrence by the border ruffians was recaptured and carried off. Later intelligence has been received, to the effect that a company of Pree Soilers, headed by the man Brown, who has of late been their most reliable and courageous leades, attacked and Barn-ed the canvass town erected by a band of Georgi-ans, near Quawattomic, and which had served merely as a rendezvous for reobers, from whence gangs of marauders were sent forth in all directions to waying and rob the Free State settlers, taking away their horses, wagons, goods, money, etc.— The despatch, which is somewhat obscure, says that Colonel Trendway's company were taken prisoners. This we presume, to refer to a band of the Georgians. Six of the latter were killed.— This attack was fully expected, in various quarters, as these Georgians—alias Missourians become intolerable. The attack on Franklin, as usual with the proslavery press, in all cases where there is a possi-

bility of so representing things, is made to appear a dastardly outrage on the part of the Free Soil-ers. Now, as regards this last Kansas outrage, the North American has a reminiscence which may throw some light on the subject. The North American says:
"We believe that a bloody fight has occurred just as stated, but we believe that all the facts have been distorted. The town of Franklin is one of those nests of ruffianism from whence have issued the predatory bands who have committed so many murders and robberies in the territory. The plunder taken from the persons waylaid upon the roads, and from the farm houses robbed and fired, is there stored. It constitues the principal subsistence of the town. Some of the miscreants who sucked Lawrence city lived there and took their plunder thither. The cannon spoken of in. the telegraphic report as having been captured by the Free State men, belonged to them and was stolen from Lawrence during the sack of that place. A provious attempt was made to storm Franklin and recapture this cannon, as well as the rifles stolen from Lawrence, but it failed on account of the plans of the attacking party having been betrayed previously by some spy. The present telegraphic report is a very pitiful at-tempt to get up an excitement against the Free State men. They have simply taken back their own, and the opportunity for doing so was temptingly left open by the absence of the border ruf-fians on the Nebraska frontier preventing the ingress of northern emigrants. Vague intimations in some of the published letters from Kansas had led us to expect some attack of this kind, and we should not wonder if others were to follow: For he reader must understand that they are expect. ing another invasion from Missouri. All the Ing another invasion from Missouri. All the Blue Lodges are preparing for one grand swoop, when, by a concerted movement all over the Territory, the Free Soilers will be dispossessed of their lands and houses. It may not come immediately, but the belief is that it will not be long postponed. An advertisement in the Washington May in give notice that the first will be a second to the second t

in October, when 208,833 acres will be all, including including the city of Deservorth, and also of sevthe territory will take at eral other towns. The s right close to the Missouri border, and if we cough can be raised for the purpose, an attention will then be made to prevent the Free Soll and on making good their ti-tles. These plants well known in Kansas, but money has been used in the North to aid the set-tlers in securing their lands, and unless violence e resorted to, the plotters must fail. Intelligence from Kansas, via. Chicago, Aug. "The Free soilers have discovered that the organized plan of the Pro-Slavery party is to concentrate men, arms and ammunition at different points in the Territory, for the purpose of making a sudden and general attack immediately after the adjournment of Congress, and expel all the free State settlers. Twelve fortified block-houses have been erected at different Pro-slavery points, which are well supplied with cannon, rifles and ammunition, garrisoned principally by Missouri-

"The border towns are grantly excited, and fine

the pro-slavery leaders in the territory." A large meeting was held in Kansas City, on the 15th, at which it was resolved to send 2000 men immediately into the territory.
