SATURDAY, NOVEMBER 15, 1856. OUR POLITICAL CREED. Deter nined opposition to the extension of Slavery into the Terrifories of the United States and opposition to the acquisition of any Territo-ry, either by annexation, purchase or conquest, for the extension of the area of Slavery. Opposition to say interference with the rights of Slave-holders in the States in which Slavery exists by State law—while at the same time we or sure-noticers in the states in which slavery exists by State law—while at the same time we desire a change in the Fugitive Slave Law, giving the right of trial by jury to establish the claim to a slave, which will bring the law within the limits of the fontilitation.

The above is an outline or main feature of the leading principles this paper will endeavor to alla vocate hereafter. Outside political labor we will in future leave to younger men, whose physical condition is better calculated to bear the excitement and anxiety incident to political empaigns. Our labors in the seascement shall be mainly directed to instruct and entertain; to combat error and corruption when they threaten the public welfare—to publish an horkest, independent of the store of the seascement of the Journal though a long series of years. It shall be our aim "to pursue the even tenor of our way," in the future, unmoved by threats, undismayed by

CORRESPONDENCE OF THE MINERS! JOHNNAT. Maniposa, Oct. 16, 1856. MESSES. EDS.:-The county of Mariposa was visited by the gold hunters at a very early day.— In '48 and '49 their tents dotted the banks of the Merced and its tributaries far up into the mountains. In 1849 the town of Mariposa was laid out; it is situated in the narrow valley of the Marinosa Creek near its source, and on a soil very rich with the precious ore. Quite a number of rich quarta beds have been struck, and fifteen quartz mills have been erected, eight of which are driven by water and the remainder by steam ower. In addition to these, a number of Rasres are in operation, in which the quarts is crushed by horse power. I believe it is generally conceded that this is the richest mining county in the State. About half the mills in the county surance of \$1000 on the house and furniture, in the Ly. put, up a steam mill and made expenditures to the amount of \$600,000. The stock of the company far as the stockholders were interested the entertion was abandoned for a year or two, and was

was mainly taken by English corporations; So prise proved a grand failure. They never real ized anything on their investments. The operarapidly going to decay. This year it was "jumped" by other parties, who have taken out about \$25,000. The celebrated Fremont grant is in this county. It contains an area of thirty three square miles, and embraces within its limits much of the richest mining ground in the county. A number of rich quarts leder have been opened, and several quarts mills have been erected on it. It seems that two young men were addressing a young belle up town, and that she smiled equally upon both. At 9 A. M., one bridestalls of the countries of Asna Frio. Mount Ophir, Sherof the richest mining ground in the county. A mining camps of Agua Frio, Mount Ophir, Sherlocks, Quartzbury, and nome others. This claim was sold by Premont, previous to its confirmation by the Courts, for \$3,000,000, to English capitalists. It however reverted to him, as he was not able at that time to give a clear title. At present it is no source of revenue to him, the settlers on it are willing to pay more than a mere nominal price for their titles, and say that

they are determined to resist by force any attempt. to make them pay the value of the land they have squatted on. Notwithstanding the superior mining advantages possessed by this county, it is behind all the others in enterprise and improvement. There is not a canal within its limits that much exceeds a mile in length, while in the other mining counare 50 or 60 miles long.

But while its sister counties have outstripped it in enterprise, its people have retained the vices of the early Californians. The town of Mariposa with a population of about 6 or 800 contains about twenty gambling houses, in which that vice in all its attractive forms is carried on. Some of them keep orchestras to attract victims. Their tables are generally surrounded day and night by all classes, from the greater to the members of the bar and district judge. Amongst its public institutions are about twenty houses of prostitu tion. Most of them are situated on the main street, with their doors thrown wide open, displaying handsomely furnished apartments, and gaudily dressed inmates. These places are frequented by the leading men of the place publicly,

day and night. Mariposa is the home of Hon. (!) P. T. Harbert, the Democratic Irishman shooter. I am informed that he was known here as the "Mariposa Gambler." He was a fit representative of his constitnency in this county. During a recent visit here, he was received publicly, and resolutions were passed approving his legislative career, and condemnatory of those persons who have spoken disparagingly of him. So you will porceive, that the democracy here approve of shooting Irish
