In and to the Lehigh and Schuyikill regions over \$100,000,000 have been expended in rail-roads, canals and in putting the mines in a conroads, ganais and in pitting the inities in a cost dition to be worked, and now as the product is but 4,610,326 tons, it follows that the outside districts must encounter an increased expenditure in proportion to the production.

Important to the Trade. The last two weeks of mild weather, has had East and also in New York, will in all probability, B chaldron. hold out until the first of April or perhaps longer, should the present mild weather continue. This however, is hardly to be expected, as the Ice King is fully entitled to about four weeks of sway yet, and he generally asserts his authority, either sooner or later in the season. There is already Port Carbon, Pottsville. 2 Schuylkill Haven, terous month, and the stocks will be quite low, if Auburn, not entirely exhausted before the first of April.—
The rivers are open, vissels are plenty, and the freights low for this season—but there is scarcely any demand for Coal at Bichmond, which confirms the above statement. The Canal will be ready, we learn, to pass boats next week, where they are out. With the Railroad and Cawhere they are out. With the Railroad and Canal open, and the great searcity of money, combined with Notes to pay, the trade is placed in a rather perilous situation at present, and it will require considerable forethought and forbearance on Little Schuykili 44,009 17 the part of the Operators now, to pursue a prudent course, and save it from the calamities of last year. The great point to be gained is, TO year. The great point to be games to the START RIGHT, and in order to start right, it is of the utmost importance that no Coal should be to Philad's., 1 90 1 85 sent to market unless it is absolutely sold for Reading. 1 20 1 15 immediate wants, and at nothing less than the opening prices which will be fixed for the Spring business. If the Collieries start now, they will lie comparatively idle in April, -- if the | Wm. Milnes & Co... boatman run their boats early in March, they boatman run their boats early in March, they will have to tie up in April and May, and the business will be irregular throughout the year.

No Coal dealer abroad will buy Coal so long as Dobin & Dehaven, he has old stock on hand, which was laid in at higher tolls &c., than the opening rates will be (if judicious counsel prevails) the presen Again, the product of Schuylkill county this year will in all probability be about 3,500,000 tons in round numbers. There will be about 80 Operators-a gain in price of 15 cents on this quantity amounts to the anug sum of \$525,000-which divided among the 80 Operators, would give upwards of \$6,600 to each. If we start right, this sum can be saved, and the trade will be prosperous-if we start wrong, this sum, in all probability, will be lost to the Region-and the result disastrous to the whole business of the Region. We therefore beg of every Operator to hold off sending Coal to Market, until the prices are settled, and the demand will warrant the filling of his Colliery with Miners for a regular Spring business. Every aid consistent with safety, ought to

be extended to those who are pressed very hard, to enable them to stop until the market requires the Coal. Mr. Rucker intended visiting Schuylkill county in the course of the present week, but his whole time has been taken up in Philadelphia and New York, in arranging the price of freights and tolls between the different carrying companies where they conflict with each others interests. As scon as this business is disposed of, he will visit
Schuylkill county, probably the ensuing week,
when a meeting of all the operators will be called, and a full statement of the conditions of the

when a meeting of all the operations of the ed, and a full statement of the conditions of the Coal Market, and the arrangements made promulgated to the trade officially.

Fernance Surren will sail from New York for Europe on Saturday next. It is hoped that the the drifts, which will unconsciously to the workmen be carried in with the current to be dred by their lights, when they are not the least apprehensive of danger be-ing non.

carried is with the current to be fired by their lights, when they are not the least apprehensive of danger being near.

We see in this system of ventilation that the centre drift in all cases is the main air, and wagon roads by which the air is carried to the workings, and the Coal conveyed from the workings to the shaft. The drifts on each side of the principal exploring drift receive the various currents which are discharged from the districts, working out the Coal on each side of the principal exploring drift receive the various currents which are discharged from the districts, working out the Coal on each side of the exploring drifts, and the air from each district on the same side of the principal exploring drift. Those two drifts communicate with each other near the air shaft, and their currents units and second the six shaft in one body. Then how three drifts which communicate directly fo the shafts are the principal air courses, and the centre drift is open to the downesst or descending air shaft, and receives the whole body of air, saddistributes and apportions it to the various districts which are in operation, throughout the mine, and the side drifts communicate with each other and with the air shaft, and collects all the air returning from each district on their respective sides, thus uniting several currents on tained in each drift are united in one main current by one of the side drifts, communicating with the other by an air crossing built over the centry drift. Then this body ascends wholly through one common air shaft after having been heated and rarified by a ventilating furnace for that purpose.

SUPER PHOSPHATE OF LIME.

THE subscribers present to the notice of farmers and others interested, the above article. The excellency of our preparation has been so well known for many years past, that we deem it unnecessify to say much in respect to its merits, but merely/remark that during a long series of years, its purity and, value as a stimulant for the growing crop, and as a PERMANENT MANURE Have been thoroughly established.
Our Super Phosphate of Line is not changed in its character every season, but is what it purports to be, uniform in its chemical constituents, and is relied upon as 26.790 Union Canal H. R. Coal Transportation DOES, DATS, WHEAT, POTATOES, GRASS, And other crops requiring a vigorous and lasting manure. Pamphlets describing it, and the mode of applying can be had gratuitously at our stores, or by mail when Coal Stocks, AND OTHER SCHUYLKILL CO. STOCKS. CORRECTED WEEKLY BY THOMPSON & DENGLER, BANKERS

There can be no question that the Cherry Pectoral has by its thousands on thousands cures of Cold, Coughs, Ashima, Croup, Indianas, Bronchitia &c., very much reduced the proportion of deaths from consumptive diseases in this country. The Pills are as good as the Pectoral and will cure more compilaints.

the proportion or deaths from constants.

This country. The Fills are as good as the Pertoral and will cure more complaints.

Every body needs more or less purging. Purge the blood from its impurities. Purge the bowels, liver and the whole viscoral system from obstructions. Purge out the diseases which fasten on the body, to work its decay. But for disease we should die only of old age. Take antidoges early and thrust it from the system before it is yet too strong to yield.

Ayer's Pills do thrust out disease, not only while it is weak, but when it has taken a strong hold. Read the astounding statements of those who have been cured by them from dreadful Scrotula, Dropsy, Ulcera, Skin Disease. Rheumstism, Neuralgia, Dyspepia, Internal Palus, Billious Complaints. Heartburn, Headsche, Gout, and many less dangerous but still threatening allments, such as Plmples on the face, Worms, Nervon Fritability, Loss of appetite, Irregularities, Dixiness in the bead, Golds, Foers. Dysentery, and indeed overy variety of complaints for which a purgative remedy is required. These are no random statements, but are gathenticated by your own neighbors and your own phylicians. Try them once, and you never will be without them. Price 25 ceuts per box—5 boxes for \$12.

EAD THIS-OLD AND YOUNG! PROFESSOR WOODS HAIR RESTORATIVE,

Is, no doubt, the most wonderful discovery of this age of progress, for it will restore, permanently, gray hair to its original color, cover the head of the bald with a most luxuriant growth remove at once all dandruff and itching, cure all scrofuls, and other cutaneous eruptions, such as scald head, etc. It will cure, as if by magic,

PROFESSOR O. J. WOOD. PROFESSOR O. J. WOOD—

Drag Str:—Unsolicited, I send you this certificate.—

After being nearly baid for a long time, an chiaving tried all the hair restoratives extant, and having; no shifth in any, I was induced, on hearing of yours to give it a trial. I placed myself in the hands of a barber, sand had my head rubbed with a good wiff brush, and the Restorative then applied and well rubbed in, till the scalp was agiow. This I repeated every morning, and in three weeks the young hair appeared and grew impldly from August last till the present time, and is now thick, black and strong—soft and pleasant to the toych; whereas, before, it was harsh and wirr, what little there was of it, and that little was disappearing very rapidly. I self use your Restorative about twice a week, and shall soon have a good and perfect crop of hair. Now, I had read of these things—and who has not? but have not seen hitherto any case where any person's hair was really benefited by any of the hair tonic, &c., of the day; and it really gives me pleasure to record the result of my experience: I have recommended your preparation to others, and it already has a large and general sale throughout the Territory. The people here know its effects, and have confidence in it. The supply you sent us, as wholesale agents for the Territory, its nearly exhausted, and daily tinquiries are made for it. You deserve credit for your discovery; and I, for one, return you my thanks for the benefit it has done sie, for I certainly had despaired long ago of ever effecting any such result.

[From the Editor of the Real Estate Advertiser.] Boston, 27 School Street, March 20, 1855 Dears, 77 School Street, March 20, 1802.

Dear Sin:—Having become prematurely quite gray, I was induced, some six weeks since, to make a trial of your Restorative. I have used less than two bottles, but the gray hairs have all disappeared; and although my hair has not fully attained its original color, yet the process of charge is gradually going on, and I am in great hopes that in a short time my hair will be as dark as formerly. I have also been much gratified at the healthy inoisture and vigor of the hair, which before was harsh and dry, and it has ceased to come out as formerly.

Bespectfully yours. Respectfully yours.
D. C. M. EUPP.

Professor Wood. CARLYLE, Illinois, June 19, 1855. I have used Professor Wood's Hair Restorative, and have admired its wonderful effect. My hair was becoming, as I thought, prematurely gray, but by the use of his "Restorative," It has resumed its original color, and I have no doubt, permanently so. have no doubt, permanently so.

Sherman of Ohio and Wright of achie see peace had a personal difficulty in the House as Thursday, which came almost to blows. A due't between their was subsequently reported.

A Fine Chance. It appears by the programms of Buchanan's Cabinet as published, that the Treasury and allo the Army and Navy are to be placed in the lands of Southern men. This will afford a fine appear thinly to selie on the Treasury, as recommended.

The Tariff-Later. After considerable debate the Senate has passing of the House Bill, with an amendment offered by Senator Hunter reducing all the present daty 25 per cent; including of course, Iron and Cost. Of course, the House will, or ought to kill the Bill. The Democracy seem determined to shut up all the manufacturing establishments in the country; in order, we presume, to benefit the poor ignorual dupes who cote them into power.

J. Glancy Jenes and the Cabinet, Washington, Feb. 2d.

J. Gliancy Jeries, who declined a cabinet spinontment to callere Mr. Buchansa of any embarrassment concerning Pennsylvania, new says that he will accept, in order to spite Mr. Formey, who headed the opposition to him. This looks as if Buchanan's pet, Forney, is defeated again. What next?

Buchanan's Confidential Advisor. The following from the New York Albion, ne doubt indicates John W. Forney's true position among reputable people: Mr. Buchanan's right hand man is smarting

bitterly under his defeat, and some of the journals that back him up are beat on procheing him compensation. A seat in the Cabinet as Postmaster-General is one of the consolatory ideas suggested; another is a foreign mission. The former does not concern us; the latter may, possibly. Ima-gine this individual sent to represent his country. at the Court of Queen Victoria. We cannot un-dertake to say that he would not be received. It might not accord with diplomatic stiquette to take cognizated of a local transaction, such as that which made Mr. Forney notorious. But the antecedents of a newly appointed Minister are generally well sifted; and after the process in such case is completed, we will venture to say that the cold shoulder would be universally shown him, and that his intercourse with the nation to which he was accredited would not go beyond the strictest red-tape requirements. If Mr. Ferney be really sent abroad, it must be to some such Court as the Russian or Neapolitan, where truthfulness would be quite a superfluity; or the Chinese, where the reputation of all outside barbarians is alike indifferent to the brother of the Sun im, and that his intercourse with the nation to
