Meanwhile, Salvati himself knew no happiness on earth, save in the consciousness that his name could thus strike terror to the hearts of those who in early youth had taught his down to quail. He had been injured, deeply injured; and he had vowed vengeance—nor was he one to breathe such a yow lightly.

In his first manhood, Ludovice had loved; not as worldlings love, but with deep devotedness.—By day he walked through the marble—halls of Salvati Palace, musing on the idel of his soul; by night he closed his eyes only to dream of her. Beatrice Monti was a Florentine, with eyes like midnight when it is bright with stars, and a voice was raised in mercy; it was a forgotten voice was raised in mercy; it was a forgotten word in Florence; while all cried aloud for justice. What recks it what he said, or how he said it, beneath the moonlighted sky, amid breeze and blosom: enough that she heard, it without a frown—that she suswered with a smile; and that, as Salthat she suswered with a smile; and that, as Salvati pressed her to his heart, he called her his—

DAVID WILKOT'S POSITION ON THE TARIFF Question. The Despocratic party with its ally, the Aonest News of Philadelphia, has endeavored to falgify the views of Mr. Wilmot on the Tariff question. It is only necessary to publish the annoxed letter written by the Hon. David Wilmot in 1855, to B. quality of man's aliment, but from its quantity—it is the quantity which prematurely kills milions. A sensible man may eat almost anything with impunity, a simpleton nothing; the former cats like a philosopher, the latter like a pig. The former eats as much as he wants, the latter more than he wants.

In small quantities, and occasionally, manythings may be eaten with advantage, which if eaten continuously for weeks and months, or in inerdinate amounts would occasion serious results.—

There are also times and seasons for different articles of food; for example, fruits and berries, when ripe, fresh, perfect, may be freely eaten in the early part of the day, but if largely eaten after sundamn, especially at some seasons of the year, actually endanger life, and have destroyed thousands.—Hall's Journal of Health.
