(Opposite Mortimer's Hotel,) POTTSVILLE, PENNA. The subscriber, having taken possession of the house formerly occupied by Mrs. E. M. Beatty, has converted the same into a Drug and Apothecary Stere, such as he thinks will prove satisfactory to all purchasers, and respectfully calls the at-tention of his friends and the public to his choice steel He has taken great care in the selection of his Drugs Medicines, &c., and can therefore cheerfully recommen-He has taken great care in the selection of his Drugs. Medicines, &c., and can therefore cheerfully recommend such and every one as being.

PURE AND UNADULTERATED.

He is determined to give his undivided personal attention to his business, at all hoursof the day and night when required, believing that the success and reputation of physiciaus as well as the invaluable tieves of their packets depends in a great measure on the care of the Apothecary and the quality of his drugs and mixtures; and he feels confident that CHRAPKERS, when obtained at the expense of virtue and health, will not be the only question with his custometrs; when once his reputation as a careful and competent Apothecary, shall be satisfactorily established.

This reputation he is determined to build up, with the assistance of a share of the public patronage—a fair proportion of which is guaranteed to him by numerous friends, independently of that which he hopes to obtain by close attention to business and strict attention in mixing prescriptions which may affect the health and lives of his customets.

Deception in the preparing and compounding of medicines for ruthless speculation he will never resort to, though it is noteriously true that such a dangerous deception is much more extensively and successfully practiced by druggites than can be readily imagined.

Confident of obtaining a name and rank amongst the first of his cotemporalies, he only asks attention to prove his will to serve, and his ability to satisfy the most exacting.

Potteville, June 21, '56

CONSUMPTION ND ALL Diseases of the Lungs and Throat are positively curable by inhalation, which conveys the remedies to the cavities in the iungs through the air passage, and coming in direct contact with the disease, neutralizes the inhercular matter, allays the cough, causes a free and easy expectoration, heals the iungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indisponable for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure, it is as much under the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the first stages, and fifty per cent. in the second that the third stage it is impossible to save more than five per cent. for the lungs are so cut up by the disease as to bid definer to medical skill. Even, however, in the last stages, inhalation affords extraordinary relief to the suffering attending this fearful scourge, which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that of the present population of the earth, eight millious are destined to fill the Consumptive's grave.

Trully the quiver of death has no arrow so fa'al as Consumptive's grave.

Trully the quiver of death has no arrow so fa'al as Consumption. In all ages it has been the grist enemy of its, for it sparse negliter age nor text, but sweeps off alias the brave, the beautiful, the graceful, and the gifted. By the help of that Supreme Being, from whom counts every good and perfect gift, I am enabled to offer to the safficted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate effect, produced by their deposition in the lungs, is to prevent the free admis ion of air into the air cells, which canseas weakened vitality through the estimate of the lungs free and the breaking easy after inhaling reue dides. True, inhalation is a local remedy, nevertheless if act and Throat are positively curable by inhalation, which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct, containing the throat the disease, neutralizes the tubercular matter, al-

THE CREATEST Medical Discovery of the Age. R. KENNEDY, of Roxbury, has Discovered in one of our common pasture seeds a semedy that cures

Every Kind of Humor,
from the worst scrofula down to a common pimple.

He has tried it in over 1100 cases, and neverfailed ex-cept in two cases both thunder humor). He has now in his possession over two hundred certificates of its virtue, his possession over two hundred certificates.

All within twenty miles of Boston.

Two bottles are warranted to cure a nursing sore nouth. One to three bottles will cure the worst kind of pimples n tag ince.
Two to three bottles will cure the system of biles.
Two bottles are warranted to cure the worst canker in
he mouth and stomach.
Three to five bottles are warranted to cure the wors :see of Erysipelas.
One to two bottles are warranted to cure all humor in the eyes.
Two bottles are warranted to cure running of the ear running calcers.

One bottle will cure scaly eruption of the skin.

Two or three bottles are warranted to cure the worst are of ringworm.

Two or three bottles are warranted to sure the most

Five to eight bottles will cure the worst case of scrofuls. A benefit is always experienced from the first bottle, and a perfecture is warranted when the above quantity is taken.

Reader, I peddledover a thousand bottles of this in the vicinity of Boston. I know the effects of it in every case. So sure as water will extinguish fire, so sure will this cure humor. I never sold a bottle of it but that sold another; after a trial it always speaks for itself.—There are two things about this herb that appear to me surprising; first that it grows in our pastures, in some places quite plentiful, and yet its value has never been known until I discovered it in 1846—second, that it should cure all kinds of humor.

In order to give some idea of the sudden rise and great popularity of the discovery, I will state that in April, 1853, I sold over one thousand bottles per day of it. Bome of the wholesale druggists who have been in the business twenty and thirty years, say that nothing in the annals of patent medicines was everlikelt. There is a universal praise of it from all quarters.

In myowap practice I always kept it strictly for humors —butsince its introduction as a general family medicine, great and wonderful virtues have been found in it that I never suspected.

Soveral cases of epileptic lits—a disease which was always considered incurable, have been cured by a few bottles. O, what a mercy if it will prove effectual in all cases of that awful malady—there are but few who have seen more of it than I have.

I know of several cases of Dropsy, all of them aged people cured by it. For the various diseases of the Liver. Sick Headache, Dyspepsia, Astham, Feverand Ague, Pain in the side, Diseases of the Spine, and particularly in diseases of the kidneys, &c., the discovery has done more good than any medicine ever known.

No change of dict necessary—eat the best you get and enough of it.

Directions for use.—Adults, one table-spoonful per day—children over ten years, a descret spoonful—children from the object where a day.

ALWAYS SOMETHING NEW. EAD THIS-OLD AND YOUNG PROFESSOR WOODS HAIR RESTORATIVE.

ne doubt, the most wonderful discovery of this age of oreas, for it will restore, permanently, gray hair to it ginal color, cover the head of the hald with a most original color, cover the head of the bald with a most invariant growth, remove at once all dandruff and itching, cure all scrofuls, and other cutaneous eruptions, ruch as scald head, etc. It will cure, as if by marks, nervous or periodical headache; make the hair soft, glossy; and way, and preserve the color perfectly, and the hair from falling, to extreme old age.

The following is from a distinguished member of the medical profession: PROFESSOR O. J. WOOD... PROFESSOR O. J. WOOD.

Data Bir:—Unsolicited. I rend you this certificate.

After being nearly baid for a long time, and having tried all the hair restoratives extant, and having no faith in any, I was induced, on hearing of yours to give its trial. I placed myself in the hands of a barber, and had my head rubbed with a good stiff brush, and the Restorative them applied and well rubbed to, till the scalp was agiow. This I repeated every morning, and in three weeks the young hair, appeared and grew rapidly from Angust last till the present time, and is now thick, black and strony—soft and pleasant to the lower. iures. JOHN BURNISH & CO.

Firm of Bond & Kelley, Druggists, 8t. Paul.

[From the Editor of the Real Estate Advertiser.]

Boston, 27 School Street, Morch 29, 1853.

Dana Sin:—Having become prematurely quite gray, I was induced, some six weeks since, to make a trial of your Restorative. I have used less than two bottles, but the gray hairs have all disappeared: and although my hair has not fully attained its original color, yet the process of change is gradually going on, and I am in great hopes that in a short time my hair will be as dark as formerly. I have also been much gratified at the healthy molisture and vigor of the hair, which before was harsh and dry, and it has easped to come out as formerly.

Bespectfully yours.

Professor Wood.

Cantrie. Illinois, June 19, 1855.

I have used Professor Wood's Hair Restorative, and have admired its wonderful effect. My hair was becoming, as I thought, prematurely gray, but by the use of his "Restorative," if has resumed its original color, and I have no doubt, permanently so. atly so.

OULD call the attention of Rail-

OULD call the attention of Railroad Managers, and those interested in Italiroad
Property, to their System of Locomotive Engines; in which
they are adapted to the particular business for which
they may be required; by the use of one, two, three or
four pair of driving wheels; and the use of the whole,
or so much of the weight as may be desirable for adhes on; and in accommodating them to the grades, curves,
strength of superstruction, and rail and work to be
done. By these means the maximum useful effect of the
power is secured with the least expense for attendance,
costof (uel, and repairs to Road and Engine. With these
objects in view, and as the result of twenty-three years
practical experience in the business by our sentor partmer, we manufacture five different kinds of Engines, and
several clauses or sites of each kind. Particular attention paid to the strength of the machine in the plan and
workmanship of all the details. Our long experience
and opportunities of obtaining information, enables us
to offer these eng ness with the assurance that in efficiency, occurrency, and durability, they will compare favorably
with those of any other kind in use. We also furnish to
order wheels, axies, bowling or low moor tire (to fix centres without boring,) composition castings for bearings;
every description of Copper Shet I on and Boller Works,
and every article appertaining to the repair or renewal
of Locomotive Engines.
