

The home feeling finds no sphere of schools of a some of the comforts of a better life collected, than the glowing tales, of "fold to make" is some distant wilderness demolishes all the fairy scene which tasts and industry had created.

The home feeling finds no sphere of operation; in distant miasmatic regions, among logs, in forests, by some lunely tarn or lake, children are born and grown as far as Pennsylvania is concerned, to be a mere farce—a burlosque on legitimate legislation; but too serious a matter indeed, when we note its affects on the wants and rights of the people. Not content and till thad adopted the \$500 system,—\$10 per week for the year—the Legislature seems determined to ail until \$200 additional is added to the salary of each member. It is bad enough to upon its crests, leaving stillnts and new specu have the people's money fobbed by men who will industry abandoned in the salary of each member. It is bad enough to have the people's money fobbed by men who will industry attandoned in not look beyond their private interests, in a public capacity; but insult is absolutely added to include capacity; but insult is absolutely added to include the state of ed by anybody. The fact is, that the plan upon which legislation is conducted at this day, is bit, dillustrations, pattern plates, etc., are numerous simply withholding from the people what they deeful. Watson & Co., are unsparing in their enask for, and according them what they do no June number can be obtained at Bannan's.

The system of pickings has grown to bale to stitution peculiarly legislative. Billmery and particular interests, are through the highest corruption passed, and then subject of bidder. Private bills are promises effect the traffic money, threats gislature adjourns after object, and finally the sills, not ten of which would passing hundreds were adopted, have passed an inin the abape it were anopieu, may promise would des politicians—for in the delegate electina lies the nominating power, and a nomina- of the Borough. tion in many districts is the precursor of an election and go to Harrisburg to make laws for the intelligent citizens of Pennsylvania. Many members go there, and unblushingly put up their votes and influence, in the market to the highest bidder. Starting with the borers, through the whole ramification, the Legislature is a recking mass of ignorance and corruption. It is true that in both the Senate and House, there are a few in-

of Pennsylvania, who are largely in the majority, scratching out both his eyes-but fracturing his consubmit to the outrage. The remedy is in their tinuations, beyond the hope of decent remedy; scratchhands and should be applied forthwith. Let the ed his hands, and caught one trout about four inches Legislature be transformed from a place of traffic, long. Expenditures, \$3. Receipts, a trout four inches the opportunity long. into halls where henest men will not be ashamed to participate in the proceedings, and where law in your delegate elections; select delegates, equal

are about these: From the whares towards the city of New York, 6 to 7 feet of water only can be carried; but to the Occas, going Chrough States: Island Somet, and theore by Perth Amboy, about 10 feet draught of water can is carried out—but the channel is parrow and de-

to turn out a fine article at \$40 per M. the same quality formerly commanding \$45. Operations at the Pioneer Works have been delayed for some days in consequence of high water in the Schuylkill, interfering with the transportation of material, but by next week work will be resumed.

Mr. Patterson has in his establishment, an ingenious invention by our townsman, Mr. Henry Stranch, which facilitate operations, and is economical to the manufacture of Fire Brick. It is a stamping machine with shaking riddle attached, the fire in operation in the country. Formerly the stamping of the conglomerate and crushing the fire brick, were followed by riddling operations by hand. The fine dust created was very trying to the lungs of the worksson, causing them to cough for hours after coasing work. What the machine stamped in a day would require a man and boy half a day to riddle. Now this is a violed, much to the relief of the men. In point of economy, the machine pays three times its coat in a single year.

Mr. Patterson has devoted much time, money and labor in ascertaining and procuring for his works, more duction of Fire Brick, and has at last, succeeded. Heis now prepared to farmish Fire Erick for furnaces, stoves, etc., equal in quality to any manufactured elsewhere, and as chasp.
