VOULD call the attention of HailVoud Managors, and those interested in Railroad
Property, to their System of Lecomotive Engines. In which
they are adapted to the particular business for which
they may be required; by the use of one, two, three or
four pair of driving wheels; and the use of the whole,
or so much of the weight as may be desirable for adhes'on; and in accommodating them to the grades, curves,
strength of superstruction, and rail and work to be
done. By these means the maximum useful effect of the
power is secured with the least appears for attendance,
cost of fuel, and repairs to Road and Engine. With these
objects in view, and as the result of twenty-three years
practical experience in the business by our soulor partpart, we manufacture five different kinds of Engines, and
several classes or sizes of each kind. Particular attention paid to the strength of the machine in the plan and

rder wheels axies, bowing or tow moor tire to make the composition castings for bearings; very description of Copper Sheet I on and Boller Works; undevery article appertaining to the readr or renewal of Locomotive Engines.

NEW GUANO DEPOSITS. The guano trade-so important to the agricul. turnl interests of the world-is, at the present Way between Arch and Race streets. PHILADEL [March 14, '57. 11-ly oment, attracting special attention in Europe. of a valuable article of commerce, and as long as this is the case the has the power, and perhaps the right, to place a fictitious value on her erports. But monopoly is not the only objection to the Chincha trade. The frequency of revolution in Peru, and the change of Government from vac faction to another has been a seriour impediment. to commerce, and, even as we write, it's impersible to say thether the Islands are in the persession of Vivanco or Castilla, or huw far the foreign vessels loading there can be protected by I.

cal authority. The attention of the Government and people of England has been lately turned to certain tin. ano Islands off the coast of Arabia, situated in Koorya-Morya Bay, about twenty miles from the main land. They were ascertained to be extreme. main late. And a cession of the Islands in lavor of Great Britain was obtained from the Imain of Muscat, of whose possessions they were supposed to form part. They are represented as complete. ly covered with guano; and, though the depth of the deposit has not been ascertained, it is known from actual observation to be more than six feet According to a rough estimate, it is considered that the quantity of guano on the whole good will amount to two millions of tons, with weather favorable for shipping it during eight months ; the year. After the Islands were ceded by the Imaum of Muscet, the British Government, reward Captain Ord, the discoverer, granted hi for five years a license to load the guano for Ex lish ports. An expedition to the Island of His was thereupon fitted out; but when the vers

reached their destination, and some ninety a had been actually shipped, the men were attack and forced to quit by afterge body of Arabs, in refused to recognize the right of the Imaza cede the Islands. Thus the matter stands for the present. In parties who went out on the expedition company that proper protection was not afforded the h the British Government, and ask that, for hele ture, a vessel-of-war be stationed at the Large of the interests at stake, we suppose, will be grad they will draw off European vessels from the Personal

SUMMER MANAGEMENT OF SHEEP. - LI spring do not turn your sheep into the arr until it is well up, or until it andle high as to have something to shade the ground in your sheep close and feed them hay and grad some kind—they will eat it well if tenths spring do not turn your sheep into the wir one summer. He divided them into three proand put them into three large fields, was shade, except what the fence on the south ith shade, except what the fence on the south me cach field made. The sheep lay along the fer and when the noise fly came, the sheep were seen running with their noises to the great fighting the fly, and cating only just court keep life in them. The sheep did not go me than eight or ten rods from the fence, and than eight or ten rods from the fence, and was catten close to the ground, when then a plenty of pasture on the north side of the latest as a consequence, the sheep poisoned themselves the latest are fifth. The fly laid its eggs to

in their own fith. The fly laid its eggs in nestrils of sheep, and they soon died is pumbers of "worm in the head."

Now, you would ask, how should be an asked sheep? He should have put them all its " field and forced them to go farther from them and about two or three days after the first was and about two or three days after the first with the should have changed them to another is whenever you see your about much their down to the ground; drive them to your in passure; the fly will stay about where the same have lain. Here a should be the same about where the same about which we same about where the same about where the

OSAGE ORANGE.-Here, we have one nost popular hedge-plants in America. alothed with glossy and beautiful foliage. grows as freely as a willow, bears the the well, and is armed with a regiment of thorn does not suffer from attacks of the borers. sects. It has been planted extensively at West, and in most localities is said to and every purpose of a farm-hedge. By many cy vators, it is feared that it will not prove soften ly hardy for the Northern States. Above 40° 41° North latitude, it is badly cut down to William Being a native of Arkanens, this is not to rondered at. On the other hand, it is cooks that if the soil is well drained the plant prove hardy enough as far North as Vermi What if the tops are a little frost bitten, it no harm, and only saves so much labor is Spring pruning. Jack Frost works for not Its friends are enthusiastic in its praise, decaand that wherever the Imbella grape or the partitions, it will make the best hedge in the work. ion is, that it will prove a good hodge-plant the Middle and Western States, at least-in milder portions of those States, but it east relied upon for Northern latitudes - incr.

How to BELECT FLOUR.-1. Look at its. if it is white, with a slightly yellowish or polored tine, it is a good sign. If it is very modes were given by old flour, dealurs, a make no spology for printing them, as the tain to a matter that concerns everybody, the quality of which is "the staff of life." Wirmour mixing it with sait, by enclosis lumps in canvass, and putting them int taining brine, butter can be preserved sweet for months. The brine keeps the from becoming raneid, while it does not substance, or interfere with its taste
