It will useless, for although three or four times the shrink before the just indignation of an outraged the inwates of the prime are extremely ignorant, and a the number of the second secon

finally required. And the peculiar character of the boring causes a very great consumption of certain articles which it would be impossible to supply wilbout a long delay after reaching the plains." The party will be amply provided with all the necessary means to encounter the peculiar characteristics of this region, which before snatched away that success which seemed almost within reach. The party will also take out a. small steam engine, which will enable them to push forward the work very rapidly in the easy boring on the "Staked Plain," and relieve the party of much of the heaviest labor.

The party will consist altogether of about 200 sons, including the escort which will number about 125.men, consisting of a full company of infantry, and part of a company of mounted men. The whole escort will be under the command of five commissioned officers. An officer has been detailed to not as Quartermaster to the party. A Physician and Geologist will be attached to

the party, and it will also be accompanied by a skillful artist, who will take sketches of scenery and any remarkable objects, &c. A full set of scientific observations will be car-

ried on, the expedition being provided with most cape. Up with them all; convict them, and give excellent and unusually complete sets of all the them the full extent of the law in the peniteninstruments necessary for astronomical, meteorological, and magnetic observations. The manner the purity of the ballot box; for the sake of the in which the expedition is engaged, remaining everal months in the same spot, and visiting a

number of the most characteristic points, so to speak, in this peculiar region, affords great adrantages for carrying on these observations, and the peculiarity of the climate, (that of the table) and) and of the country, and the comparative fewness of the observations taken in it, will com-

bine to give great interest and importance to the results obtained. The purity of the atmosphere in this region gives peculiar facilities for conducting astronomical observations, A number of gentlenen, sufficient to carry on all these observations in the fullest and most perfect manner, have been sttached to the expedition. The country passed over will be carefully surveyed, and most if not all of the large portions of the country between will thas not been necessary to give a receipt. Coal fres consider that those regions will compare favorably, in dated. The church edifice has been hand the Pecos and the Rio Grande yet unexplored or very imperfectly known, will probably be surveyed and mapped in the course of the expedition. Very full collections of animals, reptiles, birds, insects, &c., will be made, in addition to the very

complete collections of the former expedition. The expedition will be fully organized at Sau Antonio, and will proceed thence to the former camp on the Pecos, and immediately continue the well on the "Liano Estacado," until completed." It is altogether probable that one or at most two sdelphia and Allegheny counties, were regul hundred feet additional depth will be sufficient to | follows: reach water which will rise above the surface of Over and Terminer cases,
