

Miners' Journal. POTTSVILLE, PA.

SATURDAY, SEPTEMBER 18, 1858. THE WORKERS CONVERTION. In another column we give the proceedings the Warkinen's Convention, proper, which as sembled in Mineraville on Monday last. The resplations adopted are spirited, and speak the sentiments of the mass of the workingmen of this County. It is proper to state that when many ing in the above extract, the amount appropriated regularly elected delegates reached Mineraville, and were called upon to enter the room where the Convention was to meet, they lound everything as if the work "will not exceed his estimate ; but "cooked up," if we may use the expression, for their reception. Some self-appointed delegates in connection with other delegates who had previously been delegates in the Cake Convention at Schuylkill Haven, had organized without giving the mass of the delegates the privilege of having a voice in the matter. An Irish "Prisidint" was in the chair. It was moved and carried, that a committee of five be appointed on credentials. The chair was authorized to appoint the committee, which it did so well that it ran the number of the committee up to thirteen eleven Irish, one English and one Welshman. Upon being remonstrated with for exceeding his power, the "Prisidint" replied to this effect-"shure, an' the Convintion tould me to put on the Committee as many diligates as I placed!" This was a stunner to those delegates who did not go there to be handed over like items in a bill of sale, to the highest bidder, so they withdrew and organized the Convention whose proceedings are given in another column. The delegates left were mainly Irish, who while during the day they flourished in the most liberal manner, notes on the Farmers' Bank of Schuylkill County, protested that they were enuine, and hurrabed for Cake. Of course from ham the Cake ticket received an endorsement.-The farce is only equalled in raciness by the recent contest at Mt. Carmel, of Cake's conferees, whose business there of course, was to nominate the Colonel; but who fought most desperately, before they yielded gracefully, to his claims upon their

We have but a word to say in regard to the Cake Workingmen's Convention: It is a transparent humbug, deceiving no one in this County. Under the management of Price, the workingman's friend ! Cake fondly hopes that he is all right, yet like the celebrated fles we read of when the Colonel thinks he has his thumb upon it, it may be not there. "White man bery unsartin." As regards those workmen who indignantly refused to be sold by Price to the Cake faction we say all honor to them. They know their true position, and knowing dare maintain it. Their noble stand on Monday, has cleveted them in the estimation of every honest man, and it will have the effect of encouraging the wavering, and deciding the irresolute. All that the "gallient" Colonel made from Monday's demonstration, he is heartly welcome to.

HOW. JAMES H. CAMPBELL The nomination by the People of this District

of Mr. Campbell, for Congress, is ratified not only by the large mass of the People in meetings assembled, but by the independent press of the District: All recognize that in this emergency, we need a man in Congress who will not only gain for his constituency that respect forfeited by such incapables as Dewart, but who will in thunder tones press upon Congress the recessity of reestablishing those Protective principles advocared by Henry Clay, and under which as embodied in the Tariff of 1842, the country prospered. The People of the Eleventh Congressional Die friet, we are glad to ree, have entered upon this canvass with the determination to support with spirit and elect if possible, such a man. They recognize him in James II. Campbell. Our cotempotary, the Millouian, in speaking of the Pcople's gallant standard bearer, says : 'It would be useless to enter into a labored panegyric of Mr. Campbell, at this time! He is well and favorably known to the people of this District. His name and faur are a part of our nation's history; and we point to him with feelings of pride and admiration. The Republicans of Susquebanna county have Tenominated the Hon, David Wilmot President

By reference to official decembers we find that! the whole amount thus far appropriated for the construction of the Washington Water Works, is construction of the wantington water stores, is \$2.400 000, while the estimate of Captain Meign is \$2.273,244. Captain Meign and those engaged with him on the works, are of the opinion that he cost of the works will not exceed his estimate; cost of the works will not exceed his estimate; but on the contrary may fall consideribly below it. These are facts which have been obtained from the office of the Engineer and Superintendent, and the appropriations can be found in the journals of the Runse of Congress for the years of 1853, '55, '55, '56, '57, and '58. The appropriations for two years were made by a Black Republican Congress. So much for Mr. Randan's verseity on that point, Democratic Standard, (Pottwille) Sept. 4.

It is evident that this Scotch Water Pipe busiess will swamp the party with which the Standard is identified, as the facts of the cost of the Washington Water Works, already corner our diminutive cotemperary. By the editor's nun showto far is \$128,756 more than the estimate of Captain Meige calls for, b. This certainly, does not look on the contrary, may fall considerably below it." What are the facts? Simply these-at the last; ession of Congress, Moige asked for to prosecute the work, a round million. He obtained it. North your he will ask for another million of dollars,

and the year following for still another million, as his estimate for the completion of the whole work was over five millions of dollars. If it costs less it will be the first instance on record of work costing less than estimated by the Engineer, particularly a job for Uncle Sam. It is not at all surprising that the Washington Water Works promise to cost so much, for at this

coment the whole length of Ponnsylvania Avenus a Washington City, is being torn up to enable the ontractor to lay the 12 inch pipes, which are to onvey the water exclusively for the Government buildings. The main pipes (30 inch) are not devered yet, as they are now in process of casting Scotland. As soon as they arrive, the Avenue will be again torn up down the centre, in order to lay them. Mark if you please, most truth-loving Standard, Democratic administrative sconomy, when the Government is "shinning" Wall street, to have its paper done—the pipes are laid from eight to ten feet below the surface. Of course, the ontractor gets paid by the square yard, or he would very soon discover that five feet below the

surface would be an ample depth. Our post-office neighbor has a singular penchan for obtrading his facts and opinions in regard to this Scotch Water Pipe business, and the Washington Works generally, before the public. We advise him in all kindness, for the sake of his party, to say as little as possible, in the future, about the business. The pipes which should have een manufactured of American iron by American workmen, are being east in Scotland, and the men now suffering here for lack of work, are expected to pay over five millions of dollars to benefit a city in which they have no interest, and which many of them have never seen. Are you wish to make the People believe that rending work abroad is a positive benefit. Probably they have an idea in regard to that matter as well as

the Scotch Pipe Democracy, and its brilliant organ

Shall the Dead be Forgotten and their Resting Place Descrated? There is perhaps no subject which can present itself to the mind with, more reverential awe, than the mound of the dead. The quiet field of graves, and the whitened framents of mortality which are often onburned by rude hands to make room for another tenant, and scat tened around these silent babitations. The mind is fuvoluntarily drawn from the bustle and tunuit of the living, and concentrated on the dead, and ponders on the vanity of human digitaritien, as it beholds the lord and slave divested of title, power and servitude, mutually repose in the mansion of death, and mix as they moulder—or those whose last pulestions beat in 'irreconcilable variance, mutually sieps side by side in the cold embrace of the grave.
