It creates, induces, feeds and supports ronchitis, and is slightly or indifferently treated, at hough it was of no serious tendency-never has laid the foundation of that destroying disease, with ut the knowledgehi the sufferers, undermining and sap-Among the numerous classes of discuses which afflic nan, there is none more silent or treacherous in its apaches, or more certain to triumph over its slowly conning victim than the formidable and insidious levele f humanity-Bronchitis, which is produced by extching cold-through a neglect of regulating the state of e howels when arriving at adult age. It seldom exuntil it has sown the seeds of disease and ruffering is he human system by checking the circulation of the t lood, and it is to this source alone that we attribute th

Hence, the sufferer is hacking, hawking, or expectorating a little at a time, with the impression that there is something in his throat that wants to come out and which he desires to grt out.
