General Cameron this (Monday) morning gister which puts down the product of Coal in th United States in 1858, at upwards of 14,600,000 tons. This estimate (which is made up from other estimates, which we know are not always relimble) is at least from 2,500,000 to 3,000,000 ton too high. It is well known that the Coal Trade in the West was greatly depressed in 1858, and we feel confindent that the product would not exceed the following: Mr. Cameron briefly replied, and said that at a proper time he should ask leave to be heard upon

Western Pennsylvania, proper time he should ask leave to be heard after the saliget more at length.

That morever, an effort would be made in the present rear to carry over the road a million of tons market, and also, that in the ensuing Spring the prices for coal at Elizabethport would be fixed be ow the price of 1858." . We clip the above from one of our exchanges.

We have not much confidence in these paper calculations of profits, unless we have all the items of expenditures before us. We are aware that this Company has all the trade in its own hands. They buy the Coal from the producers, who have no other outlets to market, and of equire they can fix their own prices, - but even, with this navantage, no person engaged in the Coals Trade will believe that the profits amount to \$1 40 per ton on the business of 1858, unless they show the figures of all the expenses in detail in their Report, the same as the Reading R. and does.-It must be borne in mind that this Company mine and sell their own Coal and with this profit they have to pay interest and dividends on a capmany stock speculations affort new-u days, and little confidence can be placed in one half of those made. It is a common practice to get up reports by Mining Engineers on certain properties, made to order, for which they are paid and one on which not one particle of reliance can be placed, merely for the purpose of speculation, and confiding people have been thus swindled out of mil-

ferent Coal Regions. re effectually and permanently cured by

Imperial Depurative. This Medicine con mends itself to patients and their confidence, for two reasons—First—it is just what it is represented to be, and will do all that is claimed for it represented to be, and will do all that is claimed for itbut it will not care every disease, because it is especially
adapted and prepared for one class of compilates, and
there it cures—In the Second place, this Medicine is
pure highly concentrated and active—so that it at succe
unsters the disease—if it is cumble. Large doses, nor
long continued use of it is not saked for—One to Three
bottles will in a unajority of cases, eablbit its great curetive properties. In this respect, time and money are not
wasted in long and feutiless efforts to obtain a cure.
In Conversa and Symphous diseases, no medicine has
ever equaled it in its successful cures.
