The Washington correspondent of the Nort American, writing under date of Feb. 9, saye: "Mr. Bigler delivered himself of a speech for home consumption, yesterday, which may be briefly summed up in the following points:-First that there was no such serious disagreement b tween the President and the Secretary of the Treasury, in regard to the tariff, as the public supposed. Second, that he was opposed to the principle of protection for the sake of protection. Third, that he was in favor, if nothing better members of the House of Representatives was scould be done, of raising the duties under the held on Wednesday night, to consider the best spreyent tariff four or five per cent., or returning Hito the act of 1846; and, tourth, that the evils under which the country is now suffering were suferinduced mainly by an inflation of the currency. The Editor of the Register estimates the product of Virginia, Kentucky, Tennessee, the Carolinas, Georgia, Alabama, Arkanras, Miscouri, Iowa, Illineis, Indiana, Michigan, and the Terrisories, at 3,000,000. From the best data we have, it will not exceed 1,000,000 tons-a difference of 2,000. 000 tons. The Coal Trade of Virginia and Illinois in 1858 did not exceed 500,000 tons, if it reached that amount and the trade of all the other States named and the Territories, did not reach 500,000 tons. The Wyoming Canal Company has declared dividend of 3 per cent. What a marked differ ence between private and State management. It the hands of the State there Gauals were losing concerns, but in the possession of grivate companies they will become profitable. The Managers of the Chesapeake and Ohio Ca nal Company have unanimously resolved not to increase their toll on the canal over last year'

rates, made at the suggestion of the Baltimore and Obio Railrond Company. A powerful appeal was made to the Caual Company by the Coal Operators of the Cumberland Region in opposition to the proposition. From this appeal we make the following extract:

The difficulty lies solely in the great remoteness of the Alleghous coal field from Tidewater, and the only possible way of preferring and fostering the coal trade, is by keeping the charges of transportation down to the minimum, otherwise the coal trade of Maryland, except for more local purp sea, must become reduced to a most instantiana amount, if not entirely extinct. It is idde to rely upon the superior quality of the Maryland coal to overcome entirely the natural difficulties arising from the superior market to a certain point this may its remoteness from market—to a certain point this ma be done—the price at which the Haryland cost can b sold in the greatest markets is controlled by the prices of anthractic in New York, of the Nova Scotia coal in Eastern markets, of Broad Top bit diminous coal in Phila-delphia, and of the Blossburg bit uninous coal at Arbany

delphia, and of the Blossburg bit uninous coalat Arbany and Troy.

The largest consumers in New York are awayed in their chilos between Cumberland and Authracite coals by the difference of a few cents beyond the ascertained relative values of the two kinds of eval, which has been established at \$\frac{1}{2}\$ per ton. The iron minuficturers assistand, have, since the establishment of the reciprocity freaty, which admits coal from the British provinces free of duty into the United States, substituted, in great measure, the Nova Scotia coal, and it is only by taking the risks of treights and insurance the mealvest that the Maryland coal operators have been enabled of late to retain any foothold for the produce of their minos in the eastern maskets. The same state of things exists in Albany and Troy with regard to the Pennsylvania bitumious coal, which is delivered there at very low prices via, the Eri-causi. The Philadelphia and Trenton markets are almost entirely lost to Maryland in consequence of the ingreduction of the Broad frop bituminous coal from Pennsylvania. Thus the furket by Maryland coal has become greatly circumscribed, and in this state of things which demands our utnost efforts to sustain this uncompromising competition with coals from other regions, we are now threateoed with a material advance of tolks upon the Chesapeake and Ohlo canal, for the avowed purpose of restoring a portion of the trade to Haltimore. The cost of toll and freight from Cumberland for putting Coal on board vessels at Alexandria

by Canal is \$1 90 per ton. By Railroad at present charges \$2 31. Difference in favor of Canal 41 cents per ton. The old Board of Directors of the Northern Central Railroad leading from Baltimore to Sanbury, have all been ousted except two, at the recent election. John S. SWANKE—Dear Sir—Belleving it a duty 1 owe so the public, and in justice to you, I have thought proper to make known one of the most extraordinary cures, in my own case, that has ever been truly recorded. In the month of October last, I was affilted with a severe gathering in my breast, which formed a large abacess, and sies communicated to my lungs and very much affiliated them, and discharged large quantities of corruption, external and internal. My breath could pass through my lungs and out through the cavity of my breast with apparent case, attended with a violent cough, day and night, foss of appelits, and extreme abbility, so that my physician thought my case hopeless and beyond the power of medicine. I remained in this wretched condition for a long time, until I was wasted to a mere skeleton, and there seemed to be no hope for me; but having read in the public papers of the many wonderful cures performed by your Compound Syrap of Wild Cherry, I immediately sent to Baltimore for average and to my grasful and con using ten bottles I was restored to perfect health.

Over twe years have elspeed, and I still comain a perfectly hearty man at this date, June 2, 1858. I have not had a day's sickness for the last eighteen months.

Please accept my gratful acknowledgments.

Yours, very respectfully, Thomas Dixon, and can testify that he has been affiliced, as Skye terresented. I regard his recovery, as affaired, and a worthy sumber of society. Jagus II. Demonow,

We present a few specimens of the numerous commendations the hook has received:—

The New York Tribuse thus closes a lengthy notice of it—The great importance of the subject and our confidence derived from personal knowledge and personal benefit in Dr. Fitch's suggestions have impelled us to recommend this work. We trust we have said enough to lodge those affirted or threatened with consumption, to procure and read Dr. Fitch's book."

Letter from the Hos. Hashington Fishers, Firmer Governow of New York. "Washington, February 9th, 1853. Dr. S. S. Fitch, Deer Sir I. I beg to return my thanks for the volume you have been so kind as to present to me. The very hurded examination which alone I have been able as yet to give to it, has excited interest and benught the chaviction that the reputation which these Lectures have achieved a based upon intrinsic merit."

Postscript.

Pottsville, Saturday, February 12, 1859.-Why Don't Bushmann Realgn?
The Administration has fallen so much in the cetimation of its own party, that the warmest stacks apon it by the Opposition, in the Unital States Seants, are listened to by the Democratic

enators generally, with indifference. The Tariffe
"Independent," the Washington corresponden of the North American, writing under date of Feb. 10, says:—
"So I'r as any effective action on the part of the Committee of Ways and Means of concerned, the tariff is dead at this seriou. A sideful meeting was held this morning, at which fir. Winter Davis submitted a written proposition that, leasured as there was no accretained majority in the committee in (aver of a particular tariff bill therefold Mr. Phillips should move the as an anison much of rubbillints; land the minority being I the North American, writing under date of bill; that Mr. Phillips anothe move we wanted and the minority bring in theirs on the same conditions. It was forther proposed that Mr. Phillips might have the choice of position in preceding of following the minority. The syss and noes were called with the following constitution.

owing result : Ayes-Meeses. Davis, Morrill, Illoward, Ma-Noss Messre, Phelps, Crawford, Dowdell, Nove-Mesers, Phelps, Criwford, Dowden, Letcher, Phillips—S.

Mr. Phelps suggested that he would have voted in the affirmative if the treasury notes and
tariff were supported, but the minerity would not
consect to that surrender, and the committee, on
a previous occasion, had decided against it. Mr.
Phillips then moved to report the facts to the
House, and sak for the discharge of the committies, which was rejected.

House, and ask for the discharge of the commit-tee, which was rejected,

The result is not surprising, although the con-stant and voluntary professions of Mr. Phillips had authorized a different expectation. His an-tecedents did not. He has now, by his casting vote, refused to allow a modification of the tariff to be even brought before the House for consider-ation, and, by that vote, struck the most deadly blow he could possibly inflict at the interests of his constituents and Pennavivania. There is no esthis constituents and Penasyivania. There is no est-cape from this responsibility, which Mr. Phillips will find to cling to his phittical fortunes like the shirt of Nessus. Let us have no more talk from that quarter of Pennsylvania policy. Habes fol-lemed the averaged of the pennsylvania policy. lowed the example of the democracy in abandonfing the State at the very pinch and prists when saidly was most needed.

After all, the best thing that could be done with

these Northern Democratic politicians, would be to blacken their faces, and send them down South te their masters. It would be unnecessary to put their owners names on hem, as they are already collared and plated.
