spur to our progress and prosperity. On that point the United States Railroad and Mining Register either misapprehends our meaning, or wilfully perverts our expressed, fears. In the Beglish plan for developing our Coal fields, stress Is laid on machinery, English machinery to be used in the work. That is the form in which for-

wign capital will be used, and our industrial inter asts with propriety, protest against such innovation. We have slready learned a dear leason upon receiving foreign capital in the shape of the products of labor, in our system of building railways. Our railway debt to foreign capitalists, who supplied capital in the shape of iron, is estimated to be \$500,000,000, (equal to their entire capital,)

the annual interest upon which amounts to \$40,-000,000. Having no produce to export; the balance of trade being against un we are compelled to meet the payment, by heavy exports of coin .-This heavy drain upon our energies is the result of a policy, which the Register claims to be currect. It certainly is or should be aware that foreign capital rarely finds its way here, except in the shape of products of foreign labor. A ton of place on the approaching Anniversary of our Nairon in the ground is of but nominal value. It is the labor bestowed upon it, before it is turned out Into the perfect rail, which renders it valuable .-And in that shape, at the expense of all that makes a country really prosperous, the encouragement of domestic industry, have our railways been built by foreign capital. Far better we think, it would be, if we had less number of miles of railway, than be indebted to such aid as the Register admires. Far better for us now, if the . Tariff of 1842 had been continued in existence, and by its operations enabled our iron men to furnish even one-half of the amount of iron required ; taken the bonds of the companies; given employment to workmen, and kept here a large per centage of ing purposes.

the integers now mail foreign bondholders., To a miserable strait has this peculiar foreign mode of investing capital in improvements here, brough us, and yet Mr. Fernon's paper pouh-pochs the ides of any such intention in the English project for a new regime in our Coal fields, as if it was impossible. Experience it seems to us, should make us if not wise, at least cautious, of these foreign projects. If European mills and work- by Gen. Wyhtoop, shops are still to furnish iron for our railways, election, and machinery for our colficrits, why in the name of common sense, do we attempt to do business. here at all? Why not stop at once, and, acknowl edge ourselves in, fact, a mere industrial colunial dependency of England or any other nation, with

similar inclination to invest its surplus capital here? We see no reason for changing our opinion of the nature of the proposed experiment, as far is our Coal Fields are concerned, and we are sur-

The indictment charged a forgery of an order payable to the order of Roger Fisher, dated Dec. 10, '58, and the testimony of John Murray showed that this order after it got into the hands of Connelly as Auditor, had been altered, and the amount of the order increased from \$1 60 to \$31 60. It was then given to Murray, who sold it to David Ritter of Middleport, but the order not having been endorsed by Fisher, Murray'took it back to the deft. who then endorsed the name of Roger. Fisher on the back, and it was then handed to Ritter, (Murray and Connelly sharing the proceeds of the order.). It was proved that a large number of other orders had been altered, and the amounts largely increased by deft. and then 're-issued .---Connelly having contrived to get hold of the Town Clerk's books, altered the amounts of the orders entered in the book so as to correspond with the alterations made by him. These facts were proved by John Marray who combined with

youh of its argunization ; the irregular manner n which its practising is conducted, and the difficulty of securing a good ground for play. The fielding of the Club can be materially improved by practice, and we presume that attention will be paid to this matter before the time arrives for the return match, with the Germantowners. The bowling of Messrs. Fox and Mather, of the Pottsville Club, on Saturday last, was remarkably fine, and it required all the skill of the Germantown Club, to defend their wickets, against their impet-uosity. We cannot imagine botter bowling than that of Fox and Mather. On Saturday evening the Germantewn Club

partook of supper at the Exchange Hotel, as the guests of the Pottsville Club, at which a satisfactory social hour was passed. They returned to the City on Monday morning well pleased we believe, with their trip to the Mountain City. The following very neat notice of the match and its attending incidents, we find in Tuesday's Philadelphia North American : ...
