SATURDAY, HOVEMBER 12, 1889. If any fact is calculated to arrest the attention of the commercial men; the public men; the Vermon, manufacturers; the miners; the mechanics, and Mana the laborars of the country, and set them to work Rhode Island, the laborers of the country, and set them to work Connecticut, thinking seriously, it is the fact that of foreign New York, thinking seriously, it is the ince the this year, New Jersey, manufactured goods we have imported this year, New Jersey, ap to this month, some two hundred and eleven milliors of dollars worth, or more by sighty-two millions of dollars than were imported up to that date last year. During the same period we have exported from the port of New York specie and bullion amounting to \$63,~ 270,614, while the exports of domestic produce at the same port for the same period, amounted only to \$48,223,748. We have therefore; during the present year actually sent away from one port \$15,046,866 more specie than produce. Here are

statements which the thoughtful may ponder. In an article on this subject, the Philadelphi North American says truly, that "there are a set of political economists in the country who silect to speer at the use of the term unfavorable balance of trade. They dony that a balance of trade is unfavorable when the difference in the value of shipments of produce between two countries is settled by a transfer of the precious metals from the debtor to the creditor state. These gentlemen, In the profundity of their wisdom, say that all mneariness about the operations of an unfavorable balance of trade is quite irrational. That a man might as well be apprehensive respecting the forces that keep the solar system in place, and regulate the motion of the planets in their starry dance. That it is all right that we should annually ship from our ports millions on millions of doilars. According to them it is the best possible evidence of a healthy trade, and of the sound andeven rigorous condition of our country; and the having this number of Representatives, the orman who would attempt to alter such a state of ganization of the House is a problem, the solution things must be ignorant of all that the most ad- of which attracts much attention and speculation vanced thinkers on sconomies have published to the world, and as a statesman practically seeking to remedy the evil by legislation, he would show himself a bungler, and a mischievous, meddlesome

"It is almost too much for human patience to read in a journal generally well conducted, or to hear in your office, or at your dinner table, from the lips of an oracular looking person, the assertion that the United States does not need the pre-tion that between the two things, nothing in common, the introduction of the figure only diverts the attention from the real question. Now we will point out a resemblance that really does exist between the movements of the precious metals and water. The womens and pro-laver rabble were indiguant at the movements of the precious metals and water. The womers and pro-laver rabble were indiguant at the movements of the precious metals and water. They soon overtook the fugitives! Brown. with Kagi and others, instantly drew up in lines of battle to receive them; and although less than one-fourth in numerical acree, it was evident that they intended to conquer or to die in the defence of the negroes.

We need the precious metals. They are even of vital importance to us. There must be a gradual accomulation of gold in the country if we are to progress steadily in the development of our resources, or, indeed, if we are to make any progress at all .---To industry in each and all of its departments the precious metals bear the same relation that the blood does to the body. The whole organization of the animal depends for its integrity and activity on a due supply of blood, and so the industry of the land, in each and all its parts, requires that the precious metals should be at a certain level, town. and a rising level, too, if the supply is to meet

the demand made on it.
"In view of the fact that we mentioned at the opening of this article—the enormous exports of specie that has taken place for this year—there is no difficulty in accounting for the gloomy aspect that business centinues to wear. No wonder men will not engage in active business when they sees drain going on that they know must soon exhaust them if they possessed a capital of millions. No wonder its barns and storehouses of our western farmers groun with nussleable produce, when that first essential to a remunerative home market, gold, is shipped abroad for the benefit of foreign penalticular who seek their breadstuffs mainly from the countries of Europe. THE HOUSE.

The Congressional elections being over, we are now able to get at the exact political standing of the next National House of Representatives. According to the most caroful reckoning, the various parties will be represented therein as stated in the following tablet

> 113 93 In this statement are reckoned as Republicant only those who were elected as such distinctively, without including any who were supported by party combinations, or who were chosen as Indopendents, even when, as in the case of Haskin, Clark, J. G. Davis, Hickman and others, they received the entire Republican vote, and owe their election chiefly to that party. On the other hand, we have reckoned as Demecrats those who received the regular party nomination, slibough many so classified (as those from Illinois, Montgomery of Pennsylvania, Howard of Obio, and many others) are really Anti Lecompton men .-We have also, of course, reckoned those as members who have the regular return, although there can be little doubt that two or three Democrate who have received the certificates will be compel led, after the organization, to give place to Re-

nablicans. The House then, at the opening of the session on the first Monday in December, will contain 113 Republicans, 93 Democrats, 8 Anti-Lecompton Democrate, and 23 Southern Oppositionists. The whole number being 237, it will require 119, on a full vote, to constitute a majority. No party It is not improbable however, that the Southern Opposition will cheerfully and readily useist the Republicans in promptly electing to the Speakership such an unexceptionable and conservative candidate as Hon. James H. Campbell of Pelnsylvania. This will afford the Opposition an opportunity of exposing at the session the corrup tions of the present Administration, by the immediate appointment of investigating committees.

The omission was suspicious of a purpose to use him as a witness, and yet not to confront him, so as to involve the probability of impeachment. How an Administration which professes to be so sensitive on the subject, and which harangues the multitude so whemenaily, could have let so important a conspiritor escape, is yet to be explored. This inquiry will be put in a move official form, after the meeting of Congress, with snother or two which they may find troublesome to answer.

THE late political contest in Ohio showed the utter want of availability in Stophen A. Douglas as the Democratic exadidate. The battle was fought by the Democrats under his principles and with him for a leader. He visited the State during the canvas and urged his decirines on the voters at great length. amount of the comparatively small sum required of us, to start and complete the Road. Will it not be wiser to make the investment we are called spon to make, and preserve that which is being Mevperiously affected, than to purshe a "penny wise, pound foolish" course? If our husiness and popplation are ever to be won back again, it must be by the building of a railway giving us a direct connection at all seasons of the year, with the Bastern market. The object is, to build the Auburn and Allentown Road with cash, and to be relieved of any debt whatever. Thus the road will pay when other roads whose capitals are soubled up, are unable to declere dividends. In short, the Aubers and Allentown Reilroad is the only means whereby we can save this Region from business annihilation, and place us on a proper footing with other Regions. It now rests with property holders in this County, to say whether it shall be built. Let all be present, at the meeting of Tuesday week; let them hear facts; let them realize the importance of preserving their resent investments here by idvesting in the new roject for our relief; and then let them act .-

CINCINNATI, August 20, 1859.
SIR:—I have lately received information of movement of an GRRAT IMPORTANCE that

feel it to be my duty to impart it to you withou delay. I have discovered the existence of a sedelay. I have discovered the existence of a se-cret Association, having for its object THE LIB-ERATION OF THE SLAVES AT THE SOUTH BY A GENERAL INSURRECTION. The lead-er of the movement is OLD JOHN BROWN, late of Kansas. He has been in Canada daving the winter, Jrilling the negroes there, and they are only waiting his word to stark for the South to assist the slaves. They have one of the leading men, a white man, in an armory at Maryland; I where it is situated I have not been able to large. As soon as everything is ready, those of their where it is situated I have not been able to learn.
As soon as everything is ready, those of their number who are in the Northein States and Canada are to come in small Companies to their randesvous which is in the mountains in Virginia.—They will pass down through Pennsylvania and Maryland, and enter Virginia at Harper's Ferry. Brown left the North about three or four weeks ago, and will ARM THE NEGROES and strike the SLOW in a few weeks, and so that whatever is ago, and will ARM THE NEGROES and strike the BLOW in a few weeks, and so that whatever is done must be done at once. They have a large quantity of arms at their rendegrous, and are prob-ably distributing them already. As I am not fuln their confidence, this is all the information can give you. I dare not sigd my mame to this, but I trust that you will not disregard the warn-

on that account. The Secretary of War, and of course JAMES Buchanan, were therefore, aware of the intended outbreak. Did either take one step to prevent it · They did not.

BEELZEBUB.

BY THE BARD OF TOWER HALL.

Evrywhere throughout creation, From and to the midnight bour, Beelzebub is ever busy, "Seeking whom he may devour."

This we learn from Holy Scripture— Therefore noise lis truth can doubt— Bo, when rings the bell of conscience; Then for Beelzebub look out.

Though he have a foot that's cloven, Yet be gently, lightly goes: And, when he for souls is seeking, Is not apt to stub his toes.

Sure of foot, and stepping softly, Not a footfall you may bear; Yet old Beelsebub will reach you, And be rosting in your ear.

Yes! for he, "of liars th' father,"

If by roaring like a lion, He can drown your inward voice.

Don't you listen to the demon;
If you do, he will deceive,
With the sophistry so subtle,
Whisper'd to our mother Eve.

Do not eat of fruits forbidden By the laws of God and man

Though the sly, old serpent utter, .Freely eat of all you can!"

To a friendship for your neighbors, Sympathy for all distressed, Charity and kind forbestance, Give a home within your breast.

Constancy, and love's devotions Cherish as of self a part; Let not Satau drive the angels From the chambers of your heart.

Let the Right be aye your armour; While the sword of Truth you wield-

MESSES. EDITORS:—The new and beautiful structure of Grace Church; Cressonh. (Episcopal.) was consecrated to the service of Almighty God, on Wednesday morning of this week. The ceremony was performed by Bishop Bowman of this diocese. assisted by the Reverends Messey. Washbure, Prier. Bilabee, Mineer, Lightner, Stone, Latimer, Edwards, Abel and Hatton. The day was fine, and the attendance from neighboring towns large.

The beautiful and impressive service of consecration of the Church commenced at 40½ o'clock, A. M., after of the Church commenced at 40½ o'clock, A. M., after which the regular morning Liturgy was read by the Rev. D. Washburn, followed by the anti-Communion service, read by the Rev. A Prior.

A sermon was then delivered by Bishop Bowman, in which he plainly and forcibly set forth the relative duties of pastor and people; and after reminding the congregation, that long ere the wells of the building this day chasecrated would succumb to the ravages of time, and crumble with decay; the bodies of these who now witnessed its dedication, would be mingling with the dust, directed their attendion to a far nobler temple, not made with hands, Eternal in the Highest, whose builder is 60d, and a temple never to be decayed by the ruthless hand of time, as the temple in which they must expect to meet their reward, for good done when in this world. The Holy Communicania, after which at 1½ P. M., the interesting ceromonics and services were brought to a close.

Fir Cancerous and Scrofulous Diseases, State Hip Disease, Nalignant Ulcers, Ausbuncies, InHip Disease, Nalignant Ulcers of the Mouth and
Let, Scald Itead, Ulcers of the Scin,
and all HUMORS AND IMPURITIES OF THE BLOOD, effectually and permanently cured by Imperial Depurative.

This Medicine con mends itself to patients and their numbers, for two reasons—Prel—it is just what it is presented to be and will do all that is claimed if rittati will not cure every disease, because it is expensible to the cure of the present for one class of complaints and the cure. In the Second place, this Medicine is a configuration of the cure and active—so that it of one. apted any proper in the Secure and active—so that is used are, highly concentrated and active—so that is used assured by disease—if it is curable. Large doses, se nasturable disease—if it is not asked for—One to Theory continued use of it is not asked for—One to Theory could not be a secure and money are bottles will in a majority of cases, exhibit its great cus-tive properties. In this respect, time and money are not wasted in long and fruitless efforts to obtain a cuss. In Cancerous and Scroft love diseases, no medicine his ever equaled it in its successful cures. Tetter, so obtinate and inverse, cannot resist the cleanaing and purifying effects of the Imperial Distri-tive. cleaning and purifying elects of the Market Now obstinate of Uters of every character, no matter how obstinate of the Serrata Derveative.
