Here, then, we thought it settled;
But were speared to find
Our fixtering invitation
Respectfully declined.
We turned to Dr. Hopkins
To help us in the lurch,
Who strangely thought that college
Had claims above our church.

Next we dispatched committees
By twos and threes to urge
The labors for a Sabbath,
Of the Rev. Shallow Spiurge.
He came—a merked sensation,
So wonderful his style,
Following the creating of his boots
As he passed up the siste. His tone was so affecting,
His gestures so divine,
A lady fainted in the hymn
Before the second line;
And on that day be gave us,
In accents clear and load, The greatest prayer ever addre To an oulightened crowd.

He preached a double sormon,
And gave us angels food,
On such a lovely topic—
"The joys of solitude:"
All full of sweet descriptions
Of flowers and pearly stream
Of warbling birds and mosalit
And golden sunset beams. Of faith and true repentance, He nothing had to say: He rounded all the corners, And amouthed the rurged way; Managed with great advoluces To entertain and please. And leave the sinner's conscience Complete at its case.

Completely at its case. Six hundred is the salary
We gave in former days
We thought it very liberal,
And found it hard to rules;
But when we took the paper,
We had no need to urge,
To raise a cool two thousand
For the Rev. Shallow Splurge.

In vain were all the efforts—
We had no chance at all—
We found ten city churches
Had given him a cult:
And he, in prayerful-waiting,
Was keeping all in tow;
But where they paid the highest
It was whispered he would go.

And now, good Christian brothers, That God would send a shepherd,
To guide our church silairs,
With this clear understanding... A man, to meet our views, Must preach to please the sinners, And fill the vacant pews.

BIG BRINDLE.

In Nashville, many years ago, there resided a gentleman of great hospitality, large fortune, and, though uneducated, possessed of hard knot sense. Col. W. had been elected to the Legislature, and had also been Judge of the County Court.

This elevation, however, made him somewhat pompous, and he became very fond of using big words. On his farm he had a large mischievous ox, called "Big Brindle ox." which frequently broke down his neighbors' fences, and committed other depredations. much to the Colonel's annoyance.

One morning, after breakfast, in presence of some large gentlemen who had staid with him over night, and were now on their way to town, he called his overseer, and said to him:

"Mr. Allen, I desire you to impound Big Brindle, in order that I may hear no more of the animadversions on his eternal depredations."

Allen bowed and walked out, sorely puzzled to know what the Colonel meant. So, after Col. W. left for town, he went to his wife and asked her what the Col. meant

by telling him to impound the ox. "Why," said she, "he meant to tell you to put him in a pen." Allen left to perform the feat, which was no inconsiderable one, as the animal was very

wild and vicious, and, after a great deal of trouble and vexation, he succeeded. "Well," said he, wiping the perspiration from his brow, soliloquizing, "this is impounding, is it? Now, I'm dead sure the old Col. will ask me if I have impounded Big Brindle, and I'll puzzle him as bad as he did me."

The next day the Colonel gave a dinner party, and, as he was not aristocratic, Allen, the overseer, sat down with the company.-After the second or third glass had been discussed, the Colonel turned to the overseer and said :

"Eh, Mr. Allen, did you impound Big Brindle?"
Allen straightened himself, and, looking around at the company, said: "Yes, I did; but old Brindle transcended

the impanel of the impound; and scattleophisticated over the equanimity of the forest." The company burst into an immoderate fit

of laughter, while the Colonel's face reddened with discomfiture.

"What do you mean by that, sir?" said he. "Why, I mean, Colonel," said Allen, "that old Brindle being prognosticated with an idea cholery, ripped and tared, snorted and pawed dirt, jumped the fence-tuck to the woods,

and wouldn't be impounded nohow." This was too much; the company roared again, in which the Col. was forced to join, and, in the midst of the laughter, Allen left the table, saying to himself, as he went, "I reckon the Colonel won't ask me to impound

any more oxen." A JOKE FOR THE AADIES .- One of our reportorial brethren lately informed his readers that the ladies always pull off the left stocking last. This, as may be supposed, created some stir among his fair readers, and while in positive terms they denied the statement, they insisted that he had no business to know it. even if such were the fact, and pronounced him no gentleman. He proves it, however, by a short argument. "When one stocking is pulled off, there is another left on; pulling

off this is taking the left stocking off last." RATHER TOO NEAR .- "Do you know the prisoner, Mr. Jones ?"

"Yes, to the bone." "What is his character?"

"Didn't know he had any." "Does he live near you?"

"So near that he has only spent five shill lings for firewood in eight years!" A Long while for an Editor.—The conducter of a country paper says he hopes to continue with his patrons and friends, "A

prosperous and uninterrupted friendly intercourse, till time and space shall be no more." "Bgx," said a father the other day to his delinquent son, "I am basy now-but as soon as I get time, I mean to give you a conformded flogging." "Don't hurry yourself, pa," replied the patient lad, "I can wait."

MEDICENAL. BOERHAVE'S HOLLAND BITTERS ER WATTERDRAL

THE CHLERATED HOLLAND REMEDT FOR BYEPEPSIA, DISEASE OF THE KIDNEYS, LIVER COMPLAINT, WEAKNESS OF ANY KIND. FEVER AND ACUE,

EVERY FARMER AND EVERY YERY FARMER AND EVERY
YAMILY has its peculiar Bitters, compounded according to some favorite recipe, handed down from father to some perhaps. The principle that a tonic atimulant is necessary in every house, is undisputed, yet, being compounded by unskillful hands, often contains elements both incompatible and inconsistent—some timespositive by hurtful. We here offer to the public in a highly concentrated form, what will exactly supply this want, prepared upon scientific principles, compounded of simples, acting in harmony, yet each fulfilling its own remedial office. acting in harmony, yet each fulfilling its own remedial office.

To the Physician is here offered in a convenient form, yet perfectly safe, an incident, which acting upon the circulation, raises the action of the system to the standard of health, especially after any debilitating attack of disease, after depression from heat, or any local or accidental cause; on Anti-Sparmedie, which, with a general stimulant nower, acts with a peculiar influence upon the nervous system, calming nerroun irritation, when taken properly, without the least fendency to the brain, and without that distressing reaction which is the bare of most tonics—often causing moreinjary than theoriginal disease.

most topics—often causing more injury transferring and disease.

As a Toxic, moderately and permanently exalting the energies of all parts of the frame, producing secessarily a healthy increase of the action of the various organs, chemically changing the acidity of the stomach, and acting normally upon the liver in regulating permanently the billiary secretions.

NOTICE—Whoever expects to find this abeverage will be disappointed; but to the sick, weak and low-spirited, it will prove a grateful aromatic cordial, possessed of singular remedial properties.

Cametiem.—The great popularity of this delightful Aroma has induced many imitations which the public should guard against purchasing. Be not persuaded to buy anything else until you have given Borkhary's Hotlayd Biryers afair trial. One bottle will convince you have inductions.

C. W. Epting; Tamaqua, by E. J. Fry; Minersville, J. K. Burns, and in Schuylkill Haven, by Dr. E. Chi-chester. November 27, 58 48-HEALTH OR SICKNESS.

HOLLOWAY'S PILLS

The blood furnishes the material of every bone, mus-cle, gland and thre in the human frame. When pure, it secures health to every organ; when corrupt, it neces-sarily produces disease. HOLLOWAY'S PILLS operate directly upon the elements of the stream of life, neutral-izing the principle of disease, and thus radically curing the malady, whether located in the nerves, the atomach, the liver, the bowels, the muscles, the skin, the brain, or any other part of the gystem.

Used Throughout the World!
HOLLOWAY'S FILLS are equally effications in com-plaints common to the whole buman race, and in disor-ders peculiar to certain climates and localities. Dyspepsis, and derangement of the liver, the source firmity and suffering, and the cause of innumera ent of the liver, the source o

debility.

Delicate Females.

All irregularities and allineats incident to the delicate and sensitive organs of the sex are removed or prevented by a few does of these mild, but infallible alteratives. No mother who regards her own or her children's health should fail to have them within her reach. Scientific Endorsements

The London "Laucet," the London "Medical Review," and the most emisent of the beauty in Great Britain France and Germany, have enlogized the Pilis and their

Holloway's Pills are the best remedy known in th Asthma, Dropsy, Bowel Complaints, Debility, Liver Complaints, Stone and Gravel, Secondary Symp-toms, Venereal Affectio's Worms of all kinds.

DR. COGGSWELL'S NEW MEDICAL SALT For Inflammatory Diseases Only.
New Medical Salt! New Medical Salt! IT IS NOT A CURE-ALL! For Inflammatory Diseases Only.

DR. COGGSWELL'S NEW MED-ical Salt, instead of being a remedy for all illa, has control over but one ill, has but one aim, and ac-compilable but one thing, to wit: subnuzs instrammato-my disasses, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin... liar excellence in that without the uncless loss of blood and strength, it effectually cures Inflammatory Diseases, (no others,) by producing an equilibrium of all the fluids in the body, the want of which is the sole cause of inflammation.

TOTICE TO INVALIDS!!—The following forms which the unbalanced finds assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the NEW MEDICAL SALT, as fire is extinguished by water, to wit: Brain Fever, Headache, liush of Blood to the Head and Heart, Fits, Inflamed eyes, ears, nove, lungs and liver, Neuralgia, Spinal affections, Erysleplas, Bronchitis, Pleurisy, Asthma, Coughs, Dyspepsia, Venereal Diseases, Rheumatism, tiout, Scrofula, and all itching and other cutaneous eruptions. DR. COGGSWELL'S NEW MED-ICAL SALT exerts, like the vaccine matter, an ex-traordinary influence over the veins and arteries, result-ing in a gradual decline of inflammation as indicated by the pulse, which soon resumes its natural state, as the heat pain and fever disappear. DR. COGGSWELL'S NEW MED-l'CAL SALT does just what it claims to do-no more, no less-equalizes the fluids by removing from the system all arterial and vanous obstructions. De-scriptive Circulars may be obtained from any Druggist who has this valuable medicine for sale.

GRASS AND GARDEN SEEDS. PRUIT TREES, GRASS AND GARDEN SERDS. FRUITTERS,
Agricultural Implements, &c.

THE subscriber will keep
on hand clover. Timothy and other Grantessed, together with garden and field seeds, which will warrant to be first and good. He will simiter they are represented, agricultural implement, &c., at of which will be turnished at manufacturer spicer. The seeds and trens sold by the pubertiler are elected with great care, only from growers of reputative and standing. He does not treat in seeds precured promises only in the market, from those who sell charp, wither regard to the character of the seed sold. Nor does he purchase or cell seeds grown promisensity deteriorate their quality, particularly those of the same species. This is an important consideration to those we have chase either seeds or fruit trees. For tree, &c., and in other surly to RENJAMIN BANNAY.

From the American Farmer.

From the American Farmer. WORK FOR NOVEMBER. THE CORN CR P .- The gathering in of the

crop of corn will be carried on expeditiously, It is liable to much waste in the field, and the earlier it is got under lock and key the better; due regard being had, of course, to its safety from heating in bulk. If the corn has been allowed to remain on the standing stalk, it will be much sooner in order for the crib. Otherwise much caution must be used in putting away before cold weather.

FORDER.-The corn crop makes a large body of valuable provender, which should be preserved, and used with the best economy for the stock. If the blades have been preserved, keep a sufficient quantity of them untouched for the Spring and Summer use of working horses. The stalks with leaves on should be fed away early in the season, that the unconsumed portion may be well trolden by the stock. The husks make valuable provender for working oxen, and all parts are

good for milch cows. FEEDING Hogs. - Do not now lose a day in pressing forward the hog feeding. While we would argo by all means, where it can be done, both the grinding and cooking of the food of hogs, we hardly hope to see it practised generally, while Fall work is pressing and it is so very convenient to throw in the whole cars. 'Much economy may be exer.' cised, however, by feeding on plank floors and by soaking the ears in water a little salt. A little powdered sulphur, occasionally, is good for fattening hogs. Rotten wood or charcoal should be strown freely into their pens. Do not feed immoderately when they are first up, but feed so as to keep them in good appetite, and increase gradually until they have become accustomed to their change of life. After two weeks give them all they will eat until at

enough to kill. BEEVES AND SHEEP .- Feeding of Beeves and Sheep intended for butchering, should be carried on diligently if it is intended to get

rid of them by the close of the year. PREPARATION FOR WINTER. Let your preparations for Winter be promptly made, No. 13 North SECOND St., PHILADELPHIA.

TELLEY & BROWN invite the attention of Gush Parchasers to a full assortment of FALL and WINTER Dry Goods, comprising in and have especial reference first of all to the LADIES' WEAR-Black Silks, Poil de Chevres, Coburgs, sufficient protection and better for health than close, ill ventilated houses. made to throw off the water perfectly, and be well supplied with dry straw, or other litter for bedding. Working oxen, milefr cows and calves should each have apartments when they may be fed separately. Horses should not be confined to stalls, but each one should have a box in which he may turn about a pleasure. Sheep should have shelter provided, where they may repair to at will in but weather, and should have the range of a field if convenient, where they may browse um pine or cedar bushes. Hogs should be my apart from other stock. A good shelter a a south hill-side, and plenty of dry leaves for bed, is their most suitable accommodation; the range of a wood lot is desirable for them. MANURES .- The next consideration in the preparation for Winter is with reference to the accumulation and saving of manures .--Every thing that will make suitable litter for stock should be gathered for their penty-They should be got to their Winter quarters early, and should spend much the greater portion of the time in the yards. The sheds should be provided with gutters to throw the water off from the yards, and every cure and precaution should be used to make the best and largest quantity of manure. - The fattering hog pens should be especially looked to, on this point; the rich food they consume, and the imperfect preparation of it, makes this manure particularly valuable. The

> strength and value of manure is in exact proportion to the quality of food used, WATER.—The next point of importance is water. If you have, as many persons have, a vague impression that water is not of much consequence to stock in cold weather, disburse yourself of it at once. There is really more necessity for it in cold than in warm weather, for the reason that they are restrict ed to dry food now, whereas in Summer all they eat is full of water. Nor will one drink a day from an extempore hole in the branch, where the ice had been cut out for the purpose. Have some arrangement for water, either of pump, cistern or spring, by which it may be supplied conveniently three times a day. Learn to think of the wants of your cattle as you do of your own-you want drink at every meal, so do they. Their health requires that they should have their drink in moderate quantities at suitable times. Have water in their yards if possible. If the yards are as dry and comfortable as they should be, there is little occasion for cattle going out of them; when they do go out, see that they go.

Recives. MUFFINS.-Mix a quart of wheat flour smoothly with a pint and a half of lukewarm milk, half a tea-cup of yeast (family), a couple of beaten eggs, a heaping teaspoonful of salt, and two tablespoonfuls of lukewarm melted butter. Set the batter in a warm

place to rise. When light, butter your muffin cups, turn in the mixture, and bake the musiins light brown. SHREWSBURY CAKE .- Stir together three quarters of a pound of sugar, and half a pound of butter. When white, add five beaten eggs, a teaspoonful of rose water, and a

pound of flour. Drop it with a large spoon upon flat tins that have been buttered. Sift sugar over them. SWEET POTATO PIE .- Boil the potatoes very soft, then peel and mash them. To every quarter of a pound, put one quart of milk,

three tablespoonfuls of butter, four beaten eggs, together with sugar and nutmeg to the taste. It is improved by a glass of wine. TURNBRIDGE CAKE. - Six ounces of butter, siz of sugar, three-quarters of a pound of flour, two eggs, and a teaspoonful of rose water.

Stir to a cream the butter and sugar, then add the eggs, flour, and spice. Roll it out thin, and cut it into small cakes. MEASURE CAKE. - Stir to a cream a teacup of butter, two of sugar, then stir in four eggs beaten to a froth, a grated nutmeg, and s pint of flour. Stir it until just before it is

BAKED QUINCE .- Bake until perfecily tender. Pare, core, butter, and sugar while hos, thoroughly mix. Excellent. With care in

baked. It is good baked either in cups or

picking and storing, quinces may be saved for baking until mid winter.
