CONGRESS AND PROTECTION.—The friends the country. of Protection are looking with a great deal of anxiety to the organization of Congress. Every thing depends upon the selection of a Speaker who will appoint a Committee of Ways and Means, that will bring forward a Protection Bill in the early part of the sesan effort at the next session of Congress, because the expense and trouble attending the passage of such a bill will not be undertaken unless there is a reasonable prospect of success. If the Hon. James H. In the absence of the committee, the meeting was addressed by J. Ryon, Beq. The committee then reported the following preamble and resolutions:

WHENEAS, The citizens of the north-western and mid-die Coal Fields in this County have, for many years past, labored under great inconveniences, for want of a more direct communication by Hallroad to the New York mar-

Emiles. That is one the said Company shall full or inspire to build and construct said Railroad, then, and is that case, it is the grade of this meeting that the pro-visions of the whether of the Raboning Valler Railroad visions by propagity and as expeditionally as possible, carried out by the Commissioners appointed by the Legislation for that purpose. The Lehigh Valley Railroad Company is not likely to make the proposed connection, unless assured of gaining the Trade which the Little Schuglkil Company controls and is likely to hold. That Company owas the mais of the Coal lands in that section of the Region, and has leared for a long term of years, the Mahoning Road. It seems probable that our Tamaqua friends, under the eircomstances, would have the burden of expense it constructing the road thrown upon them, with but problematical benefit to them in the future. It appears to us that it would be wise for our Tamsqui friends to assist in constructing the Auburn and Allentown Raliroad, janethre with which they could effect from Port Cilaton. This would place them on an equal footing with other points; and in assisting to construct the Auburn and Allentown Road, they will not experience the difficult ties which assuredly, they will encounter if they

undertake the project under consideration. THE AIR LOCOMOTIVE.

MISSAS. EDITORS:—In your last week's Journal appeared an article from Mr. Esmuel Harrison, giving the result of some experiments he had been making with a Locomotive and using compressed air as the molive power. Scientifically the experiments are quite interesting, not that compressed air as a motive power's by any mean, a new idea, but merely as they show to the curious in such matters some singular results. But, so far as practical utility is coherened I should any that the experiments demonstrate an utter failure. My judgment in the matter, however, may not be reliable, and is therefore, neither here nor there. The object of this communication is more-specially to slicit some further information which I conceive to be of a very important character as connected with the experiments, but which Mr. flarrison has unaccountably omitted. I refer to cost of the compressed air power. It seems to me that the economy of the thing was the mais question to be determined upon, and yet strange to say, not a word is said on the subject at all. The cost operators of this resident upon, and yet strange to say, not a word is said on the subject at all. The cost operators of this resident when any practical set of men, and adversity has made them look at things through a strictly unfiltarian method in the subject at all. The cost operators of this resident, will it may? Will Mr. It. toll the public what the Air Locomotive cost that he experimented with, including the air pumps and all belonging to tit? How long did it take to pump the air into the receiver to a pressure of 300 pounds to the square inch. This ought to be done in a few minutes to make the engine for charles of the same cars and passenters in a much east time, and willyout the air engine at oil, a dictance of at least the majes on the same grade of road?—Why them not use the steam power directly as the proposition of at least the majes on the same grade of road. The Chairman briefly stated that the meeting had been called to receive the report of the gentlemen from New York interested in the Auburn and Allentown Railroad, and to devise means for the completion of that enterprise.

Captain Tyler, by request, spoke at some length, informing the meeting of the present situation of the Project, and stating authoritatively, that if Schuylkill. County would raire: Three Hundred and Fifty Thousand Dollars, New York would undertake to perfect the road, as a first class Coal carrying road, for cash and without a centrol dolt.

The Hon, James H. Campbell, after some preliminary romarks in behalf of the interests of Schuylkill County, offered the following resolution, which was unanimously adopted:

a few days ago, having been precented frem doing their work, and driven by threats of arrest to leave the place.

An account of the sfalr, which propage to be suthern the is so follows; A weathy gentleman of New Jerrey, understood to be a Mr. H. J. Garrison. Sermely, a dry goods merchant of Trenton, who removed to a locality, mear Charlestown in 1854, or about that time, having concluded to remain permanently at the latter piace, had partly built a house, which he designed to cover with a metallic roof.

Preferring the work of northern mechanics, or finding it impracticable to get it done without incurring the considerable expense of bringing them so great a distance, he came on to Trenton and engaged two time workers, who had been employed at the hardware salabishment of it. Brearly & Co., of that city. Taking them with him he roturned to his southern home, and the work was about being commenced. But the Virginians had no idear of allowing any such proceeding; nolody know but this was a contrivate of the abolitioniate at any rate it could not the permitted. So they threatened the timorkeds they would arrest them and deal summarily, with them if they did not forthwith depart, and the mechanics, to avoid trunble, specialized to go home. Their employer was at the same time informed that his house might remain, forever uncovered if he could not get it roofed without gending to the north for abolitioniats to do the wark.—N. F.
