July 23, 759 30-1 year DR. COGGSWELL'S NEW MEDICAL SALT! New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL! R. COGGSWELL'S NEW MED-ICAL SALT, instead of being a remedy for all illa, has control over but one ill, has but one aim, and accomplishes but one thing, to wit; suspens inflammato-BY DISSAS, whatever be its form of locality, whether in the head, throat, abdomen, extremitles or skin. NEW MEDICAL SALT.—Its pecu liar excellence is, that without the uncless loss of blood and strongth, it effectually cures Inflammatory Discares, (no others,) by producing an equilibrium of all the finish in the body, the want of which is the sole cause of inflammation.

NOTICE TO INVALIDS!!—The following forms which the unbalacced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the NEW MEDICAL SALT, as five is extinguished by water, to wit: Brain Fever, Headache, Rush of Blood to the Head and Heart, Fits, Indiamed eyes, ears, nowe, lungs and liver, Neuralgis, Spinal affections, Erysipelas, Bronchits, Pleurisy, Asthma, Coughs, Dyspepsia, Veneral Disesses, Rheumatism, tiout, Scrofula, and all itching and other cutaneous cruptions. DR. COGGSWELL'S NEW MED-ICAL SALT exerts, like the vaccine matter, an ex-traordinary influence over the veins sud arteries, result-ing in a gradual decline of inflammation as indicated by the pulse, which soon resumes its natural state, as the heat pain and sever disappear.

DR. COGGSWELL'S NEW MED-ICAL SAIT does just what it claims to do—no more, no less—equalises the fluids by removing from the system all arterial and vencus obstructions. The seeds and trees sold by the subscriber are selected with great care, only from growers of reputition and standing. He does not deal in seeds procured primise ourly in the market, from those who sell cheap, without regard to the character of the seed sold. Nor does had purchase or sell seeds grown promisenously in many gardens, where their too close proximity deteriorate their quality, particularly those of the same species. This is an important consideration to those who purchase either seeds or fruit trees. For trees, &c., send in orders early to

TO CHOOSE POULTRY, CAME AND MEATS TURKEY.-The cock-bird when young has a smooth black leg with a short spur. The eyes bright and full, and moist supple feet when fresh; the absence of these signs denotes age and staleness; the hen may be udged by the same rules and is the best. Fowls like a turkey; the young cock has a smooth leg and a short spur; when fresh the vent is close and dark. He is when young have smooth legs and combs; when old these will be rough; a good capon has a thick belly and a large rump, a poll comb and a sweling breast.

GEESE. -In young geese the feet and bills will be yellow and free from hair. When fresh the feet are pliable; they are stiff when Ducks may be selected by the same rules,

Pigeons, when fresh, have supple feet, and the vent will be firm; if discolored and supple they are stale. PLOVERS, when fat, have hard vents; but, like almost all other birds, may be chosen by the above rules.

HARES. When a hare is young and fresh, the cleft is the lip is narrow, the body stiff, the ears fear easily, and the claws are smooth and shafp; and old and stale hares will be the opposite of this. Rabbits the same.

Parrandors.—Yellow legs and a dark bill

are signs by which a young bird may be known, and a rigid vent when fresh. When this part is green the bird is stale. PHEASANTS may be chosen as above; the young birds are known by the short or round spur, which in the old is long and pointed.

Vexisox.—The choice of venison should be regulated by the appearance of the fat, which, when the venison is young, looks bright, thick, clear, and close. It first change are towards the haunches. To according to the content of the es towards the haunches. To ascertain wheth er it is sweet, run a knife into that part; if tainted it will have a rank smell. It should not be cooked if too high.

MUTTON.—The best is of a fine grain, a bright color, the fat firm and white. It is

better for being full-grown. The meat of the ewe is not so bright, while the grain is closer. The ram mutton may be known by the redness of the flesh, and the sponginess of the LAMB should be eaten very fresh. In the fore quarter, the vein in the neck being any other color than blue betrays it to be stale. ompetition.

Bacon.-Excellent young bacon may be thus known :- The lean will be tender and of a bright color; the fat firm and white, yet bearing a pale rose tinge; the rind thin, and the lean tender to the touch. Rusty bacon has yellow streaks in it. BEEF.-True, well-fed beef may be known by the texture and color; the lean will exhibit an open grain of deep coral-red, and the fat will appear of a healthy, oily smoothness, rather inclining to white than yellow. The suet firm and white. Yellow fat is a test of meat of an inferior quality. Heifer beef a but little inferior to ox beef; the lean is of a least a rather than the first part and the first par

closer grain, the red paler, and the fat wi-ter. Cow beef may be detected by the same sign, save that the older the beast the texture of meat will appear closer, and the flesh coarser to the sight, as well as harder to the touch. HAMS.—The test of a sweet ham is to pass a sharp knife to the bone, and when drawn out smell it; if the knife is daubed greaty, and the scent disagreeable, it is bad. A good

ham will present an agreeable smell when

Recives. Ar a recent meeting of the British Asso-ciation, the Abbe Moigno, one of the French delegates, called attention to a new process of preserving milk perfectly pure in the natural state, without any chemical agent. The discovery was made by M. Pierre, whose process is the employment of heat, applied in some peculiar way, by manual dexterity. The effect of this application is to remove a sort of diustore, or animal ferment, which exists in milk in a very small quantity, and which is the real cause of its speedy decomposition. When this species of ferment is removed, milk can be person to for an indefinite period of time in vessels not quite full, and consequently exposed to the contact of rarefied air, a result which was not effected by the process of M. Maben, or rather that of M. Gay-Lussac, as they completely expel-led those gases which otherwise would have

CHICKEN PUDDING.—Fricasee two young chickens; season them slightly with a little mushroom powder, mace, nutmeg, and salt, but no pepper. Previously, take the giblets and stew them down with a bit of meat to make gravy; put two tablespoonfuls into the paste, and keep the rest to fill up or put under the pudding. Two hours will boil it.

BAKED BEARS.—To have a nice dish of baked beans, parboil half an hour, adding a little soda: then pour off the water and rinse. them. Add your pork already notched, cover them with water, and let them boil an hour, adding a teaspoonful of sugar to every quart of beans. Then put them in a baking dish, and let them brown nicely. INDIAN TOAST .-- Place two quarts of milk

over the fire. When it boils, add a spoonful of flour to thicken, a tesspoonful of salt, a small lump of butter, two tablespoonfuls of sugar. Have ready in a deep dish six or eight slices of light Indian bread toasted.— Pour the mixture over them. Serve hot. To MAKE A Boiled Indian Meal Pro-DING.—Take one quart of buttermilk, two eggs, one teaspoonful of sode, add meal enough to make a thick batter, tio it tightly

in a bag, drop it in a kettle of boiling water, and let it boil one hour. Eat it with sauce to suit the taste. FOR A BAKED PUDDING .- Set to boiling one quart of sweet milk, then add two ergs well beaten, with three tablespoonfuls of Indian meal and one of flour. Bake it threequarters of an hour. Serve with cream and
