THE Electoral Vote of New Jersey, so much crowed over by the Fusionists, will be split, 4 for Lincoln, 3 for Douglas.

One object in the present excitement in two or three of the Slave States, is the reopening of the African slave trade.

THE City Wide Awakes of New York, have resolved to attend the Inauguration on the 4th of March next, at Washington, *en masse*, and in uniform.

SECESSION is strongly repudiated in Kentucky. A meeting of the people of the whole State will be held in Louisville to-day, to deprecate disunion.

GEORGE BROWN, the Reform Mayor of Baltimore, was inaugurated on Monday. He closed his address with a strong expression of Union sentiment.

THE KANSAS ELECTION.—Complete returns from the Territorial election for members of the House of Representatives, show a large Republican majority in that body.

BISHOP POTTER has issued an appeal for aid for the suffering people of Kansas, who are in need of the necessaries of life. The President has given one hundred dollars from his private purse to the object.

SOME of our Southern friends are decidedly lively, almost insanely so, many mi ht think. They have hung Mr. Lincoln in effigy at Pensacola, Florida. If the personal danger comes no nearer than that, there is little cause for apprehension.

THE Pony Express, with California dates the 3d inst., has arrived. It appears that parties concede California to Lincoln.—Lower California has been made the scene of dreadful outrages by Mexican Indians, thieves and murderers.

MICHIGAN:—The Republican majority will be a few votes below 24,000. The Legislature will stand:

	Rep.	Dem.
Senate,	30	2
Assembly,	72	8
Total,	102	10

THE Governor of Mississippi has issued a proclamation convening the Legislature of that State to "make provision for more sure protection to the South." The South Carolina Legislature adjourned Thursday morning without anything of interest transpiring. Mr. Pettit has made a violent secession speech at Columbia, S. C.

A REACTION is being experienced in the South. The Union men and journals are taking boldly; and when South Carolina has her convention in December, to make arrangements for Cecession, it is probable that she will stand alone and unsupported. It cannot be otherwise, for the South has no cause for secession.

THE New York *Tribune*, and *The Leader*, the latter the organ of the Douglas party, and of Tammany Hall in New York City, advise that coercion ought not to be employed to compel South Carolina or any other State, to remain in the Union against the will of its people, deliberately and fairly manifested. If the people of any State wish to try the advantages of living out of the Union, let them do so.

LETTERS received in Washington from Virginia intimate that numbers of the wealthy planters have avowed their determination, if the attempt to break up the Union shall succeed, to locate in the free States. Of course they would. The South would be the only material sufferers by disunion, and the disunionists know it. We give them a fortnight yet to work off their superfluous steam, and come down to sensible behavior.

LEGISLATURE OF NORTH CAROLINA.—The Legislature of that State will meet on Monday next. It will probably be one of the most interesting sessions ever held since the commencement of the State Government. A United States Senator, a Judge of the Supreme Court, and three Judges of the Superior Court will be elected, and other matters of great and vital importance will be discussed and disposed of.

SENATORS Chestnut of South Carolina, Toombs and Iverson of Georgia, and Clay of Alabama, have resigned their positions, not to take effect unfortunately, until the 4th of March next—we say unfortunately, for if their places were to be vacant next winter, and a few more were disposed to follow suit, we should have the Morrill Tariff Bill passed in the Senate. It is surmised that these resigners are endeavoring to enhance their popularity at home, with a view to their re-election. The case is probable.

As there is every prospect that the times will improve, the projects of establishing a cotton and also a woolen mill, in this Region, could be considered by capitalists. Hands could be procured here, fuel is cheap, and a market for the products exists here. We are in the line of railways leading in all directions, and the raw material can be transported to this point cheaply. We shall enlarge upon this subject, shortly, in order that it may be brought before the public in a shape which its importance warrants.

THE RESIGNATION OF Mr. TOOMBS.—A despatch from Washington states that Mr. Toombs's resignation from the Senate was rendered necessary by his pledges during the campaign. In holding on till the 4th of March, however, he takes the chances for a re election, which every body believes he desires. Georgia has no confidence in his counsel nor faith in his stability. He is trying to recover from his recent affiliation with Mr. Douglas. Last winter he declared in Washington that he wanted no better epitaph than—"Here lies the man who destroyed the Republic."

COAL OIL MANUFACTORY IN NOVA SCOTIA.—The Pictou *Eastern Chronicle* of October 9th, states that the corner stone of a new coal oil manufactory was laid on the 20th, with Masonic honors, by the brethren of the "mystic tie" connected with the lodges at New Glasgow and the Albion Mines. The Albion Mines band was in attendance, and after the ceremony had been performed, the party were entertained with a lunch by Mr. Patrick, who has hitherto superintended the working of the mine. The retorts, and other apparatus of the coal oil works, have been imported from New York.

THE COAL TRADE.

Pottsville, November 17, 1860.

The quantity sent by Railroad this week is 43,312 12—by Canal 26,121 03—for the week 69,433 16 tons against 80,774 tons for the corresponding week last year.

The break in the Schuylkill Canal near Manayunk, took longer to repair than was anticipated. Coal commenced arriving from below on Thursday night only, and we hope there will be no further serious detention for the balance of the season. The Canal has, in consequence of this interruption, lost nearly all the gain she made during the season; and it has been a serious drawback to the Destmen.

The trade from all the Regions sums up this week as follows, compared with last year:

	1859. WEEK.	1859. TOTAL.	1860. WEEK.	1860. TOTAL.	TOTAL INC.

The trade shows a loss again this week of 25,630 tons, without any return from the Wyoming Canal, South, or the Pennsylvania Coal Company. The loss in the trade for the last two weeks reaches nearly 60,000 tons, and has reduced the increased supply for the year, to less than 577,000 tons. All the loss sustained has been by the Canals, owing to high water.

Under these circumstances, we are fearful that the supply will be short in some of the distant markets, if the weather should prove severe during the Winter. We learn that the stocks are light in all the markets, and all the Collieries are worked up to their full capacity, in their present state of preparation.

REPPLIER'S COAL.—By an advertisement which will be found below, it will be observed that Tyler, Stone & Co., have been appointed Agents for the sale of Reppiier's Coal. This Coal is of the best quality mined in Schuylkill County, and has always commanded the best prices in the market. No better Coal is produced in any region.

We understand that the contract system, which the Delaware & Hudson Company entered into for the working of their mines, has not worked well this season. They show a loss in the supply of Coal of upwards of 100,000 tons, and some of this we learn was purchased from other producers of Coal.

A friend will furnish us with a series of articles on the development of the Southern portion of the Schuylkill Coal Field. The following is the beginning of the series:

THE SCHUYLKILL COAL REGION.

What Ought to be Done.

We would call the attention of those interested in the prosperity of this region and the development of its mineral resources, to the following important facts.

There is a large, rapid, and continued increase in the demand, and consequent supply, of the Schuylkill Coal. The Schuylkill region is of superior quality and is thoroughly cleaned and carefully prepared for market. The low prices at which Operators have been compelled to sell it, during the last three years, has led to its extensive introduction to parts of the country where Anthracite was but little used before, and its market has therefore been greatly increased; a fact—ries furnaces, mills and other consumers, which used it then fuel before, now resort to Anthracite; while several extensive Railroad Companies have introduced it in their motive power, and others are about using it also. The increase of the shipments from the Schuylkill Region in 1859 over those of 1858 was 105,000 tons, including the Sunbury Shamokin Coal of Lykens Valley, while the increase of our hard Anthracite shipments this year, up to November 9th, 1860, over those of last year to the same date, are 263,121 tons. This would make the increase in the year 1860 over 1859 more than twice as much as that of 1859 over 1858; and at this ratio, the amount of Coal from the Schuylkill region that the trade will require in 1861, will be nearly *five hundred thousand tons more* than was mined this year! Nor will this rapid increase stop here,—it will keep pace with the enlarged wants of manufactures, trade and domestic consumption.

Now, the important question arises, how is this increased demand to be met so as to insure profit to the Operator and Landowner and prosperity to the Region? We propose in succeeding articles to give our views on this subject, founded upon calculation and mature deliberation. If we do not make arrangements for supplying this increased demand *other regions will.*
