for fish." -The original title of the play, as you may see by the second Folio, is "Twelfth Night, or, What? you, Will?" It originated in the rapturous surprise of Queen Elizabeth, who had seen the drama, without knowing the author, and who broke into the exciamation of which "Will's" loyalty immediately madethe second part of the title.

-Lyridon had never seen a play of Shakespeara's until taken to hear Hamlet. He regrets to find that the work, so much praised, is nearly all made up of quotations perfectly familiar to him. We are sorry also, but what can we do?

We quite agree with you that Shakespears did not understand the value of a good melodramatic title for a play, and we hope that you will induce your friend the manager to bring out Macbeth, not with that tame name, but with a title taken from the last speech of the play. The Dead Butcher and the Flend-Like Queen. Shakespeare would have called it so had he lived in our day. -An Inquirer inquires why the part of Marshal Stalk is omitted from the play of Hamlet, when the author distinctly intimates that the marshal is to walk in beside the
