I am enabled to assonable prices, and I would im my friends of Schuylkill Marc inus the horse as evidently seeks information about the object of his fears through the nostril as by his hearing or sight. Those who blind their horses, that is cover their eyes by "blinds" or "blinkers," if the South Side, nor connection with any oth-his alarmed, essentially fail. Alarri A G harge Diffeo. April JOE Juni blindness becomes second nature, they are anxious and listening to every strange sound southing every breeze—in fact, trying to make good their loss of sight by caution, hearing and scent. The horse ought for his owners safety and his own comfort, to have the free use of all his faculties. We would never break a horse to be driven with blinders, nor use any horse thus blinded, unless early chu-cation had made it neccessary. The custom M of our best horsemen is to supply the place of of the old blindered head stall by a light strong bridle. The horses look better, travel more securely, as they see better how to pick their way over slippery pavements and rough roads, and as far as our own observation goes RI they are freer and easier on the road, more trusty and less liable to shy. All lovers of OH. the horse will hail with pleasure his freedom from this imposition. Recipes. Good BREAD, —Good bread cannot be made by necely mixing flour and water and yeas. The mass must be kneaded so as to be sure and bring every grain of flour in contact with equivalent grain of water, so as to diffuse the word there is a so diffuse the Jul yeast uniformly throughout the mass, or else the gas will be liberated to excess in one spot and not at all in another. This is seen in badly kneaded loaves-in the holes they contain, and in a crust that easily detaches from the crumb, as though it had been lifted by internal force. The air cells in a well kneaded louf are fine and uniform throughout the mass, and all will be formed at the same CITRON CAKE. -- Four pounds of flour, two and a half pounds of sugar, two pounds of butter, two ouncostards one pint yeast and

functions, and thus expels the distempers

which lurk within the system or burst out.

on any part of it. We know the public have been deceived

by many compounds of Sarsaparilla, that promised much and did nothing; but they

will neither be deceived nor disappointed in this. Its virtues have been proven by abun-

dant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has

been before the people, and is far more ef-

fectual than any other which has ever been
