The Most Complete Sewing Machine in Existence. The Introduction of the "FLORENCE"
Dates a new era in Sewing Machines It Hems, Fells, Binds, Gathers, Braids, Quilts, and Gathers and Sews on a Ruffle at the same time.

The undersigned has been appointed Agent for Schnylkill County, of the Florence Sewing Machine. Company, Manufacturers of the celebrated Reversible Feed Sewing Machines. The following advantages over any and all Sewing Machines, are claimed for the "Florence":

It makes four differentistitches, the look, knot, double-lock and double-knot; on one and the same machine. Each stitch being alike on both sides of the fabric. fabric.

It has the reversible feed motion, which enables the operator, by simply turning a thumb screw, to have the work run either to the right or left, to stay any part of the same, or fasten the ends of the seams, without turning the fabric.

Changing the length of the stitch, and from one kind of stitch to another, can readily be done while the machine is in motion.

thine is in motion.

Every stitch is perfect in itself, making the seam so cure and uniform.
It is amost noiseless, and can be used where quiet is necessary.

Its motions are all positive; there are no springs to get out of order, and its simplicity enables the most inexperienced to operate it.

It will not oil the 'dress of the operator, as all the machinery is on the top of the table.

It is the most rapid sewer in the world; making five stitches to each revolution.

Its stitch is the wonder of all, because of its combined elisticity, strength and beauty. Its stitch is the wonder of all, because of its combined staticity, strength and beauty.

It does the heaviest or finest work with equal facility, without change of tension or machinery.

Every Machine has one of Jenck's patent, hemmers statched, (the right to use which we control,) enabling the operator to turn any width of hem desired.

The public is respectfully invited to examine these Machines at the store of the undersigned, Centre street, Pottsville, where full particulars will be given.

INVALIDS IRON IN THE BLOOD. It is well known to the medical profession that IRON is the vital Principle or Life Element of the blood. This is derived chiefly from the food we eat; but if the food is not properly digested, or if, from any cause whatever, the necessary quantity of iron is not taken into the circulation, or becomes reduced, the whole system suffers. The bad blood will irritate the heat; will clog up the lungs, will stupefy the brain, will obstruct the liver, and will send its disease-producing elements to all parts of the system, and every one will suffer in whatever organ may be predisposed to dise

TO THE LADIES! BOTH MARRIED AND SINGLE. The Oldest Regulator for Females. Dr. Cheeseman's Female Pills

Will immediately relieve, without pain, all disturban ces of the periodic discharge, whether arising from relaxation or suppression. They act like a charm in removing the pains that accompany difficult or immoderate menstruation, and are the only-safe and reliable remedy for Flushes, Sick Headache, Pains in the Loins, Back and Sides, Palpitation of the Heart, Nervous Tremors, Hysterics, Spasms, Broken Sieep, and other unpleasant and dangerous effects of an unnatural condition of the sexual functions. In the worst case of Fluor Albus or Whites, they effect a speedy cure.

Dr. Checieman's Female Pills Dr. Cheeseman's Female Pills have been used OVER A QUARTER OF A CENTURY. They are offered as the only safe means of renewing interrupted menstruation, but ladies must bear in mind that there is one condition of the female system in which the Pills cannot be taken without producing a PECULIAR RESULT. The condition referred to is PREGNANCY—the result, MISCARRIAGE. Such is the irresistible tendency of the medicine to restore the sexual functions to a normal condition, that even the reproductive power of nature cannot resist it. The above is a correct likeners of Dr. Schenck, taken many years are after he had recovered from Consumption, by a fourse of his "Congress Pulmonio Street." The likeness, although it toos not represent him anything like as bad as he was at the worst, yet it is in strong contrest with the hale and vigorous looks of the Portrait below, which is the true likeness of him at the present time. The contrast between these two portraits is so great that many would not believe them to be the same person. Yet there are hundreds of persons in and around Philadelphia who will recognize both portraits to be true representations. When the first was taken he weighed 107 pounds; at the present time his weight is 220 pounds.

Thirty years ago I was in the last stages of Pulmonary Consumption, and given up to die. I resided in Philadelphia, and Dr. Joseph Parish, then of this city, ordered me to Moorestown, N. A GREAT REMEDY FOR CONSUMPTION.
I am constantly receiving such certificates as the following. READ IT!

Dr. Wishart—Dear Sir: I had a very dreadful cough and sore throat for one year, and my whole system was fast giving way, and I was prostrated on my bed with but little hope of recovering. My disease baffled the power of all medicines, and in a short time I must have gone to my grave, but thank God, my daughter-in-law would not rest until she went to your store, No. 10. N. Second street, and related my case to you, purchased one bottle of your Pine Tree Tar Cordial and I commenced to use it, and it none week I was much better, and after using three bottles, I am perfectly well, a won dergo all my friends, for they all pronounced me past cure. Publish my case if you think proper.

TAR CORDIAL, AN INFALLIBLE CURE FOR BRONCHITIS.

Mr. Ward says:

De. Wishart—Sir: I had Bronchitis, Inflammation of the Eungs, Shortness of Breath, and Palpitation of the Heart in their worst forms. I had been treated by several of the most eminent physicians in Philadelphia, but they could not stop the rapid course of my disease, and I had despaired of ever being restored to health. I was truly on the verge of the grave. Your Eine Tree Tar Cordial was highly recommended to me by a friend: I tried it, and am thankful to say that, after using four large and one small bottle, I was restored to perfect health. You can give reference to my house, No. 958. Second street, or at my office of Receiver of Taxes, from 9, A. M., to 2, P. M., corner of Chestant and Sixth streets.

BLEEDING OF THE LUNGS. READ THE FOLLOWING:

MR. WISHART—Sir: I return you my grateful thanks for the discovery you have made in making a medicine that will cure Initammation of the Lungs and Liver Complaint. When I commenced to use your Pine Tree Tar Cordial I was, to all appearances, near my grave.—I had been for a length of time spitting blood, and would at times vomit it. My physicians (for I employed two) pronounced me past cure: but my sister had used your Pine Tree Tar Cordial, which did her so much good that she prevailed on me, as a last resort, to try it; and thank God. I commenced to use it. I have taken twelve bottles, and am perfectly cured, and am rendy and willing that any person that is sick should call on me, and I will tell them what your cordial has done for me.—All my friends and neighbors were utterly astonished at my speedy return to health, for they had seen me vomit blood in a clotted state frequently. Publish my case for I want every person that is suffering as I was, to know of your invaluable medicine.

we do not now propose any attempt to solve the difficulty, but merely to record a few obervations on similar disease in other trees which possibly at some future time may throw additional light on the subject. The singular freaks of the pear-blight a worthy of a passing notice. Years ago i destructive effects were observed in certain localities; and these localities were conse. quently supposed to be specially and penns. nently liable to the malady. In other place again it was entirely unknown, and these were marked as the best places for planting pear orchards. Among others, we well recollect that the vicinity of Lockport was designated as a region entirely free from this malady. Orchards were planted there to a considerable extent; but in a subsequent year the blight made such a terrific sweep through them as to dissipate all previous illusions. Some years ago, when examining the orchards in the vicinity of Boston, we learned that the fire-blight was quite a stranger thera by the fact that the President of the Massa. chusetts Horticultural Society, (the late Sam. uel Walker,) on whose grounds we were walking, pointed to a little dead branch on one of his trees containing a few light-brown withered leaves, and anxious inquired, if that was fire-blight? He had evidently never seen it nor witnessed its peculiar development which those cultivators who have once witnessed it, are not likely soon to forget. We have not since heard of its visiting that neighborhood, but that it never will is not quite so certain.

Our object at present is merely to, mention similar appearances on other trees. - Several cars ago, when it was very prevalent during a particular season in Western New York, we observed the branches of other trees similarly affected by suddenly dyingthe more sudden the death the blacker th foliage. Even the elders which grew along the fences of slovenly farmers exhibited the fire-blight distinctly. The apple orchards were badly affected in their peculiar war. that is, on only the small shoots, or tips the branches, the descent of the diseased sa not having power to carry the disease down ward to any extent, as happens in the case of the pear.

During the present season a similar mala appears to have attacked evergreens. observed it first in the Balsam Fir, when okce Injection and Cherokce Cure, are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these; those which they can purchase at a cleap price, and make more money by selling, than they can on these medicines. As you value your health, age, the health of your future offspring, do not be deceived by such unprincipled Druggists, ask for these medicines and take noothers. If the Druggist will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed, free from observation.

Puture of the past summer. Specimens of some of the pines were sent us by S. Rheades, Esq. of West Philadelphia, showing a similar result, the tip shoots being dead and the leaves a rusty brown. A fine specimen of the Pinus excelsa on our own grounds has mostly perfect confidence, stating fully and plainly their diseases and symptoms. several thousand pear trees growing within a short distance, not a single case of genuine fire-blight has occurred this same scason, although a few have perished by that peculiar disease of the roots which has been observed of late years. But, in the latter case, the leaves, instead of turning suddenly black, a in the genuine blight, have only withered and become light-brown, evidently in consequence of the mere lack of nourishment, the supply of which could not be obtained

through the dead roots. There is another form of local disease which we have not mentioned, nearly allied to the preceding, namely—that which causes dead patches or portions of bark on the trunk of the pear tree. All these show that there is a tendency in some trees to local and circumscribed disease, variously affecting different trees, but in some, and especially in the pear, producing a poisonous sap, extending the trouble to other parts, and suggesting the remedy of prompt amputation. It is also obvious that as these appearances are more ap to be openly developed, (if not caused.) during very hot weather, a system of training should be adopted that shall distribute follshould be adopted that shan distributed age evenly through the head and prevent the sun from striking severely on any expand the following Succulent growth, it is well known. portion. Succulent growth, it is well known, renders the tree more liable; and hence on a good, dry soil of medium fertility, that shall prevent an excessive growth, but favor healthy ripening of the wood of the shoots, the trees will be more likely to escape.-

Country Gentleman. -REQUISITES FOR MAKING GOOD BUTTER. There are a few butter-makers who have es tablished such a reputation for making the very best article, that all they can spare for market is eagerly taken at several cents per pound above the market price. So far as we know, they all adopt the following rules; of if they do not, they practice them:-1. A perfectly clean cellar, not only clean from all dirt, but from every bad odourpure, sweet and fresh.
