CONSUMPTION ? Those who should be warned by these symptoms gen-erally think lightly of them until it is too hate. From this fact, perhaps more than any other, arises the sad previdence and fathily of disease which sweeps to the grave at least one-sixth of Death's victime. What are its SINEYONS ? It usually begins with a short, dry cough, which soon becomes habitual, but for some time nothing is smeach to result ware to succes. The breathing is somewhat orright, a reform yuccis. The breathing is somewhat orright, and upon slight exercise much meaning. A sense of murryes and orresession at the chest is often felt. As the disease advances the patient becomes thin in foch, is allicted with loss of appetite, great languor, indolence and decision of spirits; and may continue in this state for a considerable length of line, that it is very readily affected by slight exposure or fatigue. If these occur, the cough becomes more troublesome, and is attended with expectoralon, which is most copious and free early in the morning. It is sometimes streak-ed with blood. At this stage night-sweats usually set n, and in some cases a profuse bleeding of the chest is felt, when sweare fits of coughing or a sense of full-ness, or sufficient of lying upon one or the other side, without sever fits of coughing, or a sense of full-ness, or sufficient of lying upon one or the other side, without sever fits of coughing, or a sense of full-ness, or sufficient of lying upon one or the other side, without sever fits of coughing, or a sense of full-ness, or sufficient of lying upon one or the other side, without sever fits of coughing, or a sense of full-ness, or sufficient of lying upon one or the other side, without sever fits of coughing, or a sense of full-ness, or sufficient of lying upon one or the other side, without sever fits of coughing, or a sense of full-ness, or these dangerous distempers leave you. With HAVE TOU & COUGH ?. HAVE YOU SORE TURDAT ?. HAVE. feelle, foul, or corrupted blood, you cannot have health; with that " life of the flesh" healthy, you cannot have scrofulous disease. Ayer's Sarsaparilla is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it citails. That it is far supe-rior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints; is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, checks, and the dire malady is fast instending to its close. You now ask. "Is THERE A CERE?". Consumption has been and can be cured by the use of my Tar Cornar, even in apparently hopeless cases.— This assertion I make, with the ability to present the most complete evidence of the truth. Space will not admit of my giving the contents of the many thousands of testimonials to its value, which I have been and am receiving from men and women of unquestionable worth and reputation. I have had a number of these certificates printed in circular form, which I will send you free on application. Whether you now determine to try the undicine or not, send for the circular. Minute reports of individual cases may be found in Aven's AMERICAN ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the case. Because I believe this to be the best, I ask you to try it. Many, not only of the people, but physicians of every school and practice, are daily asking me, "What is the principle or cause of your recess in the treatment of Prumos any Const MYTON ?" My answer is this: The Invisonations of the digestive organs—the extrassiventistics of the blood, must expel from the system the corruption which Scrofula breeds. While this is effected by the powerful alterative (changing from disease to health) properties of the Tar Cordial, its health and real principle is also acting upon the irritated surfaces of the lungs and throat, penetra-ting to each diseased part, relieving pain, subduing in-flummation, and restoring a healthful tendency. Let this two-fold power, the healing and the strengthening, continue to act in conjunction with Nature's constant recuperative tendency, and the patient is saved, if he has not two long delayed a resort to the means of pire: vital energies, and thus leaves its victims far. more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The yast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of AYER'S SARSAPARIELA: although it is composed of. of Sarsaparilla in alterative power.
