THE Boston Saturday Evening Gaeette has & local correspondent, "The Old Apple Man," who is brimful of humor and philosophy. In his last communication he says:

Every one that I have seen since Maretzek came here is opera mad, until I have become infected by the mania, and once have viewed the lyric drama from an elevated position. A man gets his money's worth who sits in the gallery. Since then I have wished that I had lived a neighbor to Bombazetti or Lig-, numvitte or some, of those old composers, that I might have written a "book" for them. I think I could have written a spirited book, and indeed I turned my attention to trying within a few days. Though yet in the draft, I am induced to send you a couple of scenes as a proof of my ability. It is called the "Boarding House Fiend," though I have not yet decided how the fiend shall be introduced or indeed if he be introduced at all, relevancy not being of any account in a "book." Any one with the least pretension to taste and feeling can see, with the incidents of the breakfast fresh in mind, how gracefully the fragments sent you can culminate at supper time, after worrying through the grand chorus of a scant dinner. I am in distress about a tenor. Signor Lotti's fault in being small which the critics prove uncontestibly to be his, warn me against selecting a small man, and therefore I am determined that my tenor shall be at least eight feet high, with a voice capable of taking XX in malt. But not to keep you from the feast I have prepared for MINE HILL & SCHUYLBILL HAyou, I send you the two scenes of the twenty

THE BOARDING-HOUSE FIEND: An Opera.

DRAMATIS PERSONNE: Johnson (Tenore) - A young man of sentiment whose name does not appear on the income Spooner (Basso)-Uncertain occupation but very

Matilda (Soprano) - A spinster, with expecta-Margery (Contralto)—Needlewoman, Bridget-Maid of all work and all made of work

Mrs. Mooney-Landlady-a high priced soprano. Chorus By Boarders.

Scene NA corridor, second floor, on which four doors open, from which respectively emerge Johnson, Spooner, Matilda and Margery, alarmed by Bridget with big breakfast bell. Sounds of perparing breakfast. Boarders heard muttering.

The rigning continues. Johnson-Stop, stop those notes appalling. Spooner-That upon our ears are falling. Matilda-Causing direst perturbation. Margery-By the tintinnabulation.

Chorus of Boarders, Stop, stop that fearful ringing. Dinging, donging, donging, dinging; From our beds of down we're rising With agility surprising.

Hrs. Mooney (below stairs.) All-your toilets please to make fast And then come and take your breakfast Do not keep the table waiting All our feelings larcerating. Bridget (ringing violently) Come come to breakfast wid ve.

Do as Mistress Mooney bids ye. Chorus Stop that ringing Donging dinging, Let the noiso tongue now res For we're up, we're up and dressed. Spooner-What a clatter!

Tohnson-My teeth chatter! Margery-No I never. All-Such a noise is past all bearing, The air is full of silent swearing. SCENE II .- The Breakfast Table. Boarder waiting the cup of fifteen cent Mocha, Small saunds of beef steak at remote intervals. Buck-

whe its, etc., and infinitesimal. Mrs. Mooney-Owing to the fearful rise Of all sorts of merchandise, I'm shore I don't know what to do Unless I make a rise on you. Beefsteak twenty cents the round, Butter sixty cents a pound, Sugar up to thirty-three, And fearful is the price of tea! Grocers bid me down the dust Market people will not trust.

I don't know what I'm to do Unless I make a rise on you. Johnson -Oh, I hate this constant mutter-Beef and butter, beef and butter! Sporner_Oh; these notes our nerves annoying All our peace of mind destroying-

Matida-Oh, this vexed financial question Marring comfort and digestion! Margery-Oh, such mercenary matters Tear my trembling nerves to tatters! _(aside) And with all the ohe you're

For your board the whole are owing. Chorus of Hungry Boarders. Bridget, hurry up the cake, Pile the soddened doughnuts high; We are martyrs at the steak,

Pierce the iron plated pie. Johnson-Hear her mutter, Spooner-Let her sputter Margery-We will cut her. All Mutter, butter.

Soutter, out her. We will cut her, we will cut her.

Push back their chairs and exit. AMUSING PROVERBS ABOUT WOMEN. As the good man saith, so say we; but as the good woman saith, so it must be.

MEDICINAL.

IMPORTANT TO ALL INVALIDS

IRON IN THE BLOOD. It is well known to the medical profession that IBON is the vital Principle or Life Element of the blood. This is derived chiefly from the food we eat; but if the food is not properly digested, or if from any cause whatever, the necessary quantity of iron is not taken into the circulation, or becomes reduced, the whole system suffers. The had blood will irritate the heart, will clog up the lungs, will stupefy the brain, will obstruct the liver, and will send its disease-producing elements to all parts of the system, and every one will suffer in whatever argan may be predisposed to discesse to be the rod of Him who says. Glad News for the Unfortunate! THE LONG SOUGHT FOR DISCOVERED AT LAST. Cures in from one

to three days. CHEROKEE REMEDY CHEROKEE INJECTION!

Compounded from Roots, Barks & Leaves. CHEROKEE REMEDY, the great Indian Dinretic, cares all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhoz, and is especially recommended in those cases of Fluor Albus for Whites in ited.

It is prepared in a highly concentrated form, the doseing from one to two teasmonful. being from one to two teaspoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in ah its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhea, Gleet, Fluor Albus or Whites. Its effects are healing, soothing, and demulcent; removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the cheap quack Injections.

By the use of the Cherokee Remedy and Cherokee Injection—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedly restored to full vigor and strength.

The Cherokee Injection, \$2 per bottle, or three bottles for \$5.

Sent by express to any address on receipt of price.

The Cherokee Remedy, Cherokee Injection and Cherokee Cure, okee injection and Cherokee Cure, are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these; those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, aye, the health of your future offspring, do not be deceived by such unprincipled Druggists, ask for these medicines and take no others. It the Druggist will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed, free from observation. to you by Express, securely sealed and packed, iree from observation.

infection which we call ScroyuLA lurks in the constitutions of multitudes of men. It either produces or feebled vitiated state of the blood, wherei that fluid becomes i competent to sustain vigorous action, and

fall into disorder and visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which suppurate and become-ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affection These, all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that life of the ficsh. healthy, you cannot have scrofulous disease.

Ayer's Sarsaparilla

compounded from the most effectual anti-

dotes that medical science has discovered for

this afflicting distemper, and for the cure of

the disorders it entails. That it is far supe-

rior to any other remedy yet devised, is

known by all who have given it a trial. That

it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases. Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in AVER'S AMERICAN ALMANAC, which is furnished to the druggist for gratuitous distribution, wherein may be learned the directions for its use; and som of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to discase and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of AYER'S SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions, and thus expels the distempers

which lurk within the system or burst out will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the fflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effeetual than any other which has ever been

J., a distance of nine miles, which took me two days to get, there. On my arrival I was pubto bed, and there laid for many weeks. This was my native place, where all my family lived and had died of Consumption. Dr. Thornton, who attended my father in his last filness, was called, and gave me one week to fix up my affairs. He had seen all my family go that way, and thought I was to go, too. Then I heard of the remedies I now offer to the public, which cured me. They soon ripened the matter on my lungs, and I would spit of 'more than a plut of offensive yellow matter every morning.' PEACH TREES IN COLD CLIMATES.

Some months ago a western nurseryman,

who had a plan for protecting peach trees

during severe winters, consulted us with re-

ference to patenting his process. Consider-

ing that patenting a mere process or way of doing a thing in horticulture was, to say the least, inexpedient, he was advised to give his simple discovery to the general fund of knowledge. He had all his life profiled by the accumulated experience of thousands of others, and we considered it only right that he should make this small return. The ventleman would not consent to make his iscovery public, but he wished us to advertise that he would communicate his secret for a compensation. This proposition was declined for the reason that, while the secret might be worth the sum asked, most persons when they found out how simple the thing was, would consider that they had been "sold" and would blame us accordingly.-The process in question having been described to us under circumstances implying confidence, it was not given publicity and the matter dropped. In a recent number of the Country Gentleman another person, "V. W. S.," has hit upon almost precisely the" same expedient as the one alluded to, and as every liberal horticulturist should, he communicate his experience for the benefit of the public. The method is simply to lay down the trees and keep the tops covered with snow. It is done as follows: dig a trench on one side of the tree, about a foot from the trunk and sufficiently deep to uncover the roots. The lateral roots on this side are to be cut off at 12 or 15 inches from the tree, and those roots which run downward are to be severed by thrusting a sharp spade directly under the tree. The tree may now be bent over and the branches brought close to the ground. The roots upon one side being severed, and the remaining ones being undisturbed, this can be accomplished without difficulty. It is important to save all the roots possible and yet allow the tree to be bent down, and only those should be severed which interfere with this object. The upturned roots have sufficient earth placed over them to protect them from frost, and the tops are lightly covered with refuse vines from the garden or similar litter. When snow falls, it is heaped up over the top of the tree so that it will be covered to the depth of six inches or a foot, and the covering kept on me, and my appetite occame so great that it was with difficulty I could keep from eating too much. I soon gained my strength, and I have been growing in fiesh ever-since. For many years I have enjoyed unintering too health, keeping the liver and stomach healthy with the Seaweed Tonic and Mandrake Pills, as I am of a billions temperament. My weight is two hundred and twenty pounds. On my recovery people would send for me, far and near, to see if their cases were like mine. For this purpose I pay professional visits in the large cities. The consumptives wish to see the one that makes these medicines, and who was cured of consumption by them. To make new lungs is impossible; out cavities in the lungs, and chronic ulcerations of the bronchial tubes can be healed. Such cases are dring hourly under the ordinary treatment of physicians, and just-such are curied by the proper use of Schenck's Pulmonic Syrup, Seaweed Tonic, and Mandrake, Pills.

I am now a healthy man, with a large cavity in the all winter. In spring when the buds are We know the public have been deceived or many compounds of Sarsaparilla; that romised much and did nothing; but they lead to be of the right line, the lower lobe very much middle lobe of the right line, the lower lobe very much middle lobe of the right line. Tam now a healthy man, with a large cavity in the middle lobe of the right ling, the lower lobe very much hepatized and complete adhesion of the pleura. The left ling is sound, and the upper lobe of the right ling is in a tolerably healthy condition. The great reason why physicians do not care consumption is they try to do too much: they give medicines to stop the cough to stop chill, to stop night sweats, heetic fever, and, by so doing, they derauge the whole digestive powers locking up the secretions, and eventually the patient sinks and dies. After I make a careful examination of the patient with the Respirometer, and find lungenough left to cure. I direct the patient how to nee the patient with the Respirometer, and find lungenough left to cure. I direct the patient how to nee the healthy. In New England this cauker, chronic catarrh, ulcerated throat, elongation of urbla, is more prevalent than in any other section of the country. This is frequently caused by a four stomach. You may burn it out with causet time and acain, and all they will get is temporary relief. Correct the stomach and liver, and deasy more and more, antil you can get the shomach in the condition to digest food, and make new blood to take the place of diseased matter. This is the only way to heal exvities in the lungs and ulcerated brook will heal up themselves.

Good nutrition is the remedy. If you have any diseased in any part of the body, it will remain there, and decay more and more, and longs and ulcerated brook will heal up themselves.

In a garden where the ground that the tree may live at all. The feeding roots will grow where there is the greatest supply of nourishment, and in a soil annually manured to no very great depth, they will have a tendency to seek the richest portion. and the soil near the surface will be filled with fiberous roots. Surface manuring, now practised by good cultivators, has the effect to cause the roots to grow near the surface. Where this is done, coarse manure should be used and the litter left on the ground during the summer, or a heavy mulcis of some other. material must be supplied, otherwise, the roots being so near the surface, will suffer from drouth. Surface manuring and mulching must go together. To come back to our correspondetn's case. He cannot successfully grow fruit trees and other plants in the same soil, and it is much better to give up either his fruit or his vegetables than to have an indifferent crop of the two together. We have frequently advised having the kitchen and fruit garden distinct when there is sufficient land to allow it. Where the fruit trees must be grown in the general garden or not at all, then they should be only dwarf trees, which must be kept dwarf by proper pinching; as the root growth bears a direct relation to that of the branches, we have it

in our power to control it in good measure.
